FOREWORD.....	V
PREFACE.....	VII
INTRODUCTION.....	IX
ACKNOWLEDGEMENTS.....	XII
<b>EQUILIBRIUM CRITICAL PHENOMENA IN FLUIDS</b>	
Chairman: A. M. J. F. Michels	
G. E. Uhlenbeck—The Classical Theories of the Critical Phenomena.....	3
R. H. Sherman—The Coexistence Curve of He <sup>3</sup> .....	7
J. S. Rowlinson—Critical States of Simple Fluids and Fluid Mixtures; a Review of the Experimental Position.....	9
E. H. W. Schmidt—Optical Measurements of the Density Gradients Produced by Gravity in CO <sub>2</sub> , N <sub>2</sub> O, and CClF <sub>3</sub> Near the Critical Point.....	13
M. E. Fisher—Notes, Definitions, and Formulas for Critical Point Singularities.....	21
Discussion.....	25
<b>CRITICAL PHENOMENA IN FERRO- AND ANTIFERROMAGNETS</b>	
Chairman: H. B. Callen	
C. Domb—Critical Properties of Lattice Models.....	29
G. B. Benedek—Equilibrium Properties of Ferromagnets and Antiferromagnets in the Vicinity of the Critical Point	42
W. P. Wolf—Experimental Studies of Magnetic Ising Systems Near the Critical Point.....	49
D. T. Teaney—Specific Heats of Ferro- and Antiferromagnets in the Critical Region.....	50
P. Heller—Nuclear Resonance Studies of Magnetic Critical Fluctuations in MnF <sub>2</sub> .....	58
Discussion.....	64
<b>LOGARITHMIC SINGULARITIES</b>	
Chairman: C. N. Yang	
W. M. Fairbank—The Lambda Transition in Liquid Helium.....	71
M. R. Moldover and W. A. Little—The Specific Heat of He <sup>3</sup> and He <sup>4</sup> in the Neighborhood of Their Critical Points.....	79
M. H. Edwards—The Coexistence Curve of He <sup>4</sup> .....	82
T. Yamamoto, O. Tanimoto, Y. Yasuda, and K. Okada—Anomalous Specific Heats Associated with Phase Transitions of the Second Kind.....	86
H. A. Kierstead—The Logarithmic Anomaly in the Pressure Coefficient of Helium Close to the Lambda Line.....	92
M. J. Buckingham—The Nature of the Cooperative Transition.....	95
Discussion.....	101
<b>SCATTERING: ELASTIC</b>	
Chairman: P. Debye	
P. Debye—Introductory Remarks.....	107
M. E. Fisher—Theory of Critical Fluctuations and Singularities.....	108
H. Brumberger—Scattering of Light and X Rays from Critically Opalescent Systems.....	116
B. Chu—Experiments on the Critical Opalescence of Binary Liquid Mixtures: Elastic Scattering.....	123
Discussion.....	129
<b>SCATTERING: INELASTIC</b>	
Chairman: K. S. Singwi	
W. Marshall—Critical Scattering of Neutrons by Ferromagnets.....	135
L. Passell—Critical Magnetic Scattering of Neutrons in Iron.....	143
O. W. Dietrich and J. Als-Nielsen—Critical Neutron Scattering from Beta-Brass.....	144
N. C. Ford, Jr., and G. B. Benedek—The Spectrum of Light Inelastically Scattered by a Fluid Near Its Critical Point...	150
S. S. Alpert—Time-Dependent Concentration Fluctuations Near the Critical Temperature.....	157
Discussion.....	160

## CONTENTS – Continued

### TRANSPORT AND RELAXATION PHENOMENA

Chairman: R. W. Zwanzig

J. V. Sengers – Behavior of Viscosity and Thermal Conductivity of Fluids Near the Critical Point.....	165
M. Bloom – Nuclear Magnetic Resonance Measurements Near the Critical Point of Ethane.....	178
D. Sette – Ultrasonic Investigation of Fluid System in the Neighborhood of Critical Points.....	183
C. E. Chase and R. C. Williamson – Ultrasonic Investigation of Helium Near Its Critical Point.....	197
C. W. Garland and R. Renard – Ultrasonic Investigation of the Order-Disorder Transition in Ammonium Chloride.....	202
Discussion.....	209

### SUPPLEMENTARY SESSION.

H. L. Lorentzen and B. B. Hansen – Effect of Gravity on the Equilibrium Mass Distribution of Two-Component Liquid Systems. The Observation of Reversed Diffusion Flow.....	213
S. Katsura and B. Tsujiyama – Ferro- and Antiferromagnetism of Dilute Ising Model.....	219
S. F. Edwards – The Statistical Mechanics of a Single Polymer Chain.....	225
I. M. Firth – Some Comments on Techniques of Modern Low-Temperature Calorimetry.....	233
LIST OF PARTICIPANTS.....	239
