

## Volume 2

### Section J Radiation Sources and Processes

The experimental study of traveling wave amplifier using $v_p \times B$ effect <i>Sano, H., Xu, X., Nishida, Y. and Yugami, N.</i> .....	1074
Beam-plasma generator-amplifier <i>Alisov, A.F., Berezin, A.K., Borodkin, A.V., Lyapkalo, Yu.M., Onishchenko, I.N. and Fainberg, Ya.B.</i> .....	1078
Observation of mode transition in an HF discharge plasma sphere <i>Kawaguchi, M., Matsuoka, M. and Yoshida, M.</i> .....	1082
UHF and microwave radiation emitted by a resonator loaded by a low density plasma layer (PLR) <i>Cicconi, G. and Rosatelli, C.</i> .....	1086
Development of VUV light source used ECR plasma for simulation of ionosphere <i>Tsukabayashi, I., Sato, S. and Nakamura, Y.</i> .....	1090
Gas-puff Z-pinch plasmas driven by inductive energy storage pulsed power generator <i>Murayama, K., Shinkai, S., Katsuki, S. and Akiyama, H.</i> .....	1094
Experimental observations on radial dynamics of a gas-puff Z-pinch plasma <i>Takasugi, K., Moriyama, K., Shibuya, T. and Miyamoto, T.</i> .....	1098
XUV laser in small carbon fiber magnetic pinch <i>Kubeš, P. and Kravárik, J.</i> .....	1102
The structural, spectral and temporal properties of X-ray in regions $\lambda=3.4\text{nm}-4.6\text{nm}$ and $\lambda < 1.0\text{nm}$ emitted from the Ar gas-puff Z-pinch plasma <i>Kantsyrev, V.L., Takasugi, K., Tatsumi, K., Miyamoto, T. and Shlyaptseva, A.S.</i> .....	1106
A Novel method to create Z-pinch plasma by injecting fine particles <i>Furuya, S., Itagaki, D., Kaneko, D., Yasuoka, K. and Ishii, S.</i> .....	1110
K-shell radiation power and yield from double shell plasma liner implosions <i>Sorokin, S.A. and Chaikovsky, S.A.</i> .....	1114
Plasma density, temperature and size of single and double shell imploding liners <i>Chaikovsky, S.A. and Sorokin, S.A.</i> .....	1118

Plasma formation and its effects on electron beam pinching in a vircator diode <i>Yatsuzuka, M., Nakayama, M., Hashimoto, Y., Nobuhara, S., Young, D. and Ishihara, O.</i> .....	1122
Experimental results on speed-enhanced neutron yield from a small plasma focus <i>Serban, A. and Lee, S.</i> .....	1126
Enhanced soft X-ray emission from a small plasma focus operated in deuterium <i>Serban, A. and Lee, S.</i> .....	1130
Investigation of the HL-1M plasma quench using laser ablation of high-Z impurity <i>Zheng, Y.Z., Feng, X.Y., Guo, G.C., Yang, Q.W., Yang, J.W., Xu, D.M. and Qi, C.W.</i> .....	1134
Influence of the earth electrostatic field on sodium atoms emission from the D-ionosphere <i>Ivchenko, V.M., Malnev, V.M. and Martysh, Eu.V.</i> .....	1138
On the possible generation of cosmic rays and gamma-bursts in the plasma pinches <i>Trubnikov, B.A., Vlasov, V.P. and Zhdanov, S.K.</i> .....	1142
“Semi-relativistic” model of the cosmic ray generation in a plasma pinch <i>Trubnikov, B.A., Vlasov, V.P. and Zhdanov, S.K.</i> .....	1146
Solar-like cycles in the cataclysmic variables TT Ari, KR Aur, AM Her and MV Lyr <i>Kraicheva, Z., Stanishev, V., Spassovska, I. and Popov, V.</i> .....	1150
Development of a terahertz gyrotron (Gyrotron FU IV A) using a 17T superconducting magnet <i>Idehara, T., Shimizu, Y., Kurahashi, K., Yoshida, K., Nishida, N., Kanemaki, T., Ogawa, I., Tatsukawa, T., Okazaki, Y., Okamoto, T., Wagner, D., Gantenbein, G. and Thumm, M.</i> .....	1154
Plasma scattering measurement using a submillimeter wave gyrotron as a power source <i>Ogawa, I., Sakai, A., Idehara, T., Kawahata, K., Ejiri, A., Iguchi, H. and Kasperek, W.</i> .....	1158
CW operation and amplitude modulation of a submillimeter wave gyrotron (Gyrotron FU-IV) <i>Tatsukawa, T., Shibutani, K., Yoshida, K., Nishida, N., Ogawa, I. and Idehara, T.</i> ....	1162
<b>Section K Plasma Production and Confinement</b>	
Equilibrium and stability of high- $\beta$ plasmas in a minimum energy state <i>Steinhauer, L.C. and Ishida, A.</i> .....	1166
Confinement of plasma particles in an axisymmetric FRC <i>Tomita, Y., Takahashi, T. and Momota, H.</i> .....	1170
Dynamic of D <sup>3</sup> He fusion products in a field-reversed configuration <i>Shabrov, N.V.</i> .....	1174
Heating of FRC plasma by a magnetic pulse <i>Okada, S., Taniguchi, H., Sagimori, H., Himura, H., Hase, M., Yoshida, R., Okubo, M., Sugimoto, S. and Goto, S.</i> .....	1178
Axial adiabatic compression of FRC plasma <i>Okada, S., Ohnishi, M., Tomita, Y. and Momota, H.</i> .....	1182
Measurement of the energy distribution function of ions lost from FIX-FRC plasma <i>Okubo, M., Ozaki, A., Okada, S. and Goto, S.</i> .....	1186
Temperature profiles in a shock front in a translating FRC plasma <i>Himura, H., Ueoka, S., Hase, M., Yoshida, R., Okada, S. and Goto, S.</i> .....	1190
Motion of field-reversed configurations across magnetic fields <i>Himura, H., Wada, H., Okada, S., Kasuya, H., Sugimoto, S. and Goto, S.</i> .....	1194
Internal structure of a field-reversed configuration plasma <i>Urano, M., Takahashi, Y., Hagi, S., Suzuki, K., Takahashi, T. and Nogi, Y.</i> .....	1198
End-shortening effect on rotational instability of field-reversed configuration plasma <i>Ohkuma, Y., Takahashi, T. and Nogi, Y.</i> .....	1202
Compact torus acceleration and injection experiment <i>Fukumoto, N., Fujiwara, M., Nagata, M., Uyama, T., Oda, Y. and Azuma, K.</i> .....	1206
Helicity injection relaxation in spherical torus plasmas <i>Nagata, M., Fukumoto, N., Haruoka, M., Kano, S., Kuramoto, K. and Uyama, T.</i> .....	1210

Stability analysis of resistive interchange mode in an equilibrium of the RFP plasma <i>Chiyoda, K.</i> .....	1214
Effects of conducting wall on reversed field pinch plasma <i>Wang, A.K. and Qiu, X.M.</i> .....	1218
Boundary modification studies in a reversed-field pinch <i>Iida, M., Masamune, S., Awazu, M., Fujitsuka, K., Ohta, K. and Oshiyama, H.</i> .....	1222
Reversed field pinch (RFP) plasma equilibria with flow <i>Sugimoto, H., Ashida, H. and Kurasawa, T.</i> .....	1226
Soft X-ray tomography with semi-rigid rotation model <i>Irie, M., Umemeto, T., Sato, Y., Hattori, K. and Hayase, K.</i> .....	1230
The basic study on the low aspect ratio tokamak <i>Liu, L.L. and Qiu, L.J.</i> .....	1234
Flat, hollow and peaked profiles in axial and radial characteristics of an ECR multipolar plasma <i>Ciubotariu, C.I., Golovanivsky, K.S. and Bacal, M.</i> .....	1238
Position control of a small tokamak plasma <i>Sometani, T., Mizuno, Y., Muramatsu, H., Aoki, T. and Nakamura, M.</i> .....	1242
Full AC plasma current operation in the CSTN-AC tokamak <i>Hayashi, K., Marushita, Y., Tashiro, K., Ohno, N., Takamura, S., Mitarai, O., Sakurai, K., Satoh, T. and Kuwahara, T.</i> .....	1246
Closed divertor experiments on JFT-2M <i>Ogawa, H., Kawashima, H., Miura, Y., Sengoku, S. and The JFT-2M Group</i> .....	1250
HT-7 superconducting tokamak and its test operation <i>The HT-7 Group and He, Y.</i> .....	1254
Experimental Survey of HT-7 superconducting tokamak <i>The HT-7 Group, Meng, Y.D. and Li, Y.H.</i> .....	1258
Magnetic coordinates for systems with imperfect magnetic surfaces <i>Dewar, R.L. and Hudson, S.R.</i> .....	1262
H-1NF: Australian national fusion plasma research facility <i>Brackwell, B.D., Borg, G.G., Dewar, R.L., Howard, J., Gardner, H.J., Rudakov, D.L., Sharp, L.E., Shats, M.G. and Warr, G.B.</i> .....	1266
Symmetry relation for helical plasmas — parity symmetry <i>Watanabe, T. and Akao, H.</i> .....	1270
Plasma confinement studies on continuous and modular Heliotron systems <i>Yamazaki, K., Watanabe, K.Y., Amano, T., Motojima, O. and Fujiwara, M.</i> .....	1274
Remarks on comparison of local diffusion coefficients and finite- $\beta$ effect for different 3-D equilibria <i>Yamada, H., Watanabe, K.Y. and Sakakibara, S.</i> .....	1278
Li pellet injection experiments on Heliotron E <i>Sudo, S., Khlopenkov, K.V., Kondo, K., Mizuuchi, T., Zushi, H., Sano, F., Okada, H., Besshou, S., Nagasaki, K., Sakamoto, K. and Obiki, T.</i> .....	1282
Oscillations of the hot electron temperature in Kr plasmas of an E.C.R.I.S. (electron cyclotron resonance ion source), and consequences on the extracted ion currents <i>Lamoureux, M., Pras, R., Girard, A., Khodja, H., Charles, P., Bourg, F. and Melin, G.</i> .....	1286
Effects of magnetic field period number in pitch-modulated L=1 torsatron <i>Aizawa, M., Yamazaki, A., Saito, K. H., Kawakami, I. and Shiina, S.</i> .....	1290
High beta toroidal Z pinch <i>Sugisaki, K. and Hirano, K.</i> .....	1294
Study of DPF working with high density neutral gas concentrated in the focus zone <i>Milanese, M., Moroso, R. and Pouzo, J.</i> .....	1298
Size and lifetime of the gross pinch phase of deuterium plasma focus <i>Lee, S. and Serban, A.</i> .....	1302
Thermal dike ECRH in the GAMMA 10 end region <i>Tatematsu, Y., Kiwamoto, Y., Saito, T., Yoshimura, Y., Takahashi, T., Kajiwara, K., Abe, H., Miyawe, H., Katanuma, I. and Tamano, T.</i> .....	1306

Measurements of potential and end loss electrons in an open magnetic field of the GAMMA 10 tandem mirror <i>Yoshimura, Y., Saito, T., Kiwamoto, Y., Tatematsu, Y., Kajiwara, K., Miyae, H., Takahashi, T., Abe, H., Kikuchi, Y., Ishii, K. and Tamano, T.</i> .....	1310
Current balance at an end plate of the GAMMA 10 tandem mirror <i>Kajiwara, K., Saito, T., Kiwamoto, Y., Tatematsu, Y., Yoshimura, Y., Takahashi, T., Abe, H., Miyae, H., Kikuchi, Y. and Tamano, T.</i> .....	1314
Spontaneously excited Alfvén waves in the GAMMA 10 tandem mirror <i>Ichimura, M., Kumagai, A., Nakamura, M., Tanaka, S., Furukawa, S., Kanazawa, S., Ishikawa, E., Satake, C., Takayama, S., Hojo, H., Mase, A., Inutake, M. and Tamano, T.</i> .....	1318
Observation of density structure in velocity space loss regions of the RF driven tandem mirror plasma <i>Ishii, K., Goto, T., Katsuki, Y., Kikuno, N., Goi, Y., Nagasaki, N., Ono, Y., Ishibashi, N., Katanuma, I., Ichimura, M., Itakura, A., Yatsu, K. and Tamano, T.</i> ....	1322
Experimental studies of hot-spots inside PF discharges with argon admixtures <i>Jakubowski, L., Sadowski, M. and Baronova, E.O.</i> .....	1326
Highly overdense uniform plasmas by 430 MHz ECH in a linear multipole <i>Fukao, M., Watanabe, A. and Saito, Y.</i> .....	1330
Physics of high density plasma production by helicon waves <i>Sakawa, Y., Shoji, T., Takino, T., Kuroki, Y. and Shimura, K.</i> .....	1334
Control of plasma structure in modified magnetron-typed radio-frequency discharge <i>Li, Y., Iizuka, S. and Sato, N.</i> .....	1338
Modeling of RF plasma production <i>Fukuyama, A. and Ichida, Y.</i> .....	1342
RF plasma production and heating in LHD with crankshaft antenna <i>Moiseenko, V.E., Lysoivan, A.I., Plyusnin, V.V., Kasilov, S.V., Watari, T., Mutoh, T., Kumazawa, R., Seki, T. and Nishimura, K.</i> .....	1346
General variational principle and generalization of Kelvin/Helmholtz theorem for plasmas in the presence of a gravitational field <i>Popel, S.I. and Elsässer, K.</i> .....	1350
Computational studies on magnetic fields and plasma generation in a magnetron sputtering system with ferromagnetic targets <i>Ido, S. and Suzuki, T.</i> .....	1354
Computational studies on the effects of sheath in ion source plasmas <i>Ido, S. and Nakajima, Y.</i> .....	1358
High heat flux plasma generator for new divertor plasma simulator in Nagoya University <i>Narita, S., Ezumi, N., Ohno, N., Uesugi, Y. and Takamura, S.</i> .....	1362
Two dimensional model of surface wave sustained discharge <i>Odrobina, I. and Kando, M.</i> .....	1366
Potential structures of low electron-temperature plasma <i>Kato, K., Iizuka, S. and Sato, N.</i> .....	1370
<b>Section L Plasma-Material Interaction</b>	
Hydrogen permeation through plasma facing materials <i>Shu, W.M. and Watanabe, K.</i> .....	1374
Simulation of secondary electron emission from plasma-facing materials <i>Kawata, J., Nishimura, K., Harada, A. and Ohya, K.</i> .....	1378
Study of radiation from plasma-material interaction zone in disruption simulation experiments <i>Litunovskiy, V.N., Drozdov, A.A., Kuznetsov, V.E., Lyublin, B.V., Ovchinnikov, I.B. and Titov, V.A.</i> .....	1382
Plasma heat contraction on conducting plate due to plasma potential variation across the magnetic field <i>Kuwabara, T., Kudose, K., Ye, M.Y., Ohno, N. and Takamura, S.</i> .....	1386

Sheath potential induced by RF field for surface cleaning <i>Horiuchi, K., Li, Y., Iizuka, S. and Sato, N.</i> .....	1390
A proposal for divertor cooling and electric power generation in plasma fusion device <i>Yamaguchi, S., Ohyabu, S. and Motojima, O.</i> .....	1394
Physical mechanism of plasma heat flow into electron-emissive hot material surface <i>Ye, M.Y., Kuwabara, T., Ohno, N. and Takamura, S.</i> .....	1398
Impurity generation, transport and redeposition at plasma boundary <i>Kojima, M., Ido, Y., Ezumi, N., Ohno, N. and Takamura, S.</i> .....	1402
Thermal effect on metal surface characteristics with intense pulsed ion beam <i>Hashimoto, Y., Yatsuzuka, M., Uchida, H. and Yamasaki, T.</i> .....	1406
Temperature dependence of Ti sputtering yield from TiC composite material under high heat flux plasma irradiation <i>Hayashi, K., Ohno, N., Takamura, S., Morita, K. and Yamamoto, K.</i> .....	1410
The role of enhanced plasma parameters in the nitriding of steels <i>Camps, E., Romero, S., Garcia, J.L. and Muhl, S.</i> .....	1414
Threshold ion energy for the erosion of tungsten by a neon plasma <i>Kitajima, M., Bastasz, R., Kurashina, T. and Kamioka, I.</i> .....	1418
A 1d, 2v kinetic plasma diode model taking into account elastic electron-neutral collisions <i>Maier, H. and Kuhn, S.</i> .....	1422
<b>Section M Diagnostics</b>	
An effective method for determining the plasma displacement on HT-7 superconducting tokamak <i>Zhu, Y., Xie, J., Zhang, C., Zhao, Q., Fang, Z., Fan, H., Chen, L. and Ge, Y.</i> .....	1426
Engineering design and physical analysis of magnetics measurements in large helical device <i>Sakakibara, S., Yamada, H., Yamazaki, K., Watanabe, K.Y., Nishimura, K. and Motojima, O.</i> .....	1430
TV Thomson scattering measurement in Heliotron E <i>Okada, H., Funaba, H., Kinoshita, T., Kondo, K., Sano, F., Besshou, S., Mizuuchi, T., Nagasaki, K., Zushi, H., Wakatani, M. and Obiki, T.</i> .....	1434
Determination of radial position in the measurement of electron temperature profiles from electron cyclotron emission <i>Sato, M., Isei, N., Isayama, A., Ishida, S. and Shirai, H.</i> .....	1438
FeXXIII spectral lines for electron temperature diagnostics <i>Murakami, I., Moribayashi, K. and Kato, T.</i> .....	1442
Diagnostic application of millimeter wave radiometer and reflectometry on Hefei tokamaks <i>Zhang, S.Y., Wan, Y.X., Cao, Y.J., Zhang, J.S., The HT-6B Group and The HT-6M Group</i> .....	1446
Impurity injection into tokamak edge plasmas and their transport characteristics for edge plasma diagnostics <i>Uesugi, Y., Mishina, H., Okada, M., Kojima, M. and Takamura, S.</i> .....	1450
Polarization of impurity emission lines from a tokamak plasma <i>Fujimoto, T., Sahara, H., Kawachi, T., Kallstenius, T., Goto, M., Kawase, H., Furukubo, T., Maekawa, T., Terumichi, Y., Csanak, G. and Grabbe, S.</i> .....	1454
Argon X-ray spectroscopy in an electron cyclotron resonance ion source <i>Douysset, G., Khodja, H., Briand, J.P. and Girard, A.</i> .....	1458
Elementary processes of charge- and electronic state change at collisions of Alpha-particles with H, He and H <sub>2</sub> <i>Afrosimov, V.V., Basalaev, A.A. and Panov, M.N.</i> .....	1462
Neutron diagnostics of a deuterium-proton mixed hot ion plasma in the GAMMA 10 tandem mirror <i>Abe, H., Kiwamoto, Y., Tatematsu, Y., Saito, T., Ichimura, M., Inutake, M. and Tamano, T.</i> .....	1466

Time- and space-resolving vacuum ultraviolet spectrograph for plasma diagnostics in the GAMMA 10 <i>Yoshikawa, M., Aota, T., Ikeda, K., Ishijima, T., Okamoto, Y., Yamaguchi, N., Mase, A. and Tamano, T.</i> .....	1470
Development and characterization of a new-type electrostatic ion-energy spectrometer and its applications for plasma ion and potential diagnostics <i>Sakamoto, Y., Cho, T., Hirata, M., Nakashima, Y., Yatsu, K., Tamano, T. and Miyoshi, S.</i> .....	1474
Plasma ion diagnostics using semiconductor detectors <i>Hirata, M., Cho, T., Sakamoto, Y., Kohagura, J., Kanke, S., Takahashi, K., Okamura, T., Nakashima, Y., Yatsu, K., Tamano, T., Kondoh, T. and Miyoshi, S.</i> ....	1478
A new method for plasma electron temperature diagnostics using a new theory on the X-ray energy response of a semiconductor detector <i>Kohagura, J., Cho, T., Hirata, M., Takahashi, K., Kanke, S., Yatsu, K., Tamano, T. and Miyoshi, S.</i> .....	1482
Cooperating studies of potential related physics using X-rays from plasmas in the GAMMA 10 tandem mirror, the ASDEX upgrade, and the DIII-D tokamaks <i>Cho, T., Hirata, M., Kohagura, J., Sakamoto, Y., Kanke, S., Takahashi, K., Okamura, T., Mase, A., Yatsu, K., Tamano, T., Miyoshi, S., Tanaka, S., Snider, R.T. and Bessenrodt-Weberpals, M.</i> .....	1486
A novel method of plasma image recovery using QR decomposition <i>Terasaki, N., Hosoda, Y. and Iwama, N.</i> .....	1490
Diagnostics of the plasma jet using computer tomography <i>Sakiyama, S. and Fukumasa, O.</i> .....	1494
Plasma objects diagnostics using transitional radiation <i>Anisimov, I.O.</i> .....	1498
Imaging monochromator in VUV wavelength region <i>Koog, J., Iwasaki, K., Sato, K., Hamada, Y., Toi, K. and The JIPP T-IIU Group</i> .....	1502
Interferometer measurements of the spatial structure of small scale plasma oscillations by enhanced microwave scattering method <i>Gusakov, E.Z., Kaganskaya, N.M., Lvov, M.A. and Selenin, V.L.</i> .....	1506
Development of laser diagnostics for the understanding and optimization of fusion and discharge plasmas <i>Uchino, K., Cronrath, W., Song, Y.B., Choi, Y.W., Miyazaki, K., Hori, T., Sakoda, T., Bowden, M., Kajiwara, T., Muraoka, K. and Maeda, M.</i> .....	1510
Polarized laser-induced fluorescence to directly measure electric field distribution in plasma sheath <i>Takiyama, K., Watanabe, M., Li, S. and Oda, T.</i> .....	1514
Test function for Langmuir probe characteristic <i>Stamate, E. and Popa, G.</i> .....	1518
Spatially resolved electron energy distribution function measurements in a nitrogen RF discharge <i>Tatarova, E., Stoykova, E., Zhelyazkov, I., Bachev, K., Karadjov, I., Djermanova, N. and Ghanashev, I.</i> .....	1522
Electron energy distribution in capacitively-coupled RF discharges of inert gases <i>Kimura, T. and Ohe, K.</i> .....	1526
Capture of photodetached electrons by a Langmuir probe <i>Nishiura, M., Kasuya, T., Wada, M. and Sasao, M.</i> .....	1530
Plasma diagnostics using the polarization of X-ray line emission from Neon-like Germanium <i>Inal, M.K. and Dubau, J.</i> .....	1534
Particle transport diagnostics with tracer-encapsulated cryogenic pellet <i>Sudo, S., Itoh, H. and Khlopenkov, K.</i> .....	1538
Magnetic field and fast particles X-ray spectroscopic investigations in Z-pinch and laser produced plasmas <i>Baronova, E.O.</i> .....	1542
New M-O pulsed current sensor and its application in various plasma devices <i>Zhang, G., Lee, S., Feng, X., Pai, S.T. and Luo, C.</i> .....	1546

Simple and accurate measurements of peak axial sheath velocity in a plasma focus device	
<i>Serban, A. and Lee, S.</i> .....	1550
Plasma properties of the DC glow discharge in wire ion plasma source	
<i>Urai, H., Mashio, K., Okino, A. and Hotta, E.</i> .....	1554
Diagnostics of capillary plasmas with different diameter	
<i>Sueda, T., Katsuki, S. and Akiyama, H.</i> .....	1558
Spectroscopic measurement by a simple equipment and temperature profiles of breaking arc near Pd cathode.	
<i>Takeuchi, M. and Kubono, T.</i> .....	1562
Measurement of OH free radical in magnetized sheet plasma crossed with vertical gas-flow by laser-induced fluorescence spectroscopy	
<i>Tonegawa, A., Takatori, M., Kobayashi, Y., Kawamura, K. and Takayama, K.</i> .....	1566
Optical diagnostics for the study of plasma evolution in linear theta-pinch TC-1	
<i>Machida, M., Lebedev, S.V., Moshkalyov, S.A., Campos, D.O. and Berni, L.A.</i> .....	1570
<b>Section P Self Organizing Plasmas</b>	
Kinetic self-organization process: super ion-acoustic double layer formation and particle acceleration	
<i>Takamaru, H., Sato, T., Watanabe, K., Horiuchi, R. and The Complexity Simulation Group</i> .....	1574
Nonlinear oscillations and current disruptions caused by the negative differential resistance of an electric double layer	
<i>Axnäs, I., Torvén, S., Klinger, T. and Piel, A.</i> .....	1578
Three dimensional simulation study of the magnetohydrodynamic relaxation process in the solar corona	
<i>Suzuki, Y., Kusano, K., Nishikawa, K., Sato, T. and The Complexity Simulation Group</i> .....	1582
Self-organization in solar coronal plasma	
<i>Kusano, K., Suzuki, Y. and Nishikawa, K.</i> .....	1586
Self-organization associated with ion viscosity heating	
<i>Yoshida, Z., Inoue, N., Kido, S., Kondo, S., Miyazawa, J., Morikawa, J., Nakanishi, H., Ogawa, Y., Sasaki, K., Suzuki, T. and Watanabe, M.</i> .....	1590
Viscous heating in relaxation of three dimensional magnetohydrodynamic plasma	
<i>Zhu, S.P., Horiuchi, R. and Sato, T.</i> .....	1594
Self-organization in toroidal pinches	
<i>Kucinski, M.Y.</i> .....	1598
Self-organization of a high $\beta$ low q tokamak plasma	
<i>Kiyama, H. and Kiyama, S.</i> .....	1602
Self-organization theory based on autocorrelations and demonstrations by simulations	
<i>Kondoh, Y., Yamaguchi, M. and Yokozuka, K.</i> .....	1606
Fusion characteristics of ball lighting like configurations	
<i>Sanduloviciu, M. and Lozneanu, E.</i> .....	1610
Spontaneously generated temporal patterns of plasma device correlated with the dynamics of self-organized coherent space charge configurations	
<i>Sanduloviciu, M., Melnig, V. and Borcia, C.</i> .....	1614
Experiments proving particles acceleration by electrical double layers	
<i>Sanduloviciu, M. and Lozneanu, E.</i> .....	1618
Experimental study of the dynamo actions in the swip-RFP device	
<i>Zhang, P., Luo, C., Li, Q., Li, J., Yi, P. and Xue, J.</i> .....	1622
Magnetic field reversal and magnetic circuit in a thermally driven MHD dynamo	
<i>Araki, K., Kida, S. and Kitauchi, H.</i> .....	1626
Thermodynamical approach to spheromak merging into field-reversed configuration	
<i>Ishida, A. and Kuroda, T.</i> .....	1630
Plasma relaxation with minimum dissipation	
<i>Dasgupta, B., Avinash, K. and Sato, T.</i> .....	1634

Effects of pulsed electric field on ULQ and RFP plasmas <i>Watanabe, M., Saito, K., Suzuki, T., Miyazawa, J., Sasaki, K., Kido, S., Nakanishi, H., Takeji, S., Morikawa, J., Yoshida, Z., Ogawa, Y. and Inoue, N.</i> .....	1638
Configuration sustainment mechanism of a reversed field pinch plasma <i>Hattori, K., Sato, Y., Umemoto, T., Hayase, K. and Irie, M.</i> .....	1642
Dynamic behavior of the self-organized reactive components in a single-ended Q-machine <i>Popa, G. and Schrittwieser, R.</i> .....	1646
Generation of spiral structure in an argon plasma <i>Tanaka, M. Y., Sakamoto, T., Imaizumi, H., Taniguchi, K. and Kawai, Y.</i> .....	1650
Density transition phenomena in plasmas produced by an electron cyclotron wave <i>Taniguchi, K., Tanaka, M. Y. and Kawai, Y.</i> .....	1654
<b>Section Q Laser Plasmas and Short-Pulse Phenomena</b>	
Model for forward development mechanism of high pressure argon plasma produced by excimer laser <i>Tsuda, N. and Yamada, J.</i> .....	1658
Modeling of thermal transport using Fokker-Planck equations in laser produced plasma <i>Nakarmi, J.J. and Jha, L.N.</i> .....	1662
Self focusing of laser beams and its effects in the generation of magnetic field in laser-produced plasma <i>Ghimire, A. and Jha, L.N.</i> .....	1666
Diamagnetism of exploding plasma and study of its energy changes on magnetic disturbances in vacuum <i>Zakharov, Yu.P., Melekhov, A.V., Nikitin, S.A. and Ponomarenko, A.G.</i> .....	1670
Physics of future ICF-application systems with magnetic field in laser-produced plasma experiments <i>Zakharov, Yu.P., Antonov, V.M., Nikitin, S.A., Ponomarenko, A.G., Posukh, V.G. and Shaikhislamov, I.F.</i> .....	1674
Dynamics of laser-produced plasmas in dipole magnetic field under conditions of near-earth anti-asteroidal explosions <i>Zakharov, Yu.P., Melekhov, A.V., Nikitin, S.A., Posukh, V.G. and Shaikhislamov, I.F.</i> .....	1678
Effects of self-induced large magnetic fields in laser-produced plasmas <i>Satou, K. and Okada, T.</i> .....	1682
Wave dissipation effect on stimulated Raman backscattering in a bounded plasma <i>Jovanović, M.S., Maluckov, A., Škorić, M.M., Sasaki, A. and Tani, K.</i> .....	1686
Stimulated Brillouin scattering measurements in a laser-produced plasma <i>Labaune, C., Baldis, H.A., Schifano, E., Tikhonchuk, V.T. and Michard, A.</i> .....	1690
Vlasov simulations of intense short pulse laser light propagation and scattering in underdense plasma <i>Barr, H.C. and Ali, S.F.</i> .....	1694
Stimulated forwards scattering from relativistically intense laser pulses in plasma <i>Barr, H.C., Boyd, T.J.M., Berwick, S.J., Ali, S.F. and Gordon, F.I.</i> .....	1698
Self-modulation of high-intensity short laser pulses in underdense plasmas and plasma channels <i>Andreev, N.E., Gorbunov, L.M., Kirsanov, V.I. and Sakharov, A.S.</i> .....	1702
Nonlinear dynamics of relativistically-strong laser pulse transmission into overdense plasmas <i>Kim, A.V., Mironov, V.A. and Abramyan, L.A.</i> .....	1706
Intense short laser pulse propagation and self-modulation in ionizing plasmas <i>Kato, S., Koga, J. and Kishimoto, Y.</i> .....	1710
Magnetic field generation and penetration into dense laser-produced plasma <i>Boyd, T.J.M., Tatarinov, A., Bawa'aneh, M. and Dyson, A.</i> .....	1714
Harmonic emission from the interaction of intense laser pulses with overdense plasma targets <i>Boyd, T.J.M. and Ondarza R., R.</i> .....	1718

Laser scattering from high-intensity laser produced plasmas <i>Koyama, K. and Tanimoto, M.</i> .....	1722
Interaction of ultra-short electromagnetic pulses with charged particles in a magnetic field <i>Akimoto, K. and Irie, H.</i> .....	1726
Raman scattering of a strong laser short pulse in a large damping and relativistic plasma <i>Feng, X. and Lee, S.</i> .....	1730
Side and backward relativistic harmonic generation in underdense plasmas <i>Kirsanov, V.I. and Sakharov, A.S.</i> .....	1734
Simulation study on cross polarization scattering of ultrashort-pulse electromagnetic waves <i>Katsuragawa, N., Hojo, H. and Mase, A.</i> .....	1738
Structure of the wake field in Plasma channels <i>Andreev, N.E., Kirsanov, V.I., Nakajima, K. and Ogata, A.</i> .....	1742
The use of an ion channel formed in plasmas at self-guiding of intense asymmetric laser pulses for acceleration and focusing of electron bunches <i>Garuchava, D.P., Murusidze, I.G., Suramlishvili, G.I., Tsintsadze, N.L. and Tskhakaya, D.D.</i> .....	1746
Charged particle acceleration by wake field plasma waves generated with shaped laser pulses in nonuniform plasmas <i>Naumova, N.M. and Esirkepov, T.Zh.</i> .....	1750
Controlled wake field acceleration via laser pulse shaping <i>Bulanov, S.V., Dudnikova, G.I., Esirkepov, T.Zh., Naumova, N.M., Pegoraro, F., Pogorelsky, I., Pukhov, A.M. and Vshivkov, V.A.</i> .....	1754
Photon acceleration in the interaction of high power microwave with inhomogeneous plasma <i>Xu, X., Tsukada, T., Yugami, N. and Nishida, Y.</i> .....	1758
Kinetic formulation of ultrashort laser pulse photon acceleration <i>Mendonca, J.T., Oliveira e Silva, L. and Lopes, N.</i> .....	1762
Plasma confinement of large-size-pellet DT fuel in inertial confinement fusion <i>Kawata, S., Kurawaki, K., Tuyuki, A. and Hirota, K.</i> .....	1766
D and T fuels inhomogeneous mixing in ICF pellet implosion <i>Kawata, S., Kurawaki, K., Tuyuki, A. and Hirota, K.</i> .....	1770
Roles of suprathermal fusion reactions in laser-produced DT and DT/ <sup>6</sup> Li plasmas <i>Nakao, Y., Voronchev, V.T., Tabaru, Y., Johzaki, T. and Kudo, K.</i> .....	1774
Rotating light ion beam-plasma system in inertial confinement fusion <i>Murakami, H. and Okada, T.</i> .....	1778
Experimental study on laser irradiation nonuniformity caused by beam power imbalance <i>Honda, H., Nishimura, H., Miyamoto, S., Nakai, M., Kondo, K., Miyanaga, N., Tsubakimoto, K., Shiraga, H., Azechi, H., Nishihara, K. and Mima, K.</i> .....	1782
Rippled shock propagation driven by laser ablation <i>Ishizaki, R., Nishihara, K., Wouchuk, J.G., Honda, M., Matsui, N., Shigemori, K., Azechi, H., Mima, K., Sakagami, H. and Nishiguchi, A.</i> .....	1786
Time- and space-resolved X-ray spectroscopic measurements of hot dense core plasma created by laser driven fusion <i>Fujita, K., Ochi, Y., Miki, H., Nishimura, H., Azechi, H., Miyanaga, N., Shiraga, H., Sunahara, A., Takabe, H. and Mima, K.</i> .....	1790
The measurement of laser-induced target movement by face-on interferometry <i>Takahashi, E., Matsushima, I., Matsumoto, Y., Yashiro, H. and Owadano, Y.</i> .....	1794
Magnetic and optical forces on a magnetically suspended pellet for laser fusion scheme <i>Yoshida, H., Sakagami, Y., Yasufuku, K., Yamadori, S. and Konishi, T.</i> .....	1798
Removal and characterization of weakly ionized Ni laser-plasma for the magnetically suspended pellet <i>Sakagami, Y., Yoshida, H., Mizutani, T. and Suzuki, Y.</i> .....	1802
Free electron laser in a partially filled waveguide with a longitudinal electrostatic wiggler <i>Maraghechi, B.</i> .....	1806

## Section R Reactive Plasmas for Material Processing

Study of graft copolymerization modification of teflon surface with ECR plasma <i>Guan, W., Wen, Y., Ying, Y. and Qian, S.</i> .....	1810
Characterization of gaseous carbon plasma in a low-temperature tokamak discharge as processing plasma <i>Matsuda, O., Ohno, N. and Takamura, S.</i> .....	1814
The toroidal plasma deposition source, PLADEPUS <i>Cross, R.C. and Zhang, B.C.</i> .....	1818
Effect of an applied magnetic field upon a low-pressure plasma jet <i>Uyama, T., Fukumoto, N., Nagata, M., Taniguchi, K. and Morita, H.</i> .....	1822
Operating characteristics of a glow plasma discharge at atmospheric pressure <i>Sugimoto, S., Noritake, S., Takehara, A. and Goto, S.</i> .....	1826
Arc discharge in repetitive weak gravitational field and application to production of various fullerenes <i>Mieno, T.</i> .....	1830
Reactive magnetron discharge with copper cathode <i>Anita, V., Popa, G., Bretagne, J., Pagnon, D., Verdes, D. and Ruscanu, D.</i> .....	1834
Mechanisms of gallium arsenide reactive ion etching in chlorine-argon <i>Moshkalyov, S., Machida, M., Lebedev, S. and Campos, D.</i> .....	1838
Two-dimensional fluid code for simulation of ion extraction from photo-ionized plasma <i>Nagata, K., Kazumi, H., Matsui, T. and Yoshioka, K.</i> .....	1842
Ion extraction characteristics of the laser induced plasma between grounded parallel plate cathodes and upper short plate anodes <i>Tsuda, S., Matsui, T., Yamada, K., Nitta, H., Kato, K. and Tsuchida, K.</i> .....	1846
Ion extraction characteristics from laser induced plasma by radio-frequency resonant method <i>Matsui, T., Tsuchida, K., Tsuda, S., Suzuki, K. and Shoji, T.</i> .....	1850
Ion extraction from laser resonance photoionized plasma by applying radio-frequency voltage <i>Shibata, T. and Ogura, K.</i> .....	1854
Experiments with laser produced vapor clouds on study of magnetically driven ion extraction for new scheme of laser isotope separation <i>Zakharov, Yu.P., Posukh, V.G. and Shaikhislamov, I.F.</i> .....	1858
Kinetics of chemiluminescent reactions in nonequilibrium molecular gas-discharge plasmas <i>Naumov, V.V. and Zhdanok, S.A.</i> .....	1862
Chirality in a plasma medium <i>Reggiani, N., Sakanaka, P.H. and Torres Silva, H.</i> .....	1866
Production of a large-diameter inductive plasma using an internal antenna <i>Suzuki, K., Ohkubo, H., Nakamura, K. and Sugai, H.</i> .....	1870
A large planar plasma excited by surface waves in a ultra-high-frequency range <i>Nagatsu, M., Xu, G., Ghanashev, I., Kano, M. and Sugai, H.</i> .....	1874
Control of ion energies in pulse-modulated diode discharge <i>Sato, N.Y., Iwama, M., Ikehata, T., Tanabe, T. and Mase, H.</i> .....	1878
Negative ions in a pulsed-power inductively-coupled chlorine plasma for etching <i>Ahn, T.H., Itoh, M., Nakamura, K. and Sugai, H.</i> .....	1882
Negative ion kinetics in a magnetron oxygen plasma <i>Toyoda, H., Takahashi, S., Goshima, K., Ichihara, K. and Sugai, H.</i> .....	1886
Lower temperature formation of high quality a-Si:H film by using an inductively coupled plasma <i>Goto, M., Toyoda, H., Kitagawa, M., Hirano, T. and Sugai, H.</i> .....	1890
Theoretical study for electron temperature effects on planar RF discharges between parallel electrodes <i>Nonaka, S. and Tsuge, S.</i> .....	1894
Potential formation in an electronegative plasma driven by an asymmetry RF discharge <i>Nasser, M.M., Ohtsu, Y., Tochtani, G. and Fujita, H.</i> .....	1898
Effect of ion beam on hollow probe current in a low pressure double plasma device <i>Wakita, N., Ohtsu, Y., Tochtani, G. and Fujita, H.</i> .....	1902

Temporal evolution of charged particles in a RF afterglow electronegative plasma <i>Seki, T., Ohtsu, Y., Tochitani, G. and Fujita, H.</i> .....	1906
Verification of sheath potentials in an electron-beam-excited plasma using current balance equations <i>Miyano, R., Fujii, M., Inaguma, J., Shiraki, Y., Mikawa, Y. and Ikezawa, S.</i> .....	1910
Characteristics of new plasma source using coaxially symmetric surface wave in VHF band <i>Ikezawa, S., Miyano, R., Fujii, M., Inaguma, J., Shiraki, Y., Mikawa, Y., Kida, K., Nishiwaki, A., Okamoto, Y., Nonaka, S. and Kando, M.</i> .....	1914
Surface characterization of plastic films by reactive plasmas and its application to the color printing <i>Izumi, Y., Ishihara, H. and Ohte, T.</i> .....	1918
Mechanisms of plasma chemical processes in non-equilibrium microwave discharge <i>Jivotov, V. and Rusanov, V.</i> .....	1922
Electron-cyclotron resonance plasmas in O <sub>2</sub> -Ar & O <sub>2</sub> -N <sub>2</sub> mixtures as active oxygen atomic sources for reactive sputtering processes <i>Akitsu, T., Nakamae, S. and Ohtsu, T.</i> .....	1926
Temporal and spatial behavior of negative ions in high-density oxygen plasmas <i>Hayashi, D., Ishikawa, T., Sasaki, K. and Kadota, K.</i> .....	1930
Measurements of negative ion behavior in high-density carbon-tetrafluoride plasmas by time-of-flight mass spectrometry <i>Sasaki, K., Ura, K. and Kadota, K.</i> .....	1934

#### Section S Dust and Fine-Particle Plasmas

The effect of the ion temperature on electrostatic ion waves in a dusty plasma <i>Nejoh, Y.N.</i> .....	1938
Quasi-electrostatic waves in dusty plasma <i>Das, A.C., Goswami, K.S. and Misra, A.K.</i> .....	1942
Low frequency electromagnetic waves in a magnetized plasma with highly charged heavy impurities <i>Vladimirov, S.V. and Cramer, N.F.</i> .....	1946
Low-frequency phenomena in weakly ionized magnetoplasmas with static and dynamic dust grains <i>Shukla, P.K., Birk, G.T. and Kopp, A.</i> .....	1950
Instability of 'dust' crystal in plasma <i>Schweigert, V.A., Schweigert, I.V., Homann, A., Melzer, A. and Piel, A.</i> .....	1954
Vertical alignment of 'dust' crystal in plasma <i>Schweigert, I.V., Schweigert, V.A., Melzer, A., Homann, A. and Piel, A.</i> .....	1958
Wake potential and plasma crystal <i>Ishihara, O. and Vladimirov, S.V.</i> .....	1962
The influence of dust particles on strong electron oscillations in bounded non-neutral plasmas <i>Chutov, Yu.I., Kravchenko, A.Yu., Schram, P.P.J.M. and Smirnov, R.D.</i> .....	1966
The relaxation of plasmas with dust particles <i>Chutov, Yu.I., Kravchenko, A.Yu. and Schram, P.P.J.M.</i> .....	1970
Simulation and theory of strongly coupled dusty plasma <i>Kishimoto, T., Totsuji, C. and Totsuji, H.</i> .....	1974
Simulation study of dust charging process and structure formation in dusty plasmas <i>Watanabe, K., Nishimura, K. and Sato, T.</i> .....	1978
Generation of dusty plasma in a double-plasma device <i>Nakamura, M., Nunomura, S., Malik, H.K., Ohno, N. and Takamura, S.</i> .....	1982
The properties of a C <sub>60</sub> plasma in a Q-machine <i>Strele, D., Winkler, C., Krumm, P. and Schrittwieser, R.</i> .....	1986
Production of K-fullerene plasmas using a new-type sublimation oven <i>Sasaki, S., Hirata, T., Hatakeyama, R., Mieno, T. and Sato, N.</i> .....	1990

## Section T New Approaches

### Laboratory formation of the heliosphere

*Minami, S.* ..... 1994

### Injection of low-mass CTs into the STOR-M tokamak

*Xiao, C., Hirose, A., Zawalski, W., White, D., Raman, R., Decoste, R., Gregory, B.C. and Martin, F.* ..... 1998

### Behaviors of two-fibers Z-pinch

*Amakawa, N. and Miyamoto, T.* ..... 2002

### Plasma production by using phase-arrayed Ac power sources with multiple electrodes

*Matsumoto, K., Nakajima, T. and Uetani, Y.* ..... 2006

### Basic study about the extent of surface-modification effects of carbon materials by reactive plasmas

*Motegi, N., Izumi, Y., Ohte, T., Ohtani, S. and Kojima, A.* ..... 2010

### Characteristics of the HITOP (HIgh density TOhoku Plasma) device for magneto-hydro-dynamic studies

*Ando, A., Hattori, K., Suzuki, T., Yoshinuma, M., Ikeda, K., Kobayashi, H. and Inutake, M.* ..... 2014

### Characteristics of a J×B driven rotating plasma in a magnetic field of up to 4T

*Ikehata, T., Tsukui, T., Asahara, T., Sato, N., Tanabe, T. and Mase, H.* ..... 2018

## Section U Others

### Lyapunov exponent in dilute gas, liquid and solid plasmas

*Nishihara, K., Ueshima, Y., Barnett, D.M., Tajima, T. and Furukawa, H.* ..... 2022

### The effect of self dilution on the high $\beta_p$ confinement plasma in burning state

*Tateishi, G., Itoh, S.-I., Yagi, M., Itoh, K. and Fukuyama, A.* ..... 2026

### The tokamak as a thermodynamic open system: Power thresholds of the L-H transition and global constraints on transport

*Minardi, E.* ..... 2030

### Plasma-screening effects on bremsstrahlung in electron-ion Coulomb scattering in strongly-coupled plasmas

*Jung, Y.D.* ..... 2034

### Effect of electron degeneracy on fast-particles energy deposition in dense plasma systems

*Johzaki, T., Nakao, Y., Nakashima, H. and Kudo, K.* ..... 2038

### Strongly coupled plasma experiment using highly charged particles

*Shoji, T., Fujigaya, M., Tsuji, K. and Sakawa, Y.* ..... 2042

### Plasma effects in electron systems in semiconductor microstructures

*Tachibana, H., Totsuji, C. and Totsuji, H.* ..... 2046

### Experimental investigation of ozone generation by corona streamer discharges

*Hegeler, F., Katsuki, S., Hagler, M. and Akiyama, H.* ..... 2050

### Experiments on nonneutral electron and positron plasmas in a potential well formed with multi-ring-electrodes

*Mohri, A., Tanaka, H., Higaki, H., Yamazawa, Y., Yuyama, T. and Michishita, T.* ... 2054

### A ponderomotive force description of neutrino plasma coupling

*Bingham, R., Dawson, J.M. and Shukla, P.K.* ..... 2058

## Author index to volume 1 and volume 2
