CONTRIBUTORS TO VOLUME 13.....	v
PREFACE.....	vii
CONTENTS OF PREVIOUS VOLUMES.....	xi
ARTICLES PLANNED FOR FUTURE VOLUMES.....	xiv

Vibration Spectra of Solids

SHASHANKA S. MITRA

I. Introduction.....	2
II. Symmetry and Normal Vibrations in a Solid.....	11
III. Born-von Karman Theory of Lattice Vibration.....	30
IV. Low-Frequency Librations in Molecular Crystals.....	45
V. Infrared and Raman Spectra.....	53

Behavior of Metals at High Temperatures and Pressures

F. P. BUNDY AND H. M. STRONG

I. Introduction.....	81
II. Apparatus.....	82
III. Methods of Measurement.....	89
IV. Pressure Calibration.....	91
V. Resistance.....	94
VI. Compression.....	110
VII. Phase Transformations.....	117
VIII. Effect of Pressure on Thermal emf.....	136
IX. Role of Group VIII Metals in Diamond Synthesis.....	143

Dislocations in Lithium Fluoride Crystals

J. J. GILMAN AND W. G. JOHNSTON

I. Introduction.....	148
II. Methods for Observing Dislocations.....	150
III. Some Properties of Lithium Fluoride Crystals.....	161
IV. Behavior of Individual Dislocations.....	164
V. Dislocation Mobilities.....	170
VI. Origins of Dislocations.....	177
VII. Theoretical Considerations of Dislocation Mobility.....	193
VIII. Individual Dislocations in Strain-Hardened Crystals.....	197
IX. Macro-Plasticity.....	201
X. Effects of Radiation Damage.....	207
XI. Cyclic Strains.....	211

XII. Fracture Studies.	212
XIII. Dielectric Breakdown.	216
XIV. Mechanism of Etch-Pit Formation.	216

Electron Spin Resonance in Semiconductors

G. W. LUDWIG AND H. H. WOODBURY

I. Introduction.	223
II. The Resonance Technique.	226
III. Resonance Studies in Silicon.	243
IV. Resonance Studies in Other Semiconductors.	286

Formalisms of Band Theory

E. I. BLOUNT

I. Crystal Momentum Representation.	306
II. Wannier Representation.	319
III. A "Mixed Representation".	335
IV. The Dirac Equation.	343
V. Self-Consistent Field Theory.	347
VI. The $(N+1)$ -Electron Problem.	352
Appendix A. The Representation of \mathbf{x}	356
Appendix B. Consequences of Inversion and Time Reversal.	359
Appendix C. Bands in Complex \mathbf{k} Space.	362
Appendix D. Derivation of Multiplication Rule.	370

Chemical Bonding Inferred from Visible and Ultraviolet Absorption Spectra

CHR. KLIXBÜLL JØRGENSEN

I. Electron Configurations.	376
II. Interelectronic Repulsion Effects.	388
III. Types of Experimental Data.	418
IV. Critical Evaluation of Modern Theories.	445
V. The Understanding of Chemical Bonding.	457
AUTHOR INDEX.	463
SUBJECT INDEX.	473
