CONTRIBUTORS TO VOLUME 27.....	vii
PREFACE	ix
SUPPLEMENTARY MONOGRAPHS.....	x
ARTICLES TO APPEAR SHORTLY.....	xi

The kq -Representation in the Dynamics of Electrons in Solids

J. ZAK

I. Introduction	1
II. The kq -Representation.....	4
III. Bloch Electron in the kq -Representation.....	10
IV. The Impurity Problem in Semiconductors.....	13
V. Bloch Electrons in a Constant Electric Field.....	17
VI. Bloch Electrons in a Magnetic Field	26
VII. Fundamental Dynamics in the Bloch Theory of Solids	43
VIII. Symmetry of a Bloch Electron in the Presence of an External Magnetic Field	47
IX. Conclusions	52
Appendix A: Wavefunctions in Different Representations.....	54
Appendix B: Commutator Expansions.....	55
Appendix C: Transformation Matrix ($\mathbf{kq} \rightarrow \mathbf{nk}'$) in the r -Representation	57
Appendix D: General Formula for the Expansion of the Hamiltonian.....	58

Thermoelectricity in Metals and Alloys

R. P. HUEBENER

I. Introduction	64
II. Seebeck, Peltier, and Thomson	65
III. Electron Diffusion.....	69
IV. Phonon Drag	80
V. Pure Metals	91
VI. Alloys	109
VII. Size Effect	120
VIII. Superconductors	123

Dynamical Diffraction Theory by Optical Potential Methods

P. H. DEDERICHS

I. Introduction	136
II. Diffraction of Electrons	138
III. Diffraction of Low-Energy Electrons, Neutrons, and X-Rays	166
IV. The Optical Potential	184
V. Application to Electron Diffraction	197
VI. Optical Potential Method for X-Ray Diffraction	210
VII. Influence of Statistically Distributed Defects	221

Ferromagnetic Thin Films

A. CORCIOVEI, G. COSTACHE, AND D. VAMANU

I. Introduction	237
II. Magnetic Energy	238
III. Domains and Ripple	266
IV. Saturation Magnetization	291
V. Concluding Remarks	349
 AUTHOR INDEX	 351
 SUBJECT INDEX	 360
 CUMULATIVE AUTHOR INDEX	 367
