

Table of contents

Superconductors

Transition temperatures and characterization of elements, alloys and compounds

Subvolume b1: Nb, Nb – Ar ... Nb – Ge

Introduction	X
1 Subject matter	X
2 General remarks on the contents of subvolumes III/21a ... 21e	X
3 Selection, arrangement and sequence of the specific data in the tables	X
4 List of symbols and abbreviations	XVII
5 Alphabetical list of frequently used structure types	XXII

Nb	S.Y. Hariharan
Nb – Al	R. Flükiger
Nb – Au, Nb – Ga, Nb – Pt	H.L. Luo
Nb – C, Nb – N	R. Küntzler
Nb – Ge	F. Weiss
Nb – Sn	J.Q. Xu
Ni ... Np	T. Wolf
Other alloys and compounds	R. Flükiger, S.Y. Hariharan, R. Küntzler, H.L. Luo, F. Weiss, T. Wolf, J.Q. Xu

Nb (Niobium)	1
Nb element, bulk	1
– transition temperatures only	1
– specific heat data	2
– critical field data	5
– other physical properties	21
Nb element, under pressure	36
Nb films, deposited at > 77K	38
– transition temperatures only	38
– critical field data	39
– other physical properties	42
Nb films, deposited at ≤ 77K	52
Nb granular films	53
Nb/X junctions	54
Nb/X multilayers, superlattices	65
Nb wires	73
NbX dilute alloys	77
Nb, implanted	83

Nb based alloys and compounds	85
Nb – Al, bulk	85
Nb ₃ Al (Cr ₃ Si phase), bulk	86
– transition temperatures only	86
– specific heat data	89
– critical field data	91
– other physical properties	92
Nb ₃ Al (Cr ₃ Si phase), under pressure	97
Nb ₃ Al (Cr ₃ Si phase), films, deposited at > 77K	98
– transition temperatures only	98
Nb ₃ Al/insulator/X junctions	101
Nb ₃ Al (Cr ₃ Si phase), wires	102
– continuous filaments	102
– P/M methods	104
Nb ₂ Al (σ-CrFe phase), bulk	106
Nb – Al – X (Cr ₃ Si phase) compounds	106
– Nb ₃ Al _{1-x} Ga _x	107
– Nb ₃ Al _{1-x} Ge _x	107
– Nb ₃ Al _{1-x} Si _x	119
Nb – Al – X ternaries	123
Nb – Ar	123
Nb – As	124
Nb – Au (cubic W phase)	124
Nb ₃ Au (Cr ₃ Si phase), bulk	124
– transition temperatures only	124
– specific heat data	125
– critical field data	125
– other physical properties	125
Nb ₃ Au (Cr ₃ Si phase), bulk: under pressure	126
Nb ₃ Au (Cr ₃ Si phase), film	127
Nb ₃ Au (Cr ₃ Si phase), wire	127
Nb ₃ Au _{1-x} X _x (Cr ₃ Si phase): pseudobinaries	127
Nb _x Au _y (other phases)	129
Nb – B	129
Nb – Bi	129
NbC _x (NaCl phase), bulk	129
– transition temperatures only	129
– specific heat data	130
– critical field data	131
– other physical properties	131
NbC _x (NaCl phase), wires	133
NbC _x (NaCl phase), films	134
– critical field data	134
– other physical properties	134
Nb – C – X ternaries	135
NbC _{1-x} N _x (NaCl phase), bulk	137
NbC _{1-x} N _x (NaCl phase), films	137
NbC _{1-x} N _x (NaCl phase), fibers and wires	138
NbC _{1-x} X _x (NaCl phase)	138

Nb – Ce	140
Nb – Cr	140
Nb – Cu	141
Nb – D	142
Nb – Dy	142
Nb – Er	142
Nb – Eu	142
Nb – Fe	143
Nb ₃ Ga (Cr ₃ Si phase), bulk	143
– transition temperatures only	143
– specific heat data	144
– critical field data	144
– other physical properties	145
Nb ₃ Ga (Cr ₃ Si phase), under pressure	146
Nb ₃ Ga (Cr ₃ Si phase), films	146
Nb ₃ Ga _{1-x} X _x : pseudobinaries	147
Nb ₅ Ga ₃ (Mn ₅ Si ₃ phase)	150
Nb – Gd	151
Nb ₃ Ge (Cr ₃ Si phase), bulk	151
– transition temperatures only	151
– specific heat data	155
– critical field data	155
– other physical properties	155
Nb ₃ Ge (Cr ₃ Si phase), under pressure	157
Nb ₅ Ge ₃ (W ₅ Si ₃ phase)	158
Nb ₃ Ge (Cr ₃ Si phase), films	159
– transition temperatures only	159
– specific heat data	176
– critical field data	177
– other physical properties	183
Nb – Ge – X (Cr ₃ Si phase) compounds: pseudobinaries	206
Nb – Ge – X – Y (Cr ₃ Si phase) compounds	211
Nb ₃ Ge _{1-x} X _x (Cr ₃ Si phase), films: pseudobinaries	211
Nb – Ge, implanted	214
