CONTRIBUTORS TO VOLUME 31.....	vii
PREFACE.....	ix
SUPPLEMENTARY MONOGRAPHS.....	xi
ARTICLES TO APPEAR SHORTLY.....	xiii

### Magnetic Resonance in the Superconducting State

DOUGLAS E. MACLAUGHLIN

I. Introduction.....	2
II. Knight Shift in the Superconducting State.....	5
III. Nuclear Spin-Lattice Relaxation in BCS Superconductors.....	15
IV. Quadrupole Coupling Constants in Superconductors.....	33
V. Nuclear Magnetic Resonance in Type-II Superconductors.....	34
VI. Transition-Metal Impurities in Superconductors.....	50
VII. Thermodynamic Fluctuations in the Superconducting State.....	60

### Theory of Short-Range Order and Disorder in Tetrahedrally Bonded Semiconductors

J. D. JOANNOPOULOS AND MARVIN L. COHEN

Introduction.....	71
I. "The Amorphous Problem".....	72
II. Methods to Study SRO and SRD.....	83
III. Results for Homopolar Systems.....	100
IV. Results for Heteropolar Systems.....	122
V. Final Remarks.....	148

### The Electronic Structure of Alloys

H. EHRENREICH AND L. M. SCHWARTZ

I. Introduction.....	150
II. Formulation of the Problem.....	159
III. Multiple Scattering Theory.....	169
IV. The Single Band Alloy.....	176

V. Formal Extensions of the Theory .....	211
VI. The Alloy Potential .....	224
VII. Realistic Model State Densities .....	227
VIII. The s-d Model .....	238
IX. The Muffin Tin Model .....	253
Appendix: Reduction of the Multiple Scattering Equations to Their Energy Shell Components .....	283
AUTHOR INDEX .....	287
SUBJECT INDEX .....	294
CUMULATIVE AUTHOR INDEX, VOLUMES 1-31 .....	301
