Contributors to Volume 12.....	v
Preface.....	vii
Contents of Previous Volumes.....	xi
Articles Planned for Future Volumes.....	xiv

Group Theory and Crystal Field Theory

CHARLES M. HERZFELD AND PAUL H. E. MEIJER

I. Introduction.....	2
II. The Physical Idea of Crystal Field Theory.....	3
III. Introduction to Group Theory.....	9
IV. The Uses of Group Theory in Quantum Mechanics.....	37
V. Crystal Field Theory.....	61

Electrical Conductivity of Organic Semiconductors

HIROO INOKUCHI AND HIDEO AKAMATU

I. Introduction.....	93
II. Preparations and Purifications.....	102
III. Electrical Resistivity of Organic Semiconductors.....	107
IV. Photoelectric Phenomena.....	127
V. Discussion of the Energy Gap.....	136
VI. Semiconductive Properties of Aromatic Complexes.....	140

Hydrothermal Crystal Growth

R. A. LAUDISE AND J. W. NIELSEN

I. Introduction.....	149
II. Apparatus.....	154
III. Quartz Crystallization.....	184
IV. Other Crystals Grown Hydrothermally.....	204
V. Conclusions.....	220

The Thermal Conductivity of Metals at Low Temperatures

K. MENDELSSOHN AND H. M. ROSENBERG

I. Theoretical Outline.....	223
II. Discussion and Interpretation of the Experimental Results.....	239

III. The Use of Heat Conduction Data in Research on Metal Imperfections . . .	256
IV. Experimental Techniques	264

Theory of Anharmonic Effects in Crystals

G. LEIBFRIED AND W. LUDWIG

I. Introduction	276
II. Foundation of Lattice Dynamics	280
III. Thermodynamics	307
IV. The Linear Chain	330
V. The Three-Dimensional Lattice	350
VI. The Thermal Equation of State	364
VII. The Caloric Equation of State	410
VIII. The Sound Velocity	426
IX. Appendix	434
AUTHOR INDEX	445
SUBJECT INDEX	452
