## Radical reaction rates in liquids

### Subvolume c: Nitrogen-centered radicals, aminoxyls and related radicals

#### General introduction (H. Fischer)

A Definition and coverage . . . . .	XV
B Arrangement and contents of tables . . . . .	XV
C Important monographs, series, compilations . . . . .	XVII
D Symbols and abbreviations . . . . .	XVII

#### 5 Nitrogen-centered radicals (K.U. Ingold, J.C. Walton)

5.0	Introduction . . . . .	1
5.1	Aminyl radicals, RR'N <sup>•</sup> . . . . .	3
5.1.1	Bimolecular self-reactions and radical-dimer equilibria . . . . .	3
5.1.1.1	Monoalkylaminyls (R = alkyl, R' = H) <i>no entries</i>	
5.1.1.2	Acyclic dialkylaminyls (R, R' = alkyl) . . . . .	3
5.1.1.3	Cyclic aminyls (R, R' and N form a ring) . . . . .	3
5.1.1.4	Monoarylaminyls (R = aryl, R' = H) . . . . .	6
5.1.1.5	Acyclic alkarylaminyls (R = alkyl, R' = aryl) <i>no entries</i>	
5.1.1.6	Acyclic diarylaminyls (R, R' = aryl) . . . . .	6
5.1.1.7	Pyridinyl radicals . . . . .	13
5.1.2	Reactions with a different radical . . . . .	19
5.1.2.1	Monoalkarylaminyls (R = alkyl, R' = aryl) <i>no entries</i>	
5.1.2.2	Cyclic aminyls (R, R' and N form a ring) <i>no entries</i>	
5.1.2.3	Acyclic diarylaminyls (R, R' = aryl) . . . . .	19
5.1.3	Unimolecular reactions . . . . .	19
5.1.3.0	Monoalkylaminyls (R = alkyl, R' = H) . . . . .	19
5.1.3.1	Acyclic dialkylaminyls (R, R' = alkyl) . . . . .	20
5.1.3.2	Acyclic aminyls with leading atom of R and/or R' a heteroatom . . . . .	21
5.1.3.3	Cyclic aminyls (R, R' and N form a ring) . . . . .	22
5.1.3.4	Pyridinyl radicals . . . . .	24
5.1.3.5	Borylaminyls . . . . .	26
5.1.4	Intermolecular hydrogen atom abstraction from carbon . . . . .	27
5.1.4.1	Aminyl (R, R' = H) . . . . .	27
5.1.4.2	Acyclic dialkylaminyls (R, R' = alkyl) . . . . .	27
5.1.4.3	Acyclic aminyls with leading atom of R and/or R' a heteroatom . . . . .	27
5.1.4.4	Cyclic aminyls (R, R' and N form a ring) . . . . .	30
5.1.4.5	Acyclic diarylaminyls (R, R' = aryl) . . . . .	32
5.1.5	Intermolecular hydrogen atom abstraction from oxygen . . . . .	33
5.1.5.1	Aminyl (R, R' = H) <i>no entries</i>	
5.1.5.2	Cyclic aminyls (R, R' and N form a ring) . . . . .	33
5.1.5.3	Monoarylaminyls (R = aryl, R' = H) and acyclic alkarylaminyls (R = alkyl, R' = aryl) . . . . .	35
5.1.5.4	Acyclic diarylaminyls (R, R' = aryl) . . . . .	35

5.1.6	Intermolecular hydrogen atom abstraction from nitrogen <i>no entries</i>	
5.1.7	Intermolecular hydrogen atom abstraction from sulfur <i>no entries</i>	
5.1.8	Intermolecular reactions other than hydrogen atom abstraction . . . . .	48
5.1.8.1	Aminyl ( $R, R' = H$ ) . . . . .	48
5.1.8.2	Acyclic dialkylaminyls ( $R, R' = \text{alkyl}$ ) <i>no entries</i>	
5.1.8.3	Cyclic aminyls ( $R, R'$ and N form a ring) . . . . .	48
5.1.8.4	Monoarylaminyls ( $R = \text{aryl}, R' = H$ ) . . . . .	50
5.1.8.5	Acyclic diarylaminyl ( $R, R' = \text{aryl}$ ) . . . . .	51
5.1.8.6	Pyridinyl and related radicals . . . . .	51
5.1.8.7	Borylaminyls . . . . .	53
 5.2	 Aminium radicals, $RR'R''N^+$ . . . . .	59
5.2.1	Bimolecular self-reactions and radical-dimer equilibria . . . . .	59
5.2.1.1	Acyclic dialkylaminiums ( $R, R' = \text{alkyl}, R'' = H$ ) . . . . .	59
5.2.1.1.1	Acyclic primary and secondary arylaminiums ( $R = \text{aryl}, R', R'' = H$ and $R, R' = \text{aryl}, R'' = H$ ) . . . . .	59
5.2.1.2	Secondary and tertiary cyclic aminiums ( $R, R'$ and N form a ring) . . . . .	60
5.2.1.3	Acyclic trialkylaminiums ( $R, R', R'' = \text{alkyl}$ ) . . . . .	61
5.2.1.3.1	Acyclic dialkylarylaminiums ( $R, R' = \text{alkyl}, R'' = \text{aryl}$ ) . . . . .	61
5.2.1.4	Acyclic triaryl aminiums ( $R, R', R'' = \text{aryl}$ ) . . . . .	62
5.2.1.5	Bipyridiniums (viologens) . . . . .	64
5.2.2	Reactions with a different radical . . . . .	65
5.2.2.1	Tertiary cyclic aminiums ( $R, R'$ and N form a ring, $R' = \text{alkyl}$ ) . . . . .	65
5.2.2.2	Monoarylaminiums ( $R = \text{aryl}, R', R'' = H$ ) <i>no entries</i>	
5.2.2.3	Secondary and tertiary alkylaminiums ( $R, R' = \text{alkyl}, R'' = \text{alkyl or } H$ ) . . . . .	66
5.2.2.4	Diazabicyclododecane cations . . . . .	66
5.2.2.5	Bipyridiniums (viologens) . . . . .	68
5.2.3	Unimolecular reactions . . . . .	68
5.2.3.1	Aminium ( $R, R', R'' = H$ ) <i>no entries</i>	
5.2.3.2	Monoalkylaminiums ( $R = \text{alkyl}, R', R'' = H$ ) <i>no entries</i>	
5.2.3.3	Acyclic dialkylaminiums ( $R, R' = \text{alkyl}, R'' = H$ ) . . . . .	68
5.2.3.4	Secondary cyclic aminiums ( $R, R'$ and N form a ring, $R'' = H$ ) . . . . .	70
5.2.3.5	Acyclic trialkylaminiums ( $R, R', R'' = \text{alkyl}$ ) . . . . .	70
5.2.3.6	Tertiary cyclic aminiums ( $R, R'$ and N form a ring, $R'' = \text{alkyl}$ ) . . . . .	71
5.2.4	Intermolecular hydrogen-atom abstractions . . . . .	72
5.2.4.1	Aminium <i>no entries</i>	
5.2.4.2	Monoalkylaminiums <i>no entries</i>	
5.2.4.3	Acyclic dialkylaminiums ( $R, R' = \text{alkyl}, R'' = H$ ) . . . . .	72
5.2.5	Intermolecular reactions other than hydrogen-atom abstraction . . . . .	73
5.2.5.1	Proton transfer reactions . . . . .	73
5.2.5.1.1	Acyclic primary and secondary aminiums ( $R = \text{alkyl or aryl}, R', R'' = H$ or $\text{alkyl}$ ) . . . . .	73
5.2.5.1.2	Secondary cyclic aminiums ( $R, R'$ and N form a ring, $R'' = H$ ) . . . . .	75
5.2.5.1.3	Acyclic trialkylaminiums ( $R, R', R'' = \text{alkyl}$ ) . . . . .	82
5.2.5.1.4	Acyclic diarylaminiums ( $R, R' = \text{aryl}, R'' = H$ ) . . . . .	85
5.2.5.1.5	Acyclic tertiary aminiums ( $R, R' = \text{aryl or alkyl}, R'' = \text{alkyl}$ ) . . . . .	86
5.2.5.1.6	Cyclic tertiary aminiums ( $R, R'$ and N form a ring, $R'' = \text{alkyl}$ ) . . . . .	89
5.2.5.1.7	Flavin radical cations . . . . .	90
5.2.5.1.8	Bipyridiniums (viologens) . . . . .	91
5.2.5.2	Electron transfer reactions . . . . .	92
5.2.5.2.1	Acyclic tertiary alkylaminiums ( $R, R', R'' = \text{alkyl}$ ) . . . . .	92
5.2.5.2.2	Cyclic tertiary alkylaminiums ( $R, R'$ and N form a ring, $R'' = \text{alkyl}$ ) . . . . .	93
5.2.5.2.3	Acyclic primary arylaminiums ( $R = \text{aryl}, R', R'' = H$ ) . . . . .	93
5.2.5.2.4	Acyclic secondary arylaminiums ( $R, R' = \text{aryl}, R'' = H$ ) . . . . .	93
5.2.5.2.5	Cyclic secondary aminiums ( $R, R'$ and N form a ring, $R'' = H$ ) . . . . .	94
5.2.5.2.6	Acyclic tertiary aminiums ( $R, R', R'' = \text{alkyl or aryl}$ ) . . . . .	94

5.2.5.2.7	Cyclic tertiary aminiums (R, R' and N form a ring, R'' = alkyl) . . . . .	100
5.2.5.2.8	Adenine, pyrazine and related cations . . . . .	100
5.2.5.2.9	Bipyridiniums (viologens) . . . . .	102
5.2.5.2.9.1	Methylviologens . . . . .	102
5.2.5.2.9.2	Benzylviologens and other 4,4'-bipyridiniums . . . . .	106
5.2.5.2.9.3	Bridged 2,2'-bipyridiniums . . . . .	113
5.2.5.2.9.4	Bis-(4,4'-bipyridiniums) . . . . .	117
5.2.5.3	Other intermolecular reactions . . . . .	120
5.2.5.3.1	Acyclic tertiary aminiums (R, R' = alkyl, R'' = thioalkyl) . . . . .	120
5.2.5.3.2	Bipyridiniums (viologens) . . . . .	120
 5.3	 Carboxamidyl radicals, RR'CON <sup>·</sup> . . . . .	120
5.3.1	Bimolecular self-reactions . . . . .	120
5.3.2	Intramolecular hydrogen atom abstractions . . . . .	121
5.3.3	Intramolecular additions to a multiple bond . . . . .	122
5.3.4	Other unimolecular reactions . . . . .	123
5.3.5	Intermolecular hydrogen atom abstractions . . . . .	124
5.3.6	Intermolecular reactions other than hydrogen-atom abstraction . . . . .	125
 5.4	 Sulfinamidyl radicals, RR'SON <sup>·</sup> , and sulfonamidyl radicals, RR'SO <sub>2</sub> N <sup>·</sup> . . . . .	127
5.4.1	Bimolecular self-reactions . . . . .	127
5.4.2	Unimolecular reactions . . . . .	128
 5.5	 Imidyl radicals, RCOR'CON <sup>·</sup> . . . . .	129
5.5.1	Unimolecular reactions . . . . .	129
5.5.1.1	Ring scission reactions . . . . .	129
5.5.1.2	Intramolecular hydrogen-atom abstractions . . . . .	132
5.5.2	Intermolecular hydrogen-atom abstractions from carbon . . . . .	132
5.5.2.1	Succinimidyl radicals . . . . .	132
5.5.2.2	Other imidyl radicals . . . . .	136
5.5.3	Intermolecular hydrogen-atom abstraction from carbon vs. intermolecular additions to multiple bonds (relative) . . . . .	138
5.5.4	Intermolecular additions to C-C multiple bonds . . . . .	140
 5.6	 Iminyl radicals, RR'C=N <sup>·</sup> , and isocyanatyl radicals, O=C=N <sup>·</sup> . . . . .	142
5.6.1	Bimolecular self-reactions . . . . .	142
5.6.2	Unimolecular reactions . . . . .	142
5.6.3	Intermolecular hydrogen-atom abstraction from carbon . . . . .	143
 5.7	 Alkoxyaminyl radicals, RR'ON <sup>·</sup> and ROR'ON <sup>·</sup> . . . . .	144
5.7.1	Bimolecular self-reactions, radical-dimer equilibria and reactions with other radicals . . . . .	144
5.7.2	Unimolecular reactions <i>no entries</i>	
5.7.3	Intermolecular hydrogen-atom abstraction from oxygen <i>no entries</i>	
5.7.4	Other intermolecular reactions . . . . .	146
 5.8	 Thioaminyl radicals, RR'SN <sup>·</sup> . . . . .	146
5.8.1	Bimolecular self-reactions and radical-dimer equilibria . . . . .	146
5.8.1.1	Arylthioalkylaminyls (R = alkyl, R' = aryl) . . . . .	146
5.8.1.2	Alkylthioarylaminyls (R = aryl, R' = alkyl) <i>no entries</i>	
5.8.1.3	Arylthioarylaminyls (R, R' = aryl) <i>no entries</i>	
5.8.1.4	Thiodiazaallyls and thiatriazapentadienyls . . . . .	149
5.8.2	Unimolecular reactions . . . . .	151

5.8.2.1	Alkylthioalkylaminyls ( $R, R' = \text{alkyl}$ ) . . . . .	151
5.8.2.2	Aminothiylalkylaminyls ( $R = \text{alkyl}$ , leadig atom of $R' = \text{N}$ ) <i>no entries</i>	
5.8.2.3	Arylthioalkylaminyls ( $R = \text{alkyl}$ , $R' = \text{aryl}$ ) . . . . .	152
5.8.2.4	Arylthioarylaminyls ( $R, R' = \text{aryl}$ ) . . . . .	153
5.8.2.5	Thiodiazaallyls . . . . .	154
5.9	Dithioaminal radicals, $RSR'SN'$ . . . . .	155
5.9.1	Bimolecular self-reactions and radical-dimer equilibria . . . . .	155
5.9.1.0	Bis(trifluoromethylthio)aminyls ( $R, R' = CF_3$ ) . . . . .	155
5.9.1.1	Cyclic dithioaminalys ( $RS, R'S$ and N form a ring) . . . . .	155
5.9.2	Intermolecular reactions with molecules . . . . .	157
5.10	Hydrazyl radicals, $R'R'NN'R$ . . . . .	158
5.10.1	Bimolecular self-reactions and radical-dimer equilibria . . . . .	158
5.10.2	Reactions with a different radical . . . . .	158
5.10.3	Unimolecular reactions . . . . .	159
5.10.3.1	Cyclic trialkylhydrazyls ( $R = \text{alkyl}$ , $R', R''$ and the N to which they are attached form a ring) <i>no entries</i>	
5.10.3.2	Cyclic trialkyl hydrazyls ( $R, R', N$ and N form a ring, $R'' = \text{alkyl}$ ) . . . . .	159
5.10.3.3	Tri-substituted hydrazyls with leading atom of R and/or $R', R''$ a heteroatom <i>no entries</i>	
5.10.3.4	Acyclic triarylhydrazyls ( $R, R', R'' = \text{aryl}$ ) <i>no entries</i>	
5.10.3.5	Diarylcaroylhydrazyls ( $R = \text{aroyl}$ , $R', R'' = \text{aryl}$ ) . . . . .	160
5.10.4...		
5.10.10	Various reactions involving DPPH <i>no entries</i>	
5.10.11	Intermolecular proton transfers . . . . .	160
5.10.12	Intermolecular electron transfers . . . . .	161
5.10.13	Other intermolecular reactions . . . . .	163
5.11	Hydrazyl radical cations, $(R'R'NNR_2)_2^{+}$ and related species . . . . .	164
5.11.1	Bimolecular self-reactions . . . . .	164
5.11.2	Reactions with a different radical <i>no entries</i>	
5.11.3	Unimolecular reactions <i>no entries</i>	
5.11.4	Intermolecular self-reactions . . . . .	164
5.12	Verdazyl and related radicals . . . . .	167
5.12.1	Bimolecular self-reactions . . . . .	167
5.12.2	Reactions with a different radical <i>no entries</i>	
5.12.3	Intermolecular reactions with molecules . . . . .	168
5.12.3.1	Hydrogen-atom abstractions from carbon . . . . .	168
5.12.3.2	Hydrogen-atom abstractions from nitrogen . . . . .	172
5.12.3.3	Hydrogen-atom abstractions from oxygen . . . . .	177
5.12.3.4	Hydrogen-atom abstractions from sulfur . . . . .	184
5.12.3.5	Other intermolecular reactions . . . . .	186
5.13	Diazirinyl radicals, $\overbrace{RC=N-N}^{\cdot} \cdot$ <i>no entries</i>	
5.14	Diazenyl radicals, $RN=N^{\cdot}$ . . . . .	202
5.14.1	Bimolecular self-reactions and reactions with a different radical . . . . .	202
5.14.2	Unimolecular reactions . . . . .	207
5.14.2.1	Alkyldiazenyls ( $R = \text{alkyl}$ , including cumyl) . . . . .	207
5.14.2.2	Aryldiazenyls ( $R = \text{aryl}$ ) . . . . .	208
5.14.3	Other reactions . . . . .	213

5.15	Azidyl radical, $\text{N}_3^\bullet$ . . . . .	214
5.15.1	Bimolecular self-reactions . . . . .	214
5.15.2	Other reactions . . . . .	214
5.16	Triazenyl radicals ( $\text{R}_2\text{N}_3^\bullet$ ) and azallyl radicals ( $\text{RN}^\bullet\text{C}=\text{C}$ ) . . . . .	224
5.17	Radical ions . . . . .	224
5.17.1	Bimolecular self-reactions . . . . .	224
5.17.2	Reactions with a different radical . . . . .	225
5.17.3	Unimolecular reactions . . . . .	226
5.17.3.1	Diazo radical anions, $\text{R}_2\text{CN}_2^\bullet$ . . . . .	226
5.17.3.2	Diazo radical cations, $\text{R}_2\text{CN}_2^{+\bullet}$ . . . . .	227
5.17.3.3	Other radical anions . . . . .	228
5.17.3.4	Other radical cations . . . . .	229
5.17.4	Intermolecular reactions . . . . .	229
5.17.4.1	Diazo radical anions, $\text{R}_2\text{CN}_2^{-\bullet}$ . . . . .	229
5.17.4.2	Quinoxaline radical anions . . . . .	230
5.17.4.3	Benzonitrile radical anions, $\text{ArCN}^{-\bullet}$ , and related species . . . . .	231
5.17.4.4	Nitroaromatic radical anions, $\text{ArNO}_2^{-\bullet}$ . . . . .	233
5.17.4.5	Other radical anions . . . . .	234
5.18	Dithiadiazolyl radicals and related cyclic polyaza radicals and radical cations . . . . .	235
5.18.1	Bimolecular self-reactions and radical-dimer equilibria . . . . .	235
5.18.1.1	Dithiadiazolyl radicals . . . . .	235
5.18.1.2	Other cyclic polyaza radicals and radical cations . . . . .	236
5.18.2	Unimolecular reactions . . . . .	237
5.18.2.1	Dithiadiazolyl radicals . . . . .	237
5.18.2.2	Other cyclic polyaza radicals . . . . .	238
5.18.3	Intermolecular reactions with molecules . . . . .	239

## 6 Aminyl and related radicals (K.U. Ingold, J.C. Walton)

6.0	Introduction . . . . .	251
6.1	Aminoxyl radicals, $\text{RR}'\text{NO}^\bullet$ . . . . .	253
6.1.1	Bimolecular self- reactions and radical-dimer equilibria . . . . .	253
6.1.1.1	Monoalkylaminoxyls ( $\text{R} = \text{alkyl}$ , $\text{R}' = \text{H}$ ) <i>no entries</i>	
6.1.1.2	Acyclic dialkylaminoxyls ( $\text{R}, \text{R}' = \text{alkyl}$ ) <i>no entries</i>	
6.1.1.3	Cyclic aminoxyls ( $\text{R}, \text{R}'$ and N form a ring) . . . . .	253
6.1.1.4	Monoarylaminoxyls ( $\text{R} = \text{aryl}$ , $\text{R}' = \text{H}$ or $e^-$ ) <i>no entries</i>	
6.1.1.5	Acyclic alkarylaminoxyls ( $\text{R} = \text{alkyl}$ , $\text{R}' = \text{aryl}$ ) . . . . .	255
6.1.1.6	Acyclic diarylaminoxyls ( $\text{R}, \text{R}' = \text{aryl}$ ) <i>no entries</i>	
6.1.1.7	Acyclic acylaminoxyls ( $\text{R} = \text{acyl}$ , $\text{R}' = \text{alkyl or aryl}$ ) . . . . .	255

6.1.1.8	Nitro radical anions ( $R = O^-$ , $R' =$ aryl or heterocyclic ring), their conjugate acids, i.e., hydroxy aminoxyls ( $R = OH$ , $R' =$ aryl or heterocyclic ring), and related species . . . . .	256
6.1.2	Reactions with a different radical . . . . .	276
6.1.2.1	Acyclic dialkylaminoxyls ( $R, R' =$ alkyl) . . . . .	276
6.1.2.1.1	With carbon-centered radicals . . . . .	276
6.1.2.1.1.1	Alkyl and acyl radicals . . . . .	276
6.1.2.1.1.2	Arylcarbonyl radicals, including ketyl radicals, ketyl radical anions, and other resonance-stabilized radicals . . . . .	278
6.1.2.1.3	Radicals in excited states . . . . .	280
6.1.2.1.4	Biradicals . . . . .	281
6.1.2.1.2	With heteroatom-centered radicals . . . . .	282
6.1.2.2	Cyclic and bicyclic aminoxyls ( $R, R'$ and N form one or two rings) . . . . .	284
6.1.2.2.1	With carbon-centered radicals . . . . .	284
6.1.2.2.1.1	Alkyl and acyl radicals . . . . .	284
6.1.2.2.1.2	Arylcarbonyl radicals, including ketyl radicals, ketyl radical anions, and other resonance-stabilized radicals . . . . .	314
6.1.2.2.1.3	Radicals in excited states . . . . .	336
6.1.2.2.1.4	Biradicals . . . . .	336
6.1.2.2.1.5	Carbenes . . . . .	337
6.1.2.2.1.6	Radicals of ill-defined structure . . . . .	338
6.1.2.2.2	With organic radical ions or zwitterions . . . . .	345
6.1.2.2.3	With solvated electron ( $e_{aq}^-$ ) <i>no entries</i>	
6.1.2.2.4	With hydrogen atoms <i>no entries</i>	
6.1.2.2.5	With hydroxyl radicals of $O^-$ <i>no entries</i>	
6.1.2.2.6	With inorganic radical anions . . . . .	347
6.1.2.2.7	With heteroatom-centered radicals . . . . .	350
6.1.2.3	Acyclic alkarylaminoxyls ( $R =$ alkyl, $R' =$ aryl) . . . . .	358
6.1.2.3.1	With carbon-centered radicals . . . . .	358
6.1.2.4	Acyclic diarylaminoxyls ( $R, R' =$ aryl) . . . . .	359
6.1.2.4.1	With carbon-centered radicals <i>no entries</i>	
6.1.2.4.2	With heteroatom-centered radicals . . . . .	359
6.1.2.5	Nitro radical anions and their conjugate acids, i.e., hydroxyaminoxyls . . . . .	359
6.1.2.5.1	Radical anions with cyclic aminoxy radical . . . . .	359
6.1.2.5.2	Radical anions with hydroxyaminoxyls . . . . .	361
6.1.2.5.3	Hydroxyaminoxyls with protonated hydroxyaminoxyls . . . . .	364
6.1.2.6	Nitrogen oxides ( $NO^\bullet$ , $NO_2^\bullet$ , and $NO_3^\bullet$ ) . . . . .	366
6.1.2.6.1	With aminoxy radical . . . . .	366
6.1.3	Unimolecular reactions (including reactions of aminoxyls in electronically excited states) . . . . .	368
6.1.3.1	Acyclic dialkylaminoxyls ( $R, R' =$ alkyl) . . . . .	368
6.1.3.2	Cyclic aminoxyls ( $R, R'$ and N form a ring) . . . . .	370
6.1.3.3	Acyclic acylaminoxyls ( $R =$ alkyl, $R' =$ aroyl or acyl) . . . . .	376
6.1.3.4	Acyclic alkoxyalkaminoxyls and alkoxyarylaminoxyls ( $R =$ alkyl or aryl, $R' =$ alkoxy, siloxy or stannoxy) . . . . .	378
6.1.3.5	Nitroaryl radical anions ( $R = O^-$ , $R' =$ aryl) and hydroxyarylaminoxyls ( $R = OH$ , $R' =$ aryl) . . . . .	390
6.1.3.6	Nitroalkyl radical anions ( $R = O^-$ , $R' =$ alkyl) and hydroxyalkaminoxyls ( $R = OH$ , $R' =$ alkyl) . . . . .	393
6.1.4	Intermolecular hydrogen-atom abstractions from carbon (including reactions of aminoxyls in electronically excited states) . . . . .	400
6.1.4.1	Acyclic dialkylaminoxyls ( $R, R' =$ alkyl, including $CF_3$ ) . . . . .	400
6.2.4.2	Cyclic aminoxyls ( $R, R'$ and N form a ring) . . . . .	406
6.1.4.3	Acyclic diarylaminoxyls ( $R, R' =$ aryl) . . . . .	412

6.1.4.4	Acyclic aroylaminoxyls ( $R = \text{aroyl}$ , $R' = \text{alkyl or aryl}$ ) <i>no entries</i>	
6.1.4.5	Nitrogen oxides ( $\text{NO}_2^\bullet$ and $\text{NO}_3^\bullet$ ) . . . . .	412
6.1.5	Intermolecular hydrogen-atom abstractions from oxygen . . . . .	422
6.1.5.1	Acyclic dialkylaminoxyls ( $R, R' = \text{alkyl}$ , including $\text{CF}_3$ ) . . . . .	422
6.1.5.1.1	Abstraction from phenols . . . . .	422
6.1.5.1.2	Abstraction from ascorbate anion . . . . .	423
6.1.5.1.3	Abstraction from ascorbate anion by aminoxy radical/cyclodextrin inclusion complex . . . . .	425
6.1.5.2	Cyclic aminoxy radicals ( $R, R'$ and N form a ring) . . . . .	426
6.1.5.2.1	Abstraction from a hydroxylamine . . . . .	426
6.1.5.2.2	Abstraction from a hydroxamic acid . . . . .	437
6.1.5.2.3	Abstraction from ascorbate anion . . . . .	439
6.1.5.2.4	Abstraction from ascorbate anion by aminoxy radical/cyclodextrin inclusion complex . . . . .	474
6.1.5.2.5	Abstraction from phenols and other OH-containing molecules . . . . .	475
6.1.5.3	Acyclic alkarylmonoxyls ( $R = \text{alkyl}$ , $R' = \text{aryl}$ ) <i>no entries</i>	
6.1.5.4	Acyclic diarylaminoxyls ( $R, R' = \text{aryl}$ ) <i>no entries</i>	
6.1.5.5	Nitrogen oxides ( $\text{NO}^\bullet$ , $\text{NO}_2^\bullet$ and $\text{NO}_3^\bullet$ ) . . . . .	477
6.1.6	Intermolecular hydrogen-atom abstractions from nitrogen . . . . .	477
6.1.6.1	Acyclic dialkylaminoxyls ( $R, R' = \text{alkyl}$ , including $\text{CF}_3$ ) . . . . .	477
6.1.6.2	Cyclic aminoxy radicals ( $R, R'$ and N form a ring) . . . . .	478
6.1.6.3	Acyclic diarylaminoxyls ( $R, R' = \text{aryl}$ ) . . . . .	500
6.1.7	Intermolecular reactions with molecules in excited states . . . . .	500
6.1.7.1	Acyclic dialkylaminoxyls ( $R, R' = \text{alkyl}$ ) . . . . .	500
6.1.7.2	Cyclic aminoxy radicals ( $R, R'$ and N form a ring) . . . . .	503
6.1.7.3	Aminoxy biradicals . . . . .	510
6.1.8	Other intermolecular reactions . . . . .	519
6.1.8.1	Acyclic dialkylaminoxyls ( $R, R' = \text{alkyl}$ , including $\text{CF}_3$ ) . . . . .	519
6.1.8.1.1	Hydrogen-atom abstraction . . . . .	519
6.1.8.1.2	Addition to a multiple bond . . . . .	520
6.1.8.1.3	Formation of an inclusion complex . . . . .	522
6.1.8.1.4	Electron transfer . . . . .	525
6.1.8.2	Cyclic aminoxy radicals ( $R, R'$ and N form a ring) . . . . .	526
6.1.8.2.1	Hydrogen-atom abstraction . . . . .	526
