CONTRIBUTORS TO VOLUME 5, PART A.	v
FOREWORD TO VOLUME 5A	vii
PREFACE TO VOLUME 5A	ix
CONTRIBUTORS TO VOLUME 5, PART B	xv
CONTENTS, VOLUME 5, PART B	xvii
1. Fundamental Principles and Methods of Particle Detection	
1.1. Interaction of Radiation with Matter by R. M. STERNHEIMER	1
1.1.1. Introduction	1
1.1.2. The Ionization Loss dE/dx of Charged Particles	4
1.1.3. Range-Energy Relations	44
1.1.4. Scattering of Heavy Particles by Atoms	55
1.1.5. Passage of Electrons through Matter	56
1.1.6. Multiple Scattering of Charged Particles	73
1.1.7. Penetration of Gamma Rays	76
1.2. Ionization Chambers by ROBERT W. WILLIAMS	89
1.2.1. General Considerations	89
1.2.2. Pulse Formation	95
1.2.3. Quantitative Operation and Some Practical Considerations	100
1.2.4. Amount of Ionization Liberated.	103
1.2.5. Noise: Practical Limit of Energy Loss Measurable.	105
1.2.6. Some Types of Pulse Ionization Chambers	107
1.2.7. Current Ionization Chambers and Integrating Chambers	109
1.3. Gas-Filled Counters by ROBERT W. WILLIAMS	110
1.3.1. Gas Multiplication; Proportional Counters	110
1.3.2. Geiger Counters and Other Breakdown Counters	118
1.4. Scintillation Counters and Luminescent Chambers by GEORGE T. REYNOLDS and F. REINES	120
1.4.1. Scintillation Counters	120
1.4.2. Solid Luminescent Chambers	159

1.5. Čerenkov Counters	162
by S. J. LINDENBAUM and LUKE C. L. YUAN	
1.5.1. Introduction	162
1.5.2. Focusing Čerenkov Counters	168
1.5.3. Nonfocusing Counters	186
1.5.4. Total Shower Absorption Čerenkov Counters for Photons and Electrons	189
1.5.5. Other Applications	191
1.6. Cloud Chambers and Bubble Chambers	194
by W. B. FRETTER	
1.6.1. Cloud Chambers	194
1.6.2. Bubble Chambers	203
1.7. Photographic Emulsions	208
by M. BLAU	
1.7.1. Introduction	208
1.7.2. Sensitivity of Nuclear Emulsions	210
1.7.3. Processing of Nuclear Emulsions	216
1.7.4. Optical Equipment and Microscopes	224
1.7.5. Range of Particles in Nuclear Emulsions	226
1.7.6. Ionization Measurements in Emulsions.	240
1.7.7. Ionization Parameters	245
1.7.8. Photoelectric Method.	264
1.8. Special Detectors	265
1.8.1. The Semiconductor Detector	265
by S. S. FRIEDLAND and F. P. ZIEMBA	
1.8.2. Spark Chambers	281
by BRUCE CORK	
2. Methods for the Determination of Fundamental Physical Quantities	
2.1. Determination of Charge and Size	289
2.1.1. Charge of Atomic Nuclei and Particles.	289
2.1.1.1. Rutherford Scattering	289
2.1.1.2. Characteristic X-ray Spectra	293
by ROBLEY D. EVANS	
2.1.1.3. Charge Determination of Particles in Photo- graphic Emulsions	298
by M. BLAU	

2.1.2. Principal Methods of Measuring Nuclear Size by ROBERT HOFSTADTER	307
2.2. Determination of Momentum and Energy	341
2.2.1. Charged Particles	341
2.2.1.1. Measurement of Momentum. Electric and Magnetic Analysis by T. R. GERHOLM	341
2.2.1.1.4. Measurement of Momentum with Cloud Chambers or Bubble Chambers by W. B. FRETTER	375
2.2.1.1.5. Momentum Measurement in Nuclear Emulsions by M. BLAU	388
2.2.1.2. Determination of Energy	409
2.2.1.2.1. Energy Measurement with Ionization Chambers by R. W. WILLIAMS	409
2.2.1.2.2. Scintillation Spectrometry of Charged Particles by G. D. O'KELLEY	411
2.2.1.2.3. Measurement of Range and Energy with Cloud Chambers and Bubble Chambers by W. B. FRETTER	436
2.2.1.3. Determination of Velocity	438
2.2.1.3.1. Time-of-Flight Method by LUKE C. L. YUAN and S. J. LINDENBAUM	438
2.2.1.3.2. Measurement of Velocity by W. B. FRETTER	444
2.2.1.3.3. Measurement of Velocity Using Čerenkov Counters by LUKE C. L. YUAN and S. J. LINDENBAUM	454
2.2.2. Neutrons	461
2.2.2.1. Recoil Techniques for the Measurement of Neutron Flux, Energy, Linear and Spin Angular Momentum by JOHN E. BROLLEY, JR.	461
2.2.2.2. Time-of-Flight Method by W. W. HAVENS, JR.	495
2.2.2.3. Crystal Diffraction. by D. J. HUGHES	566

2.2.2.4. Determination of Momentum and Energy of Neutrons with He_3 Neutron Spectrometer by G. C. MORRISON	570
2.2.3. Gamma-Rays	582
2.2.3.1. Internal and External Conversion Lines by T. R. GERHOLM	582
2.2.3.2. Determination of Momentum and Energy of Gamma Rays with the Curved Crystal Spectrometer by J. W. M. DU MOND	599
2.2.3.3. Gamma-Ray Scintillation Spectrometry by G. D. O' KELLEY	616
2.2.3.4. Determination of the Momentum and Energy of Gamma Rays with Pair Spectrometers by D. E. ALBURGER	641
2.2.3.5. Shower Detectors by R. HOFSTADTER	652
2.2.3.6. Gamma-Ray Telescopes. by A. SILVERMAN	668
2.2.3.7. Measurement of γ -Ray Energy by Absorption by ROBLEY D. EVANS	671
2.2.3.8. Detection and Measurement of Gamma Rays in Photographic Emulsions by M. BLAU	676
2.2.4. Neutrino	682
2.2.4.1. Neutrino Reactions. by F. REINES	682
AUTHOR INDEX	699
SUBJECT INDEX	718
