CONTRIBUTORS TO VOLUME XV.....	v
PREFACE.....	vii
CONTENTS OF PREVIOUS VOLUMES.....	xi
SUPPLEMENTARY MONOGRAPHS.....	xiv
ARTICLES PLANNED FOR FUTURE VOLUMES.....	xv

The Changes in Energy Content, Volume, and Resistivity with Temperature in Simple Solids and Liquids

G. BORELIUS

I. Introduction.....	2
II. The Changes in Energy.....	4
III. The Thermal Expansion.....	6
IV. Compilation and Analysis of Results Concerning Specific Heat and Thermal Expansion.....	8
V. The Temperature Dependence of Resistance.....	36
VI. Compilation and Analysis of Results Concerning Temperature Dependence of Resistance.....	38
VII. The Extended Process of Melting.....	46
VIII. The Premelting.....	48

The Dynamical Theory of X-Ray Diffraction

R. W. JAMES

I. Introduction.....	55
II. The Geometrical Theory.....	61
III. The Electromagnetic Basis of the Theory.....	72
IV. The Dispersion Surface.....	82
V. The Field in a Bounded Crystal.....	92
VI. The Thick Crystal with Negligible Absorption.....	105
VII. The Wave Field in Crystals with Finite Absorption.....	132
VIII. The Reflection and Transmission Coefficients for Crystals of Finite Thickness	153
IX. The Propagation of Energy in the Wave Field.....	175
X. Some Experimental Consequences of the Dynamical Theory.....	207

The Electron-Phonon Interaction

L. J. SHAM AND J. M. ZIMAN

I. Formal Theory.....	223
II. Calculations with Rigid Ions.....	251

III. Screening Effects.....	268
IV. Observation of the Electron-Phonon Interaction.....	286

Elementary Theory of the Optical Properties of Solids

FRANK STERN

I. Electromagnetic Preliminaries.....	300
II. Reflection and Transmission.....	314
III. Dispersion Relations.....	327
IV. Optical Properties of Simple Systems.....	342
V. Quantum Theory of Absorption and Emission.....	364
VI. Wavelength-Dependent Dielectric Constant of a Free-Electron Gas.....	379
VII. Interactions of Charged Particles.....	394

Spin Temperature and Nuclear Relaxation in Solids

L. C. HEBEL, JR.

I. General Introduction.....	409
II. Basic Spin Temperature Theory.....	413
III. Spin Temperature and High Magnetic Field.....	423
IV. Spin Temperature and Low Magnetic Field.....	437
V. Spin Temperature and Strong RF Field.....	452
Appendix A.....	486
APPENDIX B.....	489
AUTHOR INDEX.....	493
SUBJECT INDEX.....	499
