

CONTENTS

PREFACE	ix
10. Seismic Instrumentation TA-LIANG TENG	
1. Introduction	1
2. Historical Development	2
3. Nature of Seismic Ground Motions	11
4. Basic Types of Seismic Sensors	14
5. Damping Devices and Transducers	25
6. Pendulum-Galvanometer Interaction	32
7. Central Recording and Networking	35
8. Recent Developments in Seismographs	50
References	73
11. Marine Acoustic Techniques F. N. SPIESS	
1. Introduction: The Ocean Acoustic Environment	77
2. Echo Sounders	87
3. Bottom-Imaging Sonars	97
4. Acoustics for Position Determination	110
5. A System Example	120
References	123
12. Surface Measurement of the Earth's Gravity Field JAMES H. WHITCOMB	
1. Introduction	127
2. Instrumentation	133
3. Applications	142
References	159

13. Satellite Measurement of the Earth's Gravity Field

WILLIAM M. KAULA

1. Introduction and Historical Summary	163
2. Geodetic Satellites	164
3. Satellite Orbit Dynamics	170
4. Data Analysis	178
References	186

14. Experimental Methods in Continental Heat Flow

DAVID D. BLACKWELL AND ROBERT E. SPAFFORD

1. Introduction	189
2. Temperature	192
3. Thermal Conductivity	206
4. Heat Production	213
5. Heat Flow Calculation	213
6. Miscellaneous Techniques	217
7. Future Research	219
References	221

15. Measurement of Oceanic Heat Flow

R. P. VON HERZEN

1. Introduction	227
2. Temperature Gradients	229
3. Thermal Conductivity	248
4. Heat Flow	254
References	259

16. Electrical Methods in Geophysical Prospecting

STANLEY H. WARD

1. Introduction	265
2. Elementary Electromagnetic Theory	266
3. Electrical Properties of Earth Materials.	283
4. Basic Principles of Resistivity and Induced Polarization Surveys	291

5. Magnetotelluric Method	313
6. Controlled-Source Electromagnetic Methods	346
References	366
17. Measurement of <i>In Situ</i> Stress	
BEZALEL C. HAIMSON	
1. Introduction	377
2. Surface Measurements	379
3. Near-Surface Measurements	383
4. Deep Measurements	393
5. State of Stress in the Earth's Crust	404
6. Future Research	405
References	406
18. Continuous Measurement of Crustal Deformation	
DUNCAN CARR AGNEW	
1. Aims and Problems of Continuous Deformation Measurement	409
2. Quantities to be Measured	410
3. General Design Features	415
4. Tiltmeters: Particular Designs	424
5. Strainmeters	429
6. Conclusions	434
References	435
19. Geophysical Well Logging	
JAY TITTMAN	
1. Introduction	441
2. Geological and Petrophysical Interpretation of Logging Measurements	459
3. The Physics of Logging Measurements	501
References	609
INDEX	617
CONTENTS OF VOLUME 24, PART A	624
