

CONTENTS

On the Admissible Types of Stellar Plasma Atmospheres M. V. Konyukov	1
On the Nature of the Solar Wind M. V. Konyukov	19
On the Possibility of Radiative Acceleration of Gas in Stellar Atmospheres I. F. Malov	33
Quasar Scintillation due to an Inhomogeneous Interstellar Plasma V. V. Vitkevich and V. I. Shishov	42
Pulsar Intensity Variations Caused by Scintillations in Inhomogeneous Plasma V. V. Vitkevich and N. A. Lotova	46
Nature of the Inhomogeneous Structure of the Circumsolar Plasma I. S. Baikov and N. A. Lotova	53
Magnetic-Field Strength in the Solar Corona Estimated from Measurements of the Linear Polarization of Solar Radio Bursts Yu. I. Alekseev	61
Amplification Instability of a Semiconductor Radiometer V. N. Brezgunov and V. A. Udal'tsov	69
Distributed Amplifier for Radiometry V. N. Brezgunov and V. A. Udal'tsov	78
Parasitic Modulation in Radiometers V. M. Gudnov and V. A. Izbekova	87
Beam Control System for the N-S Array of the Lebedev Institute DKR-1000 Radio Telescope S. N. Ivanov, Yu. P. Ilyasov, A. N. Ivanov, V. T. Solodkov, and V. Ya. Shcherbinin	101
Line-Scanning Receiver for Electronic Beam Control. The DKR-1000 N-S Array I. A. Alekseev	110
Discrete-Commutation Type Phase Inverter for the Meter Wavelength Band S. N. Ivanov, A. N. Ivanov, G. A. Pavlov, and V. T. Solodkov	115

FIAN DKR-1000 Cross Type Radio Telescope Observations of Occultation of Source ZS144 by Solar Supercorona. Procedure and Results S. N. Ivanov and Yu. P. Ilyasov	119
Antenna for Polarization Measurements in Conjunction with the DKR-1000 Radio Telescope Yu. I. Alekseev, S. M. Kutuzov, M. M. Tyaptin, and V. D. Chuikov	125
New Multiply Supported Radial-Symmetry Suspension for a Radio Telescope Parabolic Reflector Dish P. D. Kalachev	132
Transverse Displacements of Parabolic Antenna Feed of a Steerable Antenna P. D. Kalachev and I. A. Emel'yanov	141
Changes in the Geometric Parameters of a Radio Telescope Parabolic Reflector Undergoing Radially Symmetric Deformations P. D. Kalachev	157
Longitudinal Translations of a Parabolic Antenna Exciter P. D. Kalachev and V. P. Nazarov	164
Modeling a Radio Telescope Control System G. G. Basistov	176
A Photographic System for Recording the Pulses of Pulsars N. S. Solomin	187
Similarity Solutions of Plasma Equations M. V. Konyukov	192
The Possibility of Radiative Gas Acceleration in Stellar Atmospheres. The Mechanism of Radiative Heat Conductivity M. V. Konyukov and I. F. Malov	197
