R.R. GUPTA, Department of Chemistry, University of Rajasthan, Jaipur 302004, India

1	Introduction	1
1.1	General remarks	1
1.2	Theoretical calculation methods	3
(a)	Pascal method	3
(b)	Pacault method	4
(c)	Pascal-Pacault-Hoarau method	5
(d)	Pascal, Gallais and Labarre method	6
(e)	Yang method	6
(f)	Baudet-Tillieu wave-mechanical method	6
(g)	Haberdlitzl method	8
(h)	Mital and Gupta method	10
(i)	Semi-empirical method	10
(j)	Ab-initio method	10
1.3	References for 1.1 and 1.2	10
1.4	Arrangement of the tables	11
1.5	Units and conversion factors	12
1.6	List of symbols	12
2	Diamagnetic bulk susceptibility of organic compounds	14
2.1	Data	14
2.1.1	Aliphatic compounds	14
2.1.2	Aromatic compounds	92
2.1.3	Heterocyclic compounds	194
2.1.4	Amino acids	227
2.1.5	Carbohydrates and related compounds	230
2.1.6	Steroids	232
2.1.7	Terpenes and related compounds	233
2.1.8	Charge transfer complexes and picrates	236
2.1.9	Oils	240
2.1.10	Paraffins	240
2.1.11	Polyethylenes	241
2.2	Index of substances to 2.1	241
2.3	References for 2.1	255
2.3.1	References for calculated data	255
2.3.2	References for measured data	256
3	Diamagnetic bulk susceptibility of inorganic and organometallic compounds	265
3.1	Data	265
3.2	Index of substances to 3.1	366
3.3	References for 3.1	376
3.3.1	References for calculated data	376
3.3.2	References for measured data	377
4	Diamagnetic bulk susceptibility of mixtures	386
4.1	Data	386
4.1.1	Tables	386
4.1.2	Figures	392

Table of contents**VII**

4.2 Index of substances to 4.1	397
4.3 References for 4.1	398
5 Diamagnetic susceptibility of the methylene group in various compounds	399
5.1 Data	399
5.2 References for 5.1	400
6 Diamagnetic susceptibility contributions of carbonyl ion ($\chi_{\text{CO}_2^+}$), amino ion ($\chi_{\text{NH}_2^+}$), nitro ion ($\chi_{\text{NO}_2^-}$) and silicon ion ($\chi_{\text{Si}^{4+}}$) in various compounds, calculated by Yang's method	400
6.1 Data	400
6.2 References for 6.1	401
7 Diamagnetic susceptibility of diamagnetic and paramagnetic ions	402
8 Diamagnetic anisotropy of organic crystals and molecules	403
8.1 Data	403
8.2 References for 8.1	440
9 Diamagnetic anisotropy of inorganic and organometallic crystals und molecules	445
9.1 Data	445
9.2 Index of substances to 9.1	454
9.3 References for 9.1	455
