

TABLE OF CONTENTS

FOREWORD	3
OPENING ADDRESS	7
CHAIRMEN OF SESSIONS	9
SESSION 1 : HISTORY OF THE OPERATION OF THE BR2 REACTOR	11
General outline of the operation and utilization of the BR2 reactor from 1969 to 1973	13
J.M. BAUGNET, K.J. BOBIN, J.M. GANDOLFO, H. LENDERS, F. LEONARD, R. VANHAELEWIJN	
SESSION 2 : GAS-COOLED REACTOR PROGRAMME	39
Coated particle irradiations at BR2 for the German HTR-fuel development	41
J. BAIER, H. MULLER, G. POTT	
Coated particle irradiations in the BR2 reactor	51
M. GAUBE	
GCFR-Fuel-element-irradiations in the GSB-He-Loop-Mol	63
<i>Introduction, Experimental facility</i>	63
H. EURINGER, S. KRAWCZYNISKI, W. KRUG, H. STECHMESSER, J. ZEUMANN, A. ZUMLOH	
<i>Test-element, operating conditions</i>	63
W. JUNG, K. KLEIN, M. PEEHS, P. RAU	
<i>Reactor physics studies</i>	63
J. DEBRUE, Ch. DE RAEDT, N. MAENE	
SESSION 3 : LIQUID METAL FAST REACTOR PROGRAMME	75
Between science and technology-results and reflections on the status of fuel element development for fast reactors	77
K. KARSTEN	
High temperature neutron-induced embrittlement of dispersion strengthened ferritic alloys	87
Ph. VAN ASBROECK, W. VANDERMEULEN, M. SNIJKERS, J.J. HUET	
Post-irradiation mechanical properties of BR2 irradiated cladding materials (Mol-1 and Mol-3)	99
H. BÖHM	
Irradiation programme and results concerning in-pile creep and stress-rupture strength behaviour of canning materials (Mol-2 and Mol-5)	107
D. CLOSS	

Evaluation of post-irradiation examination results on $\text{UO}_2\text{-PuO}_2$ fuel pins	113
W. DIENST	
The loop irradiation experiments Mol-7A and Mol-7B	121
W. KUMMERER	
Belgian irradiations of mixed oxide fuels for the SNR fast reactor programme in BR2	135
A. MICHEL	
Compatibility between oxide fuel and clad material	149
A. DELBRASSINE, W. HEBEL, P. DIRVEN, J.J. HUET	
Results from BR2 irradiations concerning fuel/clad compatibility	153
O. GÖTZMANN, H. KLEYKAMP	
In-pile fuel creep experiment (Mol-12) and mechanical interaction fuel/cladding experiment (Mol-10)	159
D. BRUCKLACHER	
The irradiation experiments Mol-8A and Mol-8B	167
P. WEIMAR	
Layout, control and survey of the irradiation experiment Mol-11	173
D. FREUND	
Irradiation of advanced fuels for the fast breeder project	177
W. VAN LIERDE	
SESSION 4 : WATER REACTOR PROGRAMME AND MISCELLANEOUS TOPICS	183
Assessment of the irradiation behaviour of Pu fuels for LWR's	185
H. BAIRIOT	
Irradiation of fuel with gadolinium as burnable poison	195
A. CHARLIER, Ch. DE RAEDT, L. LEENDERS	
Behaviour of uranium oxide fuel containing burnable poisons	211
A.J. FLIPOT, A. DELBRASSINE, R. GILISSEN	
Pom irradiations of the European institute for transuranium elements	219
M. CAMPANA, J. GABOLDE	
The irradiation of U(C,N) fuel in BR2 experiment	227
G. POTT, M. HERREN, A. NAOUMIDIS
