

## CONTENTS OF PART A

Preface, <i>M.A. Abdou</i>	v
ISFNT-3 Committee Members	vii

### I. ITER and Large Tokamaks

#### INVITED PAPERS

ITER: the first experimental fusion reactor, <i>P.-H. Rebut</i>	3
TFTR experience with D-T operation, <i>D.M. Meade</i>	17
Impact of JET experimental results and engineering development on the definition of the ITER design concept, <i>E. Bertolini</i>	27
Design of the ITER vacuum vessel, <i>K. Ioki, G. Johnson, K. Shimizu and D. Williamson</i>	39
ITER blanket designs, <i>Y. Gohar, R. Parker and P.-H. Rebut</i>	52
ITER shielding analysis, <i>R.T. Santoro, Y. Gohar, R.R. Parker, G. Shatalov, M.E. Sawan and H.Y. Khater</i>	62
Overview of remote-maintenance scenarios for the ITER machine, <i>R. Haange</i>	69
Approaches to safety, environment and regulatory approval for ITER, <i>G. Saji, H.W. Bartels, V. Chuyanov, D. Holland, A.V. Kashirski, S.I. Morozov, S.J. Piet, A. Poucet, J. Raeder, P.H. Rebut and L.N. Topilski</i>	83
Engineering and design aspects related to the development of the ITER divertor, <i>K.J. Dietz, S. Chiochio, A. Antipenkov, G. Federici, G. Janeschitz, E. Martin, R.R. Parker and R. Tivey</i>	96

### II. First Wall and Blanket: Models, Experiments and Facilities

#### INVITED PAPERS

A volumetric neutron source for fusion nuclear technology testing and development, <i>M.A. Abdou</i>	111
Summary of experimental results for ceramic breeder materials, <i>N. Roux, G. Hollenberg, C. Johnson, K. Noda and R. Verrall</i>	154
Ceramic pebble bed development for fusion blankets, <i>P. Gierszewski, M. Dalle Donne, H. Kawamura and M. Tillack</i>	167
Status of beryllium development for fusion applications, <i>M.C. Billone, M. Dalle Donne and R.G. Macaulay-Newcombe</i>	179

#### CONTRIBUTED PAPERS

Application of reliability analysis method to fusion component testing, <i>A.Y. Ying and M.A. Abdou</i>	191
Radiation problems of first wall facilities and their solution with ANSYS code, <i>S. Homiyakov and A. Epinatiev</i>	198

In-service experience feedback of the Tore Supra actively cooled inner first wall, <i>J. Schlosser, P. Chappuis, M. Chatelier, J.J. Cordier, P. Deschamps, L. Garampon, D. Guilhem, M. Lipa and R. Mitteau</i>	203
Design and life assessment of first wall components, <i>E. Diegele, D. Munz and G. Rizzi</i>	210
Analysis of wall-packed-bed thermal interactions, <i>Z.R. Gorbis, M.S. Tillack, F. Tehranian and M.A. Abdou</i>	216
Analysis of the energy transport and deposition within the reactor chamber of the Prometheus inertial fusion energy reactor, <i>J.E. Eggleston, M.A. Abdou and M.S. Tillack</i>	226
Interface conductance between roughened Be and steel under thermal deformation, <i>M.S. Tillack and R.D. Abelson</i>	232
Thermal conductivity of a beryllium gas packed bed, <i>M. Xu, M.A. Abdou and A. Rene Raffray</i>	240
A small tokamak conceptual design for volumetric neutron source, <i>L.J. Qui, Y. Wu, Y.C. Wu, G.S. Luan, Z.J. Gou, Q. Wu, P. Duan, X.H. Gao, L.L. Liu, Q.Y. Huang, B.J. Xia and Y.W. Yang</i>	247
Steady state thermal-hydraulic models of pebble bed blankets on hybrid reactors, <i>B.J. Xiao and L.J. Qui</i>	253
Experimental tokamak reactor concept design for fusion-fusion hybrid reactor and volumetric neutron source, <i>Z. Guo, Y. Wu and L. Liu</i>	258
Thermal and mechanical properties of beryllium pebbles, <i>E. Ishitsuka and H. Kawamura</i>	263
Development of a nuclear-thermal coupled calculation code system, <i>S. Sugaya, H. Kawasaki, K. Yamada and Y. Seki</i>	269
Helium induced swelling and tritium trapping mechanisms in irradiated beryllium: a comprehensive approach, <i>F. Scaffidi-Argentina, M. Dalle Donne, C. Ferrero and C. Ronchi</i>	275
Thermomechanical interactions of particle bed-structural wall in a layered configuration. Part 1: Effect of particle bed thermal expansions, <i>F. Tehranian and R. Hejal</i>	283
Thermomechanical interactions of particle bed-structural wall in a layered configuration. Part 2: Combined effects of bed thermal expansions and coolant pressure, <i>F. Tehranian and R. Hejal</i>	290
Canadian ceramic breeder technology: recent results, <i>P. Gierszewski, H. Hamilton, J. Miller, J. Sullivan, R. Verrall, J. Earnshaw, D. Ruth, R. Macauley-Newcombe and G. Williams</i>	297
Analysis of the tokamak volumetric neutron source (VNS) design and range of its parameters, <i>A.B. Mineev</i>	307

### III. First Wall and Blanket: Design and Analysis

#### INVITED PAPERS

Status of EC solid breeder-blanket designs and R&D for DEMO fusion reactors, <i>M. Dalle Donne, L. Anzidei, H. Kwast, F. Moons and E. Proust</i>	319
Overview of EU activities on DEMO liquid metal breeder blankets, <i>L. Giancarli, G. Benamati, S. Malang, A. Perujo, E. Proust and J. Reimann</i>	337

#### CONTRIBUTED PAPERS

Convertible liquid metal blankets for ITER with Pb-17Li as breeding material, <i>J. Reimann, L. Giancarli, S. Malang, L. Petrizzi, E. Proust, J.F. Salavy and K. Schleich</i>	353
---	-----

ITER shielding blanket, <i>Yu. Strebkov, A. Avsjannikov, M. Baryshev, Yu. Blinov, G. Shatalov, N. Vasiliev, A. Vinnikov and A. Chernjagin</i>	363
Disruption problematics in segmented-blanket concepts, <i>Y.R. Crutzen, S. Fantechi, F. Farfaletti-Casali, A. Inzaghi, E. Rochez and I. Sakellaris</i>	372
The tubular separate first wall for ITER-EDA, <i>A. Pizzuto, B. Riccardi, E. Salpietro and G. Malavasi</i>	382
Design of separated first wall for fusion experimental reactor, <i>K. Koizumi, M. Shibui, M. Nakahira, H. Takatsu, E. Tada, M. Seki and T. Tsunematsu</i>	388
Comparison of lithium and the eutectic lead–lithium alloy, two candidate liquid metal breeder materials for self-cooled blankets, <i>S. Malang and R. Mattas</i>	399
Analysis of mechanical effects caused by plasma disruptions in the European breeder out of tube solid breeder blanket design with MANET as structural material, <i>L.V. Boccaccini, P. Norajitra and P. Ruatto</i>	407
Thermal hydraulics and mass transfer of the coolant-out-of-tube blanket model, <i>P. J. Karditsas</i>	415
A European proposal for an ITER water-cooled solid breeder blanket, <i>P. Lorenzetto, P. Gierszewski and G. Symbolotti</i>	423
Transient thermal and dynamic stresses in strongback-design blankets, <i>S. Majumdar</i>	430
Development of blanket box structure fabrication technology, <i>K. Mohri, S. Sato, I. Kawaguchi, K. Sato, T. Kuroda, T. Hashimoto, S. Sato and H. Takatsu</i>	438
Neutron and thermal calculation of blanket for high power operating condition of fusion reactor, <i>H. Sagawa, S. Shimakawa, T. Kuroda, H. Kawamura, M. Nakamichi and M. Saito</i>	444
Ceramic breeding blanket development for experimental fusion reactor in JAERI, <i>T. Kurasawa, H. Takatsu, S. Sato, S. Mori, T. Hashimoto, M. Nakahira, K. Furuya, T. Tsunematsu, M. Seki, H. Kawamura and T. Kuroda</i>	449
Assessment of alkali metal coolants for the ITER blanket, <i>K. Natesan, C.B. Reed and R.F. Mattas</i>	457
Thermal-mechanical analyses of the ITER shielding blanket designs, <i>A. Cardella, Y. Gohar, H. Gorenflo, R.R. Parker, P. Barabaschi and P.H. Rebut</i>	467
Study of magnetic damping effect on dynamic deflection of fusion reactor first wall, <i>Y. Yoshida, K. Miya and K. Demachi</i>	473
Dynamic behavior of fusion structural components under strong magnetic fields, <i>T. Takagi, J. Tani, Y. Matsubara and I. Mogi</i>	481
Numerical analysis of magnetoelastic buckling of fusion reactor components, <i>K. Demachi, Y. Yoshida and K. Miya</i>	490
Cracking susceptibility of stainless steel subjected to plasma disruption, <i>H. Madarame, T. Sukegawa and H. Inoue</i>	499
Impact of the passive stabilization system on the dynamic loads of the ITER first wall/blanket during a plasma disruption event, <i>M. Ferrari, L. Anzidei, V. Cristini and G. Symbolotti</i>	507
Fatigue life of the plasma-facing components in PULSAR, <i>J.A. Crowell and J.P. Blanchard</i>	515
Simulation of electromechanical and thermomechanical loads on first wall mock-ups, <i>J. Wolters, M. Roedig, G. Breitbach and H. Nickel</i>	522
Reduction of toroidal ripple by using high $T_c$ superconductors, <i>T. Uchimoto, K. Miya and Y. Yoshida</i>	528
Mechanical response and fatigue analysis of the first wall structure of the PROMETHEUS IFE reactor, <i>A. El-Azab and N.M. Ghoniem</i>	536

Heat-pipes-based first wall, *V. Kovalenko, V. Khripunov, A. Antipenkov and A. Ulianov* 544

#### **IV. Liquid Metal Magnetohydrodynamics**

##### **INVITED PAPER**

Present understanding of MHD and heat transfer phenomena for liquid metal blankets,  
*I.R. Kirillov, C.B. Reed, L. Barleon and K. Miyazaki* 553

##### **CONTRIBUTED PAPERS**

Development of insulating coatings for liquid metal blankets, *S. Malang, H.U. Borgstedt, E.H. Farnum, K. Natesan and I.V. Vitkovski* 570

The effect of a magnetic field on heat transfer in a slotted channel, *I.A. Evtushenko, T.Q. Hua, I.R. Kirillov, C.B. Reed and S.S. Sidorenkov* 587

Magnetohydrodynamic investigations of a self-cooled Pb-17Li blanket with poloidal-radial-toroidal ducts, *J. Reimann, L. Barleon, I. Bucenieks, L. Bühler, L. Lenhart, S. Malang, S. Molokov, I. Platnieks and R. Stieglitz* 593

Flow visualization of liquid metals by neutron radiography, *N. Takenaka, T. Fujii, A. Ono, Y. Motomura and A. Turuno* 607

Experimental and theoretical MHD performance of a round pipe with an NaK-compatible Al<sub>2</sub>O<sub>3</sub> coating, *C.B. Reed, K. Natesan, T.Q. Hua, I.R. Kirillov, I.V. Vitkovski and A.M. Anisimov* 615

MHD-flow in slotted channels with conducting walls, *I.A. Evtushenko, I.R. Kirillov and C.B. Reed* 628

The effects of imperfect insulator coatings on MHD and heat transfer in rectangular ducts, *A.Y. Ying and A.A. Gaizer* 635

Liquid metal flows in insulating elements of self-cooled blankets, *S. Molokov* 643

The influence of small cracks in insulating coatings on the flow structure and pressure drop in MHD channel flows, *L. Bühler* 651

Development of a direct insulation layer for a self-cooled liquid metal fusion reactor blanket, *H.U. Borgstedt and H. Glasbrenner* 659

Studies on magnetohydrodynamic flow characteristics and heat transfer of liquid metal two-phase flow cooling systems for a magnetically confined fusion reactor, *M. Takahashi, A. Inoue, M. Aritomi and M. Matsuzaki* 663

Magnetohydrodynamic pressure drop in a quickly changing magnetic field, *Z.Y. Xu, J.M. Chen, J.P. Qian, W.H. Jiang, C.J. Pan and W.Z. Li* 678

Development of electrical insulator coatings for fusion power applications, *J.-H. Park, T. Domenico, G. Dragel and R. Clark* 682

MHD pressure drops and thermal hydraulic analysis for the ITER breeding blanket design, *T.Q. Hua and Y. Gohar* 696

MHD flow in rectangular ducts with inclined non-uniform transverse magnetic field, *T.Q. Hua and J.S. Walker* 703

Magnetohydrodynamics and heat transfer benchmark problems for liquid-metal flow in rectangular ducts, *S.I. Sidorenkov, T.Q. Hua and H. Araseki* 711

Use of turbulence modification for heat transfer enhancement in liquid metal blankets, *H. Branover, A. Eidelman and M. Nagorny* 719

Initial liquid metal magnetohydrodynamic thin film flow experiments in the MeGA-loop facility at UCLA, *N.B. Morley, A.A. Gaizer, M.S. Tillack and M.A. Abdou* 725

Lithium–vanadium experimental facility for blanket problems investigation, <i>V.A. Evtikhin, I.E. Lyublinski, A.V. Vertkov and V.M. Korjavin</i>	731
Flow balancing in liquid metal blankets, <i>M.S. Tillack and N.B. Morley</i>	735
Author Index of Parts A, B and C	743

## CONTENTS OF PART B

### V. Divertors and Plasma-Facing Components

#### INVITED PAPER

High quality actively cooled plasma-facing components for fusion, <i>R.E Nygren</i>	3
---	---

#### CONTRIBUTED PAPERS

High Z limiter test in TEXTOR: thermal response and post-mortem analysis, <i>T. Tanabe, Y. Ueda, V. Philipps, B. Unterberg, A. Pospieszczyk, B. Schweer and M. Fujine</i>	13
Design, fabrication and testing of a helium cooled module, <i>C.B. Baxi, J. Smith and D. Youchison</i>	22
An assessment of disruption erosion in the ITER environment, <i>A. Hassanein and I. Konkashbaev</i>	27
Design, materials and R&D issues of innovative thermal contact joints for high heat flux applications, <i>G. Federici, R. Matera, S. Chiochio, J. Dietz, G. Janeschitz, D. Driemeyer, J. Haines, M.S. Tillack and M. Ulrickson</i>	34
Detection of subcooled boiling heat transfer regimes up to critical heat flux by accelerometric equipment, <i>G.P. Celata, G. Dell'Orco and G.P. Gaspari</i>	44
Critical heat flux multiplier of subcooled flow boiling for non-uniform heating conditions in a swirl tube, <i>F. Inasaka and H. Nariai</i>	53
Mechanisms for extreme heat transfer conditions in water-cooling of fusion reactor components, <i>B.M. Lekakh, J.E. Meyer and M.S. Kazimi</i>	59
Numerical simulation of heat transfer and fluid flow of a non-equilibrium argon plasma jet with confined wall, <i>T. Kunugi, K. Ezato, T. Yokomine and A. Shimizu</i>	63
Evaluation of cooling concepts and specimen geometries for high heat flux tests on neutron irradiated divertor elements, <i>J. Linke, M. Akiba, M. Araki, H. Bolt, G. Breitbach, R. Duwe, K. Nakamura and J.H. You</i>	72
Two-dimensional impinging jet cooling of high heat flux surfaces in magnetic confinement fusion reactors, <i>A. Inoue, T. Tanno, M. Takahashi and Y. Yamasaki</i>	81
Thermal cycling and isothermal tests on black-coated specimens, <i>B. Windelband, K. Kleefeldt, D. Munz and B. Schinke</i>	90
Thermomechanical study of a new concept for a beryllium-protected high heat flux component, <i>M. Merola, R. Matera, G. Federici and S. Chiochio</i>	97
Thermomechanical investigation on divertor supports for fusion experimental reactor: hydraulic experimental results, <i>T. Arai, R. Hino, Y. Muto, M. Nakahira, M. Shibui, K. Furuya, E. Tada and M. Seki</i>	103
Assessing braze quality in the actively cooled Tore Supra phase III outboard pump limiter, <i>R.E. Nygren, T.L. Lutz, J.D. Miller, R. McGrath and G.E. Dale</i>	113
