Contributors to Volume 2	v
Articles Planned for Future Volumes	vii
Preface	ix

Nuclear Magnetic Resonance

G. E. PAKE, *Department of Physics, Washington University, St. Louis, Missouri*

Introduction	1
I. Magnetic Resonance	2
II. Methods for Observing Resonance and Measuring the Relaxation Times	25
III. Resonance Widths, Splittings, and Shifts	39
IV. Spin-Lattice Relaxation	67

Electron Paramagnetism and Nuclear Magnetic Resonance in Metals

W. D. KNIGHT, *Department of Physics, University of California, Berkeley, California*

I. Introduction	93
II. Theory	97
III. Experiments	110
IV. Results	113
V. Summary	134

Applications of Neutron Diffraction to Solid State Problems

C. G. SHULL AND E. O. WOLLAN, *Oak Ridge National Laboratory, Oak Ridge, Tennessee*

I. Introduction	138
II. General Considerations	138
III. Crystal Studies	149
IV. Magnetic Studies	177

The Theory of Specific Heats and Lattice Vibrations

JULES DE LAUNAY, *Cryogenics Branch, Solid State Division, U.S. Naval Research Laboratory, Washington, D.C.*

I. The Dulong-Petit Law	220
II. Einstein's Theory of Atomic Heat	221
III. Debye's Theory of Atomic Heat	225
IV. Analysis of Experimental Data with Debye's Theory	235
V. Simple One-Dimensional Born-von Kármán Lattice	237
VI. One-Dimensional Born-von Kármán Lattice with a Basis	243
VII. Central and Noncentral Forces	248
VIII. Methods for Computing $g(v)$ and Related Physical Quantities	251
IX. Two-Dimensional Born-von Kármán Lattice	257

X. Velocity of Sound and Crystal Elasticity	263
XI. Body-Centered and Face-Centered Cubic Metallic Elements	269
XII. The Diamond Lattice	290
Displacement of Atoms during Irradiation	
FREDERICK SEITZ AND J. S. KOEHLER, <i>Department of Physics, University of Illinois, Urbana, Illinois</i>	
I. Introduction	307
II. Basic Equations of Collision Theory for Coulomb Encounters.	311
III. Coulomb Encounters in Relativistic Range.	328
IV. Neutron Collisions	336
V. Electron Excitation	338
VI. Theory of Temperature Spikes	351
VII. The Simple Theory of Displacement.	378
VIII. Behavior of Metals	391
IX. Behavior of Valence Crystals.	433
X. Ionic Crystals	442
AUTHOR INDEX.	449
SUBJECT INDEX	457
