Semiconductors

Subvolume i: Special systems and topics

A. Special systems (edited by O.MADELUNG)	1
11 Amorphous semiconductors (W. FUHS)	1
11.0 Lists of frequently used symbols and abbreviations	1
11.1 Silicon (a-Si)	3
11.1.1 Structural characterization	3
11.1.2 Defect states, characterization	6
11.1.3 Vibrational properties	7
11.1.4 Density of states	9
11.1.5 Absorption edge and optical spectra	9
11.1.6 Photoluminescence	10
11.1.7 Magnetic properties	10
11.1.8 Transport properties	11
11.1.8.1 Electrical conductivity	11
11.1.8.2 Drift mobility	12
11.1.8.3 Density of localized gap states	12
11.1.8.4 Hall mobility and magnetoresistance	13
11.1.8.5 Photoconductivity	13
11.2 Germanium (a-Ge)	13
11.2.1 Structural characterization	14
11.2.2 Defect states, characterization	16
11.2.3 Vibrational properties	17
11.2.4 Density of states	17
11.2.5 Absorption edge and optical spectra	18
11.2.6 Photoluminescence	18
11.2.7 Magnetic properties	19
11.2.8 Transport properties	19
11.2.8.1 Electrical conductivity	19
11.2.8.2 Density of localized gap states and drift mobility	19
11.2.8.3 Hall mobility and magnetoresistance	20
11.2.8.4 Photoconductivity	20
11.3 III-V compounds	20
11.3.1 Structural characterization	20
11.3.2 Vibrational properties	21
11.3.3 Density of states	22
11.3.4 Optical properties	22
11.3.5 Transport properties	23
Figures for 11	24
References for 11	92
12 Organic semiconductors (N. KARL)	106
12.0 Introduction	106
12.0.1 General remarks	106
12.0.2 Symbols, definitions and abbreviations	108

12.1	Photoconductive wide band gap organic semiconductors	112
12.1.1	Anthracene, C ₁₄ H ₁₀	112
12.1.2	Anthracene: PMDA, C ₁₄ H ₁₀ :C ₁₀ H ₂ O ₆	119
12.1.3	Benzene, C ₆ H ₆	120
12.1.4	Biphenyl, C ₁₂ H ₁₀	121
12.1.5	Dibenzothiophene, C ₁₂ H ₈ S	122
12.1.6	1,4-Dibromonaphthalene, C ₁₀ H ₆ Br ₂	123
12.1.7	9,10-Dichloroanthracene, C ₁₄ H ₈ Cl ₂ , α -form	124
12.1.8	1,4-Diiodobenzene, C ₆ H ₄ I ₂	125
12.1.9	Durene, C ₁₀ H ₁₄	126
12.1.10	Iodoform, CHI ₃	126
12.1.11	9-Methylanthracene, C ₁₅ H ₁₂	127
12.1.12	Naphthalene, C ₁₀ H ₈	128
12.1.13	Perylene, C ₂₀ H ₁₂ , α -form	131
12.1.14	Phenazine, C ₁₂ H ₈ N ₂ , α -form	134
12.1.15	Phenothiazine, C ₁₂ H ₉ NS	135
12.1.16	Phthalocyanine, C ₃₂ H ₁₈ N ₈ , β -form	136
12.1.17	Pyrene, C ₁₆ H ₁₀	137
12.1.18	<i>trans</i> -Stilbene, C ₁₄ H ₁₂	139
12.1.19	<i>p</i> -Terphenyl, C ₁₈ H ₁₄	138
12.1.20	Tetracene, C ₁₈ H ₁₂	141
12.1.21	Tetracyanoethylene, TCNE, C ₆ N ₄	143
12.1.22	7,7,8,8-Tetracyanoquinodimethane, TCNQ, C ₁₂ H ₄ N ₄	143
12.2	Dark-conductive narrow band gap organic semiconductors	144
12.2.1	(TMTSF) ₂ :PF ₆ , (Tetramethyltetraselenafulvalene) ₂ :hexafluorophosphate, (C ₁₀ H ₁₂ Se ₄) ₂ :PF ₆	144
12.2.2	(Perylene) ₂ :(PF ₆) _{1.1} × 0.8 (CH ₂ Cl ₂), C ₄₀ H ₂₄ :(PF ₆) _{1.1} × 0.8 (CH ₂ Cl ₂)	145
12.2.3	(TTT) ₂ :I ₃ , (Tetrathiatetracene) ₂ :I ₃ , (C ₁₈ H ₈ S ₄) ₂ :I ₃	146
12.2.4	TTF:Br _{0.7} , Tetrathiafulvalene:bromine, C ₆ H ₄ S ₄ :Br _{0.7}	146
12.2.5	K:TCNQ, Potassium:tetracyanoquinodimethane, K:C ₁₂ H ₄ N ₄	147
12.2.6	TTF:TCNQ, Tetrathiafulvalene:tetracyanoquinodimethane, C ₆ H ₄ S ₄ :C ₁₂ H ₄ N ₄	148
12.2.7	TTF:chloranil, Tetrathiafulvalene:tetrachloro- <i>p</i> -benzoquinone, C ₆ H ₄ S ₄ :C ₆ Cl ₄ O ₂	150
12.3	Comparative representation of some general properties of selected compounds	151
12.3.1	Molecular photoelectron spectra	151
12.3.2	Electronic radical ion transitions	152
12.3.3	Solid state photoelectron emission yield curves	154
12.3.4	Solid state photoelectron spectra	154
12.3.5	Energetic comparison of gas phase and solid state photoelectron spectra; polarization energies	155
12.3.6	Molecular electron affinities	157
12.3.7	Crystal electron affinity	158
12.3.8	Band energy scheme of the acene class of organic photoconductors	158
12.3.9	Excitonic absorption spectra	158
Figures for 12		159
References for 12		206
B. Special topics (edited by M. SCHULZ)		219
13	Space charge layers at surfaces and interfaces (I. EISELE)	219
13.0	List of symbols	219
13.1	General remarks	220
13.1.1	Space charge layers	220
13.1.2	Concentration of charge carriers in space charge layers	221
13.1.3	Energy band structure and charge carrier distribution	221
13.1.4	Effect of high magnetic fields	222
13.1.5	Electronic transport properties	222

Table of contents

13.2	Experimental methods	223
13.2.1	Capacitance and conductance measurements	223
13.2.2	Transport measurements	223
13.3	Surface data for various semiconductor layers	223
13.3.1	Silicon (Si)	223
13.3.1.1	Electron inversion and accumulation layers on Si	224
13.3.1.2	Hole inversion and accumulation layers on Si	225
13.3.1.3	Space charge layers on epitaxially grown Si	225
13.3.2	Germanium (Ge)	226
13.3.3	Gallium arsenide (GaAs)	226
13.3.4	Indium antimonide (InSb)	227
13.3.5	Indium arsenide (InAs)	227
13.3.6	Zinc oxide (ZnO)	227
13.3.7	Tellurium (Te)	227
13.3.8	Other semiconductors	227
	Figures for 13	228
	References for 13	254
14	Hot electrons (H. KAHLERT)	256
14.0	Introduction	256
14.0.1	General remarks	256
14.0.2	Explanations for the graphs	256
14.0.3	List of symbols	256
14.1	Carrier heating by electronic fields	258
14.1.1	Conductivity in the warm carrier range	258
14.1.2	Conductivity and current density in the hot carrier range	258
14.1.3	Conductivity anisotropy	258
14.1.4	Frequency dependence of warm carrier parameters	259
14.1.5	Electric field dependence of the carrier mobility	259
14.1.6	Drift velocity	259
14.1.7	Noise and diffusion of hot carriers	260
14.1.8	Thermoelectric power of hot carriers	260
14.1.9	Hot carrier Hall effect	260
14.1.10	Hot carrier magnetoresistance	261
14.1.11	Hot carrier effects in quantizing magnetic fields	261
14.1.12	Hot carrier effects in quantizing electric fields	261
14.1.13	Impurity breakdown	261
14.1.14	Avalanche breakdown across the energy gap	262
14.1.15	Carrier temperatures	262
14.1.16	Energy relaxation times	262
14.1.17	Electric field-induced changes of optical absorption	263
14.1.18	Hot carrier Faraday effects	263
14.1.19	Hot electrons in insulators	263
	Figures for 14	264
	References for 14	293
15	Electron-hole liquids (D. BIMBERG)	297
15.0	Introduction	297
15.0.1	General remarks	297
15.0.2	Frequently used abbreviations and symbols	298
15.1	Electron-hole liquid binding energy	299
15.2	Equilibrium density n_0	300
15.3	Critical temperature T_c	301
15.4	Critical density n_c	301
15.5	Lifetime τ of the EHL	302

15.6 Effect of surface tension	303
15.7 Charge on drops and dipole layer at surface	304
15.8 Size of EHL drops	304
15.9 Renormalization of electron and hole masses	304
15.10 EHL in doped semiconductors	305
15.11 γ -drops	305
Figures for 15	305
