Contributors to Volume 10.....	v
Preface.....	vii
Contents of Previous Volumes.....	xi
Articles Planned for Future Volumes.....	xiii

Positron Annihilation in Solids and Liquids

PHILIP R. WALLACE

Introduction.....	1
I. The Annihilation Process.....	3
II. Measurements of Lifetime for Positron Annihilation and Their Interpretation.....	8
III. Interpretation of the Lifetime Measurements.....	16
IV. The Short Lifetime: Positron Decay in Type A Materials.....	22
V. The Long Lifetime and Variations in Positronium Formation.....	46

Diffusion in Metals

DAVID LAZARUS

I. Introduction.....	71
II. Theory.....	73
III. Experimental Techniques.....	109
IV. Experimental Results.....	114

Wave Functions for Electron-Excess Color Centers in Alkali Halide Crystals

BARRY S. GOURARY AND FRANK J. ADRIAN

I. Introduction.....	128
II. Summary of the Experimental Situation.....	134
III. Empirical Preliminaries.....	143
IV. Theoretical Preliminaries.....	148
V. Continuum Models.....	167
VI. Semicontinuum Models.....	188
VII. Molecular Orbital Techniques.....	203
VIII. The Point-Ion-Lattice Approximation and Its Refinements.....	210
IX. Conclusions.....	244
X. Acknowledgments.....	245
Appendix A. Calculation of Two-Center Integrals Involving the F Electron and the Ion-Core Electrons.....	245
Appendix B. Evaluation of the Integral $(\psi_F g_\alpha \psi_F)$	246

The Continuum Theory of Stationary Dislocations

ROLAND DE WIT

I. Introduction.....	249
II. Review of Elasticity Theory.....	252
III. Early Developments of Dislocation Theory.....	257
IV. Kröner's Theory.....	267
V. Energy Expressions for Some Simple Geometries.....	282
Appendix. Expressions for M_{33} in Cartesian and Cylindrical Coordinates.....	291

Theoretical Aspects of Superconductivity

M. R. SCHAFROTH

Introduction.....	295
Phenomenology	
I. Thermodynamics.....	297
II. The Static Meissner Effect.....	311
III. General Electrodynamics of Superconductors.....	366
Microscopic Theory	
IV. General Aspects.....	401
V. Single-Electron Theories.....	439
VI. Pair-Correlation Theories.....	454
Bibliography.....	488
AUTHOR INDEX.....	499
SUBJECT INDEX.....	508

Errata

Page 305. Equation (2.39) should read:

$$\omega_e(T) = - \frac{k_1 - \beta}{2k_2}$$

Page 319. Line 6 should read: *everywhere in the infinite medium also holds everywhere in the finite medium.*

Page 354. Figure legend should read: 2,(6.74); 3,(6.75).

Page 355. Fifth line below Eq. (6.80) should read: given in (6.80).

Page 363. The top line should read: $e^* \neq e$.
