Magnetic properties of free radicals

Part c2: Organic O-, P-, S-, Se-, Si-, Ge-, Sn-, Pb-, As-, Sb-centered radicals

General introduction

H. FISCHER, Physikalisch-Chemisches Institut der Universität Zürich, Switzerland

A Definitions and substances	1
B Magnetic properties	1
C Arrangement of the tables	2
D Important monographs	3
E Symbols and abbreviations	3
Symbols	3
Abbreviations	4

7 Oxy- and peroxy-alkyl radicals

J.A. HOWARD, National Research Council of Canada, Division of Chemistry, Ottawa, Canada

7.0 Introduction	5
7.1 Oxyalkyl radicals	5
7.2 Peroxyalkyl radicals from hydrocarbon compounds	8
7.3 Peroxyalkyl radicals from hetero-substituted hydrocarbon compounds	18
7.4 Other peroxy radicals	22
7.5 Trioxy radicals	26
7.6 References for 7	27

8 Aroxyl radicals

W. UBER, H. B. STEGMANN, Institut für Organische Chemie der Universität Tübingen, Germany

8.0 Introduction	29
8.0.1 General remarks	29
8.0.2 Arrangement of the tables	29
8.1 Carbocycles	29
8.1.1 Monocyclic compounds	29
8.1.1.1 Phenoxyls	29
8.1.1.1.1 Phenoxy	29
8.1.1.1.2 Monosubstituted phenoxyls	30
8.1.1.1.3 Disubstituted phenoxyls	55
8.1.1.1.4 Trisubstituted phenoxyls	64
8.1.1.1.5 Tetrasubstituted phenoxyls	174
8.1.1.1.6 Pentasubstituted phenoxyls	176
8.1.1.2 Related radicals	182
8.1.1.3 Oxyl-tropolones	185
8.1.2 Condensed two-ring systems	186
8.1.2.1 Oxyl-benzoferrocenes	186
8.1.2.2 Naphthoxyls	187
8.1.2.2.1 Unsubstituted and monosubstituted naphthoxyls	187
8.1.2.2.2 Di- and higher naphthoxyls	194
8.1.2.3 Oxyl-benzocycloheptatrienes	198
8.1.3 Anthroxyls (condensed three-ring compounds)	201

8.2 Heterocycles	203
8.2.1 Monocyclic systems	203
8.2.1.1 Pyridoxyls	203
8.2.1.2 Related radicals	205
8.2.2 Condensed two-ring heterocycles	206
8.2.2.1 Oxy coumarins	206
8.2.2.2 Oxy flavones	207
8.3 References for 8.1 and 8.2	209

9 Phosphorus-centered organic radicals

A.G. DAVIES, B. P. ROBERTS, Department of Chemistry, University College London, Great Britain

9.0 Introduction	215
9.1 Phosphinyl radicals of type X_2P^\cdot	215
9.2 Phosphonyl radicals of type $X_2P^\cdot=O$	217
9.3 Phosphoranyl radicals of type X_4P^\cdot , including the phosphate radical anions and related species	221
9.4 Phosphonium cation radicals of type X_3P^+ , phosphine dimer cation radicals of type $X_3P^+P^+X_3$, and related species	263
9.5 Bibliography	269
9.5.1 Review articles	269
9.5.2 References for 9.1...9.4	269

10 Sulfur- and selenium-centered organic radicals

H.B. STEGMANN, Institut für Organische Chemie der Universität Tübingen, Germany

10.0 Introduction	271
10.0.1 General remarks	271
10.0.2 Arrangements of the tables	271
10.1 Sulfur-centered radicals	271
10.1.1 Neutral radicals	271
10.1.1.1 Thiyl radicals of type $R-S^\cdot$, $R-S^\cdot-(R)_2$	271
10.1.1.2 Sulfinyl radicals of type $R-S^\cdot=O$, $R-S^\cdot=NR$	285
10.1.1.3 Sulfonyl radicals of type $R-S\begin{array}{c} \nearrow O \\ \searrow O \end{array}$	288
10.1.1.4 Sulfuranyl radicals of type $R-OS^\cdot F_4$	294
10.1.1.5 Disulfide radicals of type RSS^\cdot and $R-S^\cdot-S-R_2$	295
10.1.2 Cation radicals of type $R-S^\cdot+-R$, $R-S^\cdot+-S-R$, and $R_2-S-S^\cdot+-R_2$	298
10.1.3 Anion radicals of type CS_2^- , $R-S^\cdot--S-R$	301
10.2 Selenium-centered radicals of type $R-Se^\cdot$	303
10.3 References for 10.1 and 10.2	304

11 Organic radicals centered on heteroatoms

M. LEHNIG, Abteilung Chemie, Universität Dortmund, Germany

11.0 Introductory remark	307
11.1 Silicon-centered radicals	307
11.2 Germanium-centered radicals	310
11.3 Tin-centered radicals	312
11.4 Lead-centered radicals	316
11.5 Arsenic-centered radicals	316
11.6 Antimony-centered radicals	318
11.7 References for 11	319
11.7.1 Review articles	319
11.7.2 References for 11.1...11.6	319
