

Electron Impact Excitation of Atoms

B. L. MOISEIWITSCH

Department of Applied Mathematics, The Queen's University of Belfast, Belfast, Northern Ireland

S. J. SMITH*

Joint Institute for Laboratory Astrophysics,† Boulder, Colorado

CONTENTS

I. Theory.....	1	15. Excitation of Helium Positive Ions.....	56
1. Introduction.....	1	16. Helium.....	56
2. Hydrogen Atoms.....	2	16.1. Helium $n^1P \rightarrow 2^1S$ Transitions.....	56
2.1. First Born Approximation.....	2	16.2. Helium $n^1S \rightarrow 2^1P$ Transitions.....	63
2.2. Bethe Approximation.....	7	16.3. Helium $n^1D \rightarrow 2^1P$ Transitions.....	65
2.3. Second Born Approximation.....	8	16.4. Helium $n^3S \rightarrow 2^3P$ Transitions.....	66
2.4. Exchange Scattering.....	9	16.5. Helium $n^3P \rightarrow 2^3S$ Transitions.....	67
2.5. Born-Oppenheimer Approximation.....	10	16.6. Helium $n^3D \rightarrow 2^3P$ Transitions.....	67
2.6. First-Order Exchange Approximation.....	10	16.7. Excitation of the Helium $n=2$ Levels.....	67
2.7. Ochkur Approximation.....	11	16.8. Thresholds of Helium Excitation Functions.....	70
2.8. Distorted Waves Approximation.....	12	17. Heavy Rare Gases.....	71
2.9. Modified Bethe Approximation.....	14	18. Alkali Atoms.....	72
2.10. Impact Parameter Method.....	14	19. Heavy Two-Electron Systems.....	77
2.11. Classical Approximation.....	14	20. Experimental Summary.....	79
2.12. Vainshtein, Presnyakov, Sobelman Approximation.....	16	Acknowledgments.....	80
2.13. Partial Wave Analysis.....	17	Bibliography.....	81
2.14. Unitarized Born Approximation.....	18	Tables.....	85
2.15. Close Coupling Approximations.....	18		
3. Helium.....	21		
3.1. First Born Approximation.....	21		
3.2. Exchange Approximations.....	23		
3.3. Distorted Waves Approximation.....	26		
3.4. Close Coupling Approximation.....	26		
3.5. Double Excitation of Helium.....	27		
4. Neon and Argon.....	28		
5. Mercury.....	29		
6. Alkali Metal Atoms.....	29		
7. Oxygen and Nitrogen Atoms.....	31		
8. Positive Ions.....	33		
8.1. Hydrogenic Ions.....	33		
8.2. Helium Ion.....	34		
8.3. Helium-Like Ions.....	35		
8.4. Lithium-Like Ions.....	35		
8.5. Sodium-Like Ions.....	36		
8.6. Potassium-Like Ions.....	36		
8.7. Positive Ions Having p^2 , p^3 , or p^4 Configurations.....	36		
9. Polarization of Radiation.....	38		
10. Theoretical Summary.....	39		
II. Experiment.....	40		
11. Introduction.....	40		
12. Experimental Methods.....	41		
12.1. Pressure Dependence of Excitation Functions.....	42		
12.2. The Effects of Polarization.....	46		
12.3. Electric Field Effects.....	49		
12.4. Absolute Measurements of Optical Excitation Functions.....	50		
12.5. Electron Beam Measurements.....	51		
13. Other Reviews of Electron Impact Excitation.....	51		
14. Atomic Hydrogen.....	51		
14.1. Excitation of $H(2p)$	52		
14.2. Excitation of $H(2s)$	54		
14.3. Excitation of Balmer Lines of Hydrogen.....	56		

* Staff member, Laboratory Astrophysics Division, National Bureau of Standards.
