PREFACE	ix
WERNER SCHMATZ	xiii
LIST OF SYMBOLS	xv

8. Adsorbed Monolayers and Intercalated Compounds by SUNIL K. SINHA

8.1. Introduction	1
8.2. Types of Adsorbate/Substrate Systems Studied by Neutron Diffraction	3
8.3. Diffraction from Two-Dimensional Structures	10
8.4. Studies of Phase Diagrams of Physisorbed Systems	16
8.5. Studies of Commensurate-Incommensurate Transitions	36
8.6. Studies of Incommensurate Two-Dimensional Lattice and Melting	42
8.7. Multilayer Studies	51
8.8. Inelastic Scattering from Adsorbed Monolayers	53
8.9. Neutron Studies of Surface Magnetization	67
8.10. Neutron Studies of Intercalated Compounds	69
References	79

9. Defects in Solids by WERNER SCHMATZ

9.1. Introduction	85
9.2. Static Properties	96
9.3. Dynamic Properties	120
References	126

10. Hydrogen in Metals	
by TASSO SPRINGER AND DIETER RICHTER	
10.1. Introduction: Hydrogen in Metals and Neutron Spectroscopy	131
10.2. Diffusion and Quasi-Elastic Scattering	132
10.3. Hydrogen Vibrations	153
10.4. Hydrogen Tunneling	179
10.5. Concluding Remarks	182
References	182
11. Fast Ion Conductors	
by N. H. ANDERSEN, K. N. CLAUSEN, AND J. K. KJEMS	
11.1. Introduction	187
11.2. Scattering Formalism	194
11.3. Model Systems	202
11.4. Diffraction Studies	205
11.5. Quasi-Elastic Diffuse Scattering	223
11.6. Inelastic Scattering	233
11.7. Conclusions	237
References	239
12. Glasses	
by KENJI SUZUKI	
12.1. Introduction	243
12.2. Structure Factors and Pair Correlation Functions	245
12.3. Geometrical and Chemical Short-Range Structure	255
12.4. Structural Anisotropy and Fluctuations in the Intermediate Range	270
12.5. Hydrogen Atoms as a Probe for Structure Characterization of Metallic Alloy Glasses	284
12.6. Atomic Vibrations by Inelastic Pulsed Neutron Scattering	293
References	300

13. Solid and Liquid Helium

by HENRY R. GLYDE AND ERIC C. SVENSSON

13.1. Introduction	303
13.2. Solid Helium	309
13.3. Liquid ^4He	326
13.4. Liquid ^3He	370
13.5. Liquid ^3He - ^4He Mixtures	385
References	393

14. Classical Fluids

by PETER A. EGELSTAFF

14.1. Introduction to Atomic and Simple Molecular Fluids	405
14.2. Data Collection	414
14.3. Data Analysis	419
14.4. Inelasticity Corrections to Intensity Measurements	428
14.5. Evaluation of $S(Q)$ and $S(Q, \omega)$	442
14.6. Comparision of Experiment and Theory	455
References	468

15. Ionic Solutions

by JOHN E. ENDERBY AND P. M. N. GULLIDGE

15.1. Introduction	471
15.2. The Method of Differences	473
15.3. Experimental Aspects of the Method	475
15.4. Some Results	477
15.5. The Kinetics of Water Exchange	481
15.6. Conclusions	487
References	488

16. Colloidal Solutions

by SOW-HSIN CHEN AND TSANG-LANG LIN

16.1. Introduction	489
16.2. Small-Angle Neutron Scattering Technique	499
16.3. Determination of Intraparticle Structures	514
16.4. Determination of the Interparticle Structure	524
16.5. Conclusion	539
References	541

17. Liquid Crystals

by JERZY A. JANIK AND TORMOD RISTE

17.1. Introduction	545
17.2. Single-Molecule Properties: Incoherent Scattering	553
17.3. Collective Properties: Coherent Scattering	567
17.4. Convective Instabilities	575
17.5. Concluding Remarks	582
References	582
