

CONTENTS

| | |
|---|-----|
| On Approximate Methods of Calculating the Excitation Cross Section of Atoms and Ions L. A. Vainshtein | 1 |
| Effective Excitation and Ionization Cross Sections of Ions I. L. Beigman and L. A. Vainshtein | 7 |
| Unseparated Variables in the Problem of the Excitation of an Atom by Electron Impact L. P. Presnyakov | 19 |
| The Role of Intermediate States in the Excitation of Atoms by Electron Impact L. A. Vainshtein and L. P. Presnyakov | 37 |
| The Quasi-classical Method in the Theory of Collisions of Atoms with Heavy Particles and Electrons A. V. Vinogradov | 45 |
| Calculation of Effective Scattering Cross Sections Using Atomic Functions Which Consider the Interaction of Configurations I. L. Beigman | 55 |
| Charge Exchange at Intermediate Collision Energies I. A. Poluéktov and L. P. Presnyakov | 63 |
| Broadening of Spectral Lines of Nonhydrogenic Ions V. A. Alekseev and E. A. Yukov | 75 |
| On the Problem of the Interaction of Excited Atoms of Alkali Metals with Inert Gases P. D. Serapinas | 81 |
| Investigation of Transitions between Excited States of the Neon Atom during Collisions of Electrons A. S. Khaikin | 93 |
| Experimental Determination of the Matrix Elements of the Dipole Moment of an Electronic Transition in the System of Swan Bands of the C ₂ Molecule A. G. Sviridov | 125 |
