Contributors to Volume 7.....	v
Preface.....	vii
Contents of Previous Volumes.....	xi
Articles Planned for Future Volumes.....	xiii

Thermal Conductivity and Lattice Vibrational Modes

P. G. KLEMENS

I. Introduction.....	1
II. Theory of Heat Transport by Lattice Vibrations.....	7
III. Thermal Conductivity of Nonmetals.....	45
IV. Thermal Conductivity of Metals, Alloys, and Semiconductors.....	70

Electron Energy Bands in Solids

JOSEPH CALLAWAY

I. Introduction and General Theory.....	100
II. The Alkali Metals.....	119
III. Metals of Groups II and III.....	147
IV. Elements of Group IV and Related Semiconductors.....	158
V. The Transition Metals.....	180
VI. Other Substances.....	197
VII. Conclusions and Prospects.....	210

The Elastic Constants of Crystals

H. B. HUNTINGTON

I. General Considerations.....	214
II. Experimental Methods.....	256
III. Elastic Constants for Various Materials.....	273
IV. Variation with Temperature and Pressure.....	320
V. Influence of Composition, Phase Changes, and Relaxation Phenomena..	330
VI. Acknowledgments.....	348
VII. List of Symbols.....	349

Wave Packets and Transport of Electrons in Metals

H. W. LEWIS

I. Introduction.....	353
II. Uncertainty Principle and Degeneracy.....	358
III. Degenerate Systems.....	362
IV. Electron-Impurity Scattering; Angular Momentum.....	365

V. Phonon Interactions.....	374
VI. Transport Phenomena.....	375

Study of Surfaces by Using New Tools

J. A. BECKER

I. Introduction.....	379
II. Model of a Spherical Surface of a Tungsten Single Crystal.....	383
III. Experiments with the Ion Gauge.....	386
IV. Experiments with the Field Emission Microscope (FEM).....	394
V. The Field Ion Microscope (FIM).....	420

The Structures of Crystals

A. F. WELLS

I. Some Basic Geometry.....	426
II. Tetrahedral Coordination of Metal Atoms in Close-Packed Structures...	442
III. Octahedral Coordination of Metal Atoms in Close-Packed Oxides and Halides.....	449
IV. Structures Based on Close-Packed AX_3 Layers.....	463
V. Tetrahedral and Octahedral Coordination in Close-Packed Structures...	468
VI. Structures with Very High Coordination Numbers.....	470
VII. Structures Based on 3-Connected Nets.....	474
VIII. Structures Based on 4-Connected Nets.....	478
IX. Structures Based on 6-Connected Nets.....	484
X. Structures Based on 8-Connected Nets.....	494
XI. Relations between Crystal Structures.....	499
