Subject Index	333

# QUARKS IN HIGH ENERGY INTERACTIONS

P. V. LANDSHOFF

*Department of Applied Mathematics and Theoretical Physics, University of Cambridge, U.K.*

## CONTENTS

1. SCOPE OF THE ARTICLE	1
2. DEEP INELASTIC $e$ AND $\mu$ SCATTERING	2
3. THE PARTON MODEL	5
4. DEEP INELASTIC NEUTRINO SCATTERING	10
5. PRODUCTION OF LEPTON PAIRS	13
6. $W$ PRODUCTION	19
7. $J/\psi$ AND $\Upsilon$ PRODUCTION	20
8. $e^+e^-$ ANNIHILATION	22
9. EXCLUSIVE PROCESSES AT LARGE $t$	27
10. INCLUSIVE PROCESSES AT LARGE TRANSVERSE MOMENTUM	30
11. THE LONGITUDINAL JETS	35
12. BACKGROUNDS IN $W$ PRODUCTION	36
13. BREAKING OF BJORKEN SCALING	38
14. THE TRANSVERSE MOMENTUM OF PARTONS	43
15. QCD AND LARGE $p_T$	44
16. CONCLUSIONS	47
REFERENCES	47

# POLARIZATION EFFECTS IN TRANSFER REACTIONS

L. D. KNUTSON and W. HAEBERLI

*University of Wisconsin, Madison, Wisconsin 53706, U.S.A.*

## CONTENTS

1. INTRODUCTION	127
2. SOME ILLUSTRATIVE EXAMPLES	128
3. THEORETICAL BACKGROUND	133
4. VECTOR ANALYZING POWER MEASUREMENTS	137
4.1 The $j$ -dependence of $iT_{11}$ for $(d, p)$ reactions	137
4.2. Other single-nucleon transfer reactions	142
4.3. Multi-nucleon transfer reactions	144
4.4. Compound-nucleus effects and multi-step processes	145
4.5. Mixed- $j$ transitions	147
4.6. Transitions with $\ell_n = 0$	149
5. $D$ -STATE EFFECTS	150
5.1. The Johnson-Santos method	150
5.2. Tensor analyzing power measurements for $(d, p)$ reactions	151
5.3 $D$ -state effects for other observables	155
5.4 Sub-Coulomb reactions	155
5.5 $D$ -state effects in $(d, t)$ reactions	157
6. CONCLUSIONS	159
REFERENCES	159

## CONTENTS

1. INTRODUCTION	164
2. ELECTRON SCATTERING CROSS-SECTION IN BORN APPROXIMATION	166
2.1. Basic formalism	167
2.2. The cross-section for single electron detection—Multipole expansion of charge and current operators	172
2.3. The cross-section for double-coincidence detection—Nucleon emission in electron scattering	176
2.4. The nucleon charge and current operators	178
2.5. Corrections to the first Born Approximation	185
2.5.1. <i>Coulomb distortion and dispersion corrections</i>	185
2.5.2. <i>Exchange currents</i>	186
2.5.3. <i>Isobar effects</i>	190
2.5.4. <i>Relativistic motion of the nucleus</i>	190
3. ELASTIC SCATTERING	191
3.1. Born cross-section for elastic scattering	191
3.2. Coulomb scattering	194
3.3. Magnetic scattering	197
4. INELASTIC SCATTERING	198
5. COINCIDENCE QUASI-ELASTIC SCATTERING	199
5.1. The $(e, e'p)$ reaction in the quasi-elastic region—The Spectral Function	199
5.2. Final state interaction in the $(e, e'p)$ reaction	202
5.3. Asymptotic behaviour of form factors and momentum distributions	203
6. SURVEY OF RECENT EXPERIMENTAL DATA AND THEIR PHYSICAL INTERPRETATION	205
6.1. Elastic scattering and nuclear charge distributions	205
6.2. Quasi-elastic scattering	215
6.2.1. <i>Coincidence quasi-elastic scattering</i>	215
6.2.2. <i>Non-coincidence quasi-elastic scattering</i>	219
7. ELECTRON SCATTERING AND NUCLEAR STRUCTURE	221
7.1. The structure of the two-body system	222
7.1.1. <i>Elastic scattering from deuteron</i>	223
7.1.2. <i>The proton and neutron form factors in elastic scattering from deuteron</i>	227

7.1.3. Elastic magnetic scattering from deuteron	230
7.1.4. The meson exchange currents in electron-deuteron scattering	230
7.1.5. The Electro-disintegration of the two-body system	233
7.1.6. Asymptotic behaviour of deuteron form factors	236
7.2. The structure of the three-body systems	238
7.2.1. Realistic interactions and the static properties of $^3\text{He}$ and $^3\text{H}$	238
7.2.2. Elastic charge scattering by the three-body systems	240
7.2.3. Elastic magnetic scattering by the three-body systems	244
7.2.4. Electro-disintegration of the three-body systems	246
7.2.5. Asymptotic behaviour of the $^3\text{He}$ charge form factor	250
7.3. The structure of $^4\text{He}$ and heavier nuclei	252
7.3.1. Nuclear theories for the ground state	252
7.3.2. The Centre-of-Mass motion in many-body theories	258
7.3.3. Elastic and quasi-elastic scattering from $^4\text{He}$	261
7.3.4. Elastic scattering from $A > 4$ nuclei	264
7.3.5. Quasi-elastic scattering from $A > 4$ nuclei: experimental mean removal energies (centroid energies) and occupation numbers	270
7.3.6. Quasi-elastic scattering from $A > 4$ nuclei: theoretical single-particle energies, rearrangement energies and Koopmans' theorem	276
7.3.7. Quasi-elastic scattering from $A > 4$ nuclei: direct calculation of the Spectral Function	283
8. SHORT-RANGE CORRELATIONS IN ELECTRON SCATTERING	295
8.1. Two-body correlation functions and short-range effects	295
9. UNIFIED ANALYSES OF PHOTON, ELECTRON AND NUCLEON SCATTERING FROM NUCLEI	302
9.1. Photonuclear reactions on the few-body systems and light nuclei	302
9.2. Unified analyses of elastic and inelastic electron and proton scattering at intermediate energies	306
10. SUMMARY AND CONCLUSIONS	309
ACKNOWLEDGEMENTS	313
REFERENCES	313
APPENDIX	322
NOTE ADDED IN PROOF	327
