

Contents

Contributors to Volume 6.....	v
Preface.....	vii
Contents of Previous Volumes.....	xi
Articles Planned for Future Volumes.....	xiii

Compression of Solids by Strong Shock Waves

M. H. RICE, R. G. McQUEEN AND J. M. WALSH

I. Introduction.....	1
II. Basic Relations from Fluid Dynamics.....	3
III. Experimentation.....	15
IV. Equation of State.....	40
V. A Test of the Dugdale-MacDonald Formula.....	60

Changes of State of Simple Solid and Liquid Metals

G. BORELIUS

I. Introduction.....	65
II. Division of Thermal Energy, Entropy, and Volume in Vibrational and Structural Parts.....	68
III. Structural Entropy and Structural Energy as Functions of the Structural Volume.....	73
IV. Relationships between Structural Energy and Entropy. Melting as Order-Disorder Transformation.....	76
V. Compressibility of Cubic Metals.....	79
VI. Connections between the Vibrational Lattice Expansion and the Pressure Parameter.....	84
VII. Change of Total Potential Energy with Change of Volume.....	87
VIII. On the Energy of Activation for Self-Diffusion.....	89
IX. Complications at the Melting of Metals with Structures Different from the Close-Packed Cubic One.....	91

Electroluminescence

W. W. PIPER AND F. E. WILLIAMS

I. Introduction.....	96
II. Background Theory.....	98
III. Basic Mechanisms of Electroluminescence.....	113
IV. Electroluminescence of Zinc Sulfide.....	137
V. Electroluminescence of Other Materials.....	160
VI. Summary.....	172

Macroscopic Symmetry and Properties of Crystals

CHARLES S. SMITH

I. Introduction.....	175
II. Physical Quantities and Properties.....	178
III. Crystal Symmetry and Classification.....	181
IV. First Rank Tensor Properties.....	196
V. Second Rank Tensor Properties.....	207
VI. Third Rank Tensor Properties.....	223
VII. Fourth Rank Tensor Properties.....	231

Secondary Electron Emission

A. J. DEKKER

I. Introduction.....	251
II. Experimental Data on the Total Yield.....	254
III. Semiempirical Theory of Secondary Emission.....	263
IV. Backscattering, Reflection, and Characteristic Energy Losses of Primaries	272
V. Theories of the Secondary Emission of Metals.....	286
VI. Miscellaneous Properties of Secondary Emission.....	297

Optical Properties of Metals

M. PARKER GIVENS

I. Introduction.....	313
II. Electromagnetic Theory.....	316
III. Classical Attempts to Predict the Optical Constants.....	319
IV. The Internal Photoelectric Effect.....	326
V. The Anomalous Skin Effect.....	329
VI. Experimental Methods.....	336
VII. Experimental Results.....	342

Theory of the Optical Properties of Imperfections in Nonmetals

D. L. DEXTER

I. Interaction of Electromagnetic Radiation with Matter.....	355
II. Common Simplifications and Approximations.....	362
III. Specialization for Idealized Centers.....	374
IV. Special Topics.....	395
