<b>Foreword</b>		<b>vi</b>	
<b>Introduction</b>	D. H. Wilkinson	1	
<b>Chapter 1</b>	R. J. Blin-Stoyle	An introduction to exchange effects in nuclei	5
<b>Chapter 2</b>	A. Arima	Nuclear magnetic moments and Gamow-Teller matrix elements – configuration mixing vs. mes- onic effects	41
<b>Chapter 3</b>	M. Ericson	Pion field and weak interactions in nuclei	67
<b>Chapter 4</b>	M. Rho	Meson fields in nuclei	105
<b>Chapter 5</b>	A. M. Green	Nucleon isobars in nuclear structure	141
<b>Chapter 6</b>	T.E.O.Ericson	Somewhat virtual pions	173
<b>Chapter 7</b>	O. Kofoed-Hansen	The role of mesonic degrees of freedom in scattering of hadrons on nuclei	193
<b>Chapter 8</b>	C. Wilkin	Some thoughts on meson exchange current effects in hadron-nucleus scattering	225
<b>Chapter 9</b>	J. P. Deutsch	"Ouvertures" in muon capture	247
<b>Chapter 10</b>	N. C. Mukhopadhyay	Nuclear muon capture - theoretical aspects	253
<b>Name Index</b>		279	
<b>Subject Index</b>		281
