

## Contents

CONTRIBUTORS TO VOLUME 24.....	vii
PREFACE.....	ix
CONTENTS OF PREVIOUS VOLUMES.....	xi
SUPPLEMENTARY MONOGRAPHS.....	xvi
ARTICLES TO APPEAR SHORTLY.....	xvii

### The Pseudopotential Concept

VOLKER HEINE

I. Introduction.....	1
II. Why Plane Waves Do Not Work.....	3
III. Augmented and Orthogonalized Plane Waves.....	6
IV. The Operator Approach.....	10
V. The Scattering Approach.....	14
VI. The Cancellation Theorem.....	20
VII. Other Pseudopotentials.....	26
VIII. Orthogonality Hole and Nonlocality.....	28
IX. Sins.....	31
Appendix. The Linear Chain of Black Boxes.....	32

### The Fitting of Pseudopotentials to Experimental Data and Their Subsequent Application

MARVIN L. COHEN AND VOLKER HEINE

I. Why Pseudopotentials?.....	38
II. Excerpts from Pseudopotential Theory.....	41
III. Fitting Procedures and the Handling of Data.....	89
IV. Resulting Pseudopotentials for the Elements.....	182
V. Notes Added after the Manuscript Was Completed and in Proof.....	241
Appendix A: Mathematical Notes on Nonlocal Operators.....	245
Appendix B: Folding Down of the Secular Equation.....	246

**Pseudopotential Theory of Cohesion and Structure**

VOLKER HEINE AND D. WEAIRE

Introduction . . . . .	250
I. The Field Surveyed . . . . .	251
II. General Pseudopotential Theory of Structural Energies . . . . .	300
III. Beyond Second Order Perturbation Theory . . . . .	336
IV. Covalency . . . . .	354
V. Survey of Applications . . . . .	363
VI. Monovalent Metals . . . . .	384
VII. Divalent Metals . . . . .	391
VIII. Trivalent Metals . . . . .	406
IX. Group IV and V Elements . . . . .	412
X. Trends in the Periodic Table . . . . .	418
XI. Alloys . . . . .	427
XII. Miscellaneous Topics and Recent Developments . . . . .	455
XIII. Conclusion . . . . .	462
AUTHOR INDEX . . . . .	465
SUBJECT INDEX . . . . .	475
