

## CONTENTS OF VOLUME 9, PART B

CONTRIBUTORS TO VOLUME 9, PART B . . . . .	vii
FOREWORD	ix
PREFACE TO VOLUME 9 . . . . .	xi
CONTENTS OF VOLUME 9, PART A . . . . .	xiii
CONTRIBUTORS TO VOLUME 9, PART A . . . . .	xvii
LIST OF SYMBOLS . . . . .	xix

### II. Optical Refractivity of Plasmas

by F. C. JAHODA AND G. A. SAWYER

11.1. Introduction . . . . .	1
11.2. Theory	3
11.3. Standard Experimental Methods . . . . .	13
11.4. Experimental Methods Requiring Laser Sources . . . . .	31

### 12. Deep Space Plasma Measurements

by VYTENIS M. VASYLIUNAS

12.1. Introduction . . . . .	49
12.2. Instrumentation . . . . .	52
12.3. Methods of Analysis . . . . .	77

### 13. Whistlers: Diagnostic Tools in Space Plasma

by NEIL M. BRICE AND ROBERT L. SMITH

13.1. Introduction . . . . .	89
13.2. Experimental Method . . . . .	90
13.3. Ground-Based Whistler Observations . . . . .	92
13.4. Satellite Observations . . . . .	111
Appendix . . . . .	135

**14. Radio Wave Scattering from the Ionosphere**

by D. T. FARLEY

14.1. Introduction . . . . .	139
14.2. Scattering from a Diffuse Medium . . . . .	142
14.3. Incoherent Scattering . . . . .	158
14.4. Scattering from the Equatorial Electrojet . . . . .	176

**15. Dense Plasma Focus**

by J. W. MATHER

15.1. Introduction . . . . .	187
15.2. The Apparatus . . . . .	190
15.3. Plasma Focus Development . . . . .	194
15.4. Plasma Diagnostic Measurements . . . . .	215
15.5. Summary . . . . .	248

**16. Plasma Problems in Electrical Propulsion**

by RALPH H. LOVBERG

16.1. Introduction . . . . .	251
16.2. Electromagnetic Propulsion as a Problem in Magneto-hydrodynamics (MHD) . . . . .	255
16.3. Electric Propulsion as a Plasma Physics Problem: The Magnetoplasmadynamic Arc . . . . .	269

**AUTHOR INDEX . . . . .** 291**SUBJECT INDEX . . . . .** 297
