PREFACE	ix
LIST OF SYMBOLS . . . . .	xiii

## 18. Phase Transitions by R. A. COWLEY

18.1. Introduction . . . . .	1
18.2. Phase Transitions and Neutron Scattering . . . . .	3
18.3. Phase Transitions in Pure Model Systems . . . . .	20
18.4. Disordered Systems . . . . .	40
18.5. Structural Phase Transitions . . . . .	56
18.6. Conclusions . . . . .	62
References	63

## 19. Magnetic Structures by J. ROSSAT-MIGNOD

19.1. Introduction . . . . .	69
19.2. Elastic Neutron Scattering . . . . .	71
19.3. Experimental Techniques . . . . .	83
19.4. Usefulness of Polarized Neutron Beams . . . . .	93
19.5. Group Theory and Magnetic Structure Determination . . . . .	110
19.6. Ferromagnetic and Antiferromagnetic Structures . . . . .	119
19.7. Incommensurate Magnetic Structures . . . . .	131
19.8. Investigation of Magnetic Phase Diagrams . . . . .	146
19.9. Concluding Remarks . . . . .	151
References	154

## 20. Magnetic Excitations

by WILLIAM G. STIRLING AND KEITH A. MCEWEN

20.1. Introduction to Theory and Techniques . . . . .	159
20.2. 3 <i>d</i> Transition Metals, Alloys, and Compounds . . . . .	176
20.3. 4 <i>f</i> Lanthanide Metals, Alloys, and Compounds. . . . .	195
20.4. 5 <i>f</i> Actinide Systems . . . . .	217
20.5. Low-Dimensional Magnetic Systems. . . . .	223
20.6. Summary and Future Prospects . . . . .	232
References	235

## 21. Nuclear Magnetism

by H. GLÄTTLI AND M. GOLDMAN

21.1. Introduction . . . . .	241
21.2. Neutron Scattering by a Macroscopic Target. . . . .	250
21.3. The Pseudomagnetic Nuclear Field . . . . .	254
21.4. Pseudomagnetic Resonance . . . . .	257
21.5. Measurement of Nuclear Pseudomagnetic Moments. . . . .	261
21.6. Bragg Scattering by Ordered Nuclear Spins . . . . .	269
References	284

## 22. Polymers

by JULIA S. HIGGINS AND ANN MACONNACHIE

22.1. Introduction . . . . .	287
22.2. Small-Angle Neutron Scattering . . . . .	288
22.3. Dynamics of Polymer Molecules . . . . .	314
References	330

## 23. Neutron Crystallography of Proteins

by N. V. RAGHAVAN AND ALEXANDER WLODAWER

23.1. Introduction . . . . .	335
23.2. Instrumentation for Data Collection . . . . .	337
23.3. Determination of an Initial Model for a Protein . . . . .	341

23.4. Methods of Neutron Structure Refinement . . . . .	343
23.5. Structural Results of Neutron Diffraction Studies of Proteins . . . . .	345
23.6. Studies of Protein Dynamics Using Neutron Diffraction . . . . .	354
23.7. Summary and Conclusions. . . . .	363
References . . . . .	364
<b>24. Molecular Biology</b> by HEINRICH B. STUHRMANN	
24.1. Introduction . . . . .	367
24.2. The Neutron Small-Angle Camera D11 . . . . .	368
24.3. Basic Features of Neutron Scattering. . . . .	369
24.4. Contrast Variation . . . . .	374
24.5. Scattering Density and Forward Scattering . . . . .	376
24.6. Scattering Function of a Single Particle. . . . .	378
24.7. The Multipole Expansion . . . . .	383
24.8. <i>In-Situ</i> Structure Determination . . . . .	396
24.9. Triangulation . . . . .	400
References . . . . .	401
<b>25. Industrial Applications</b> by MICHAEL T. HUTCHINGS AND COLIN G. WINDSOR	
25.1. Introduction . . . . .	405
25.2. The Neutron Beam as a Materials Probe . . . . .	406
25.3. Applied Neutron Techniques and Their Possible Alternatives . . . . .	416
25.4. Neutron Radiography . . . . .	421
25.5. Microstructure Determination by Small-Angle Neutron Scattering . . . . .	426
25.6. Multiphase Analysis Using Powder Neutron Diffraction . . . . .	444
25.7. Measurement of Texture and Crystal Quality . . . . .	449
25.8. Residual Stress Measurement by High-Resolution Neutron Diffraction . . . . .	458
25.9. Diffuse Scattering. . . . .	464
25.10. Inelastic Scattering from Vibrational States . . . . .	468
25.11. Portable Sources . . . . .	472

25.12. How to Go about Industrial Research . . . . .	475
25.13. Conclusions . . . . .	478
References	479
 INDEX	 483
CONTENTS OF VOLUME 23, PART A. . . . .	488
CONTENTS OF VOLUME 23, PART B. . . . .	489
