CONTRIBUTORS TO VOLUME 32	vii
PREFACE	ix
SUPPLEMENTARY MONOGRAPHS	xi
ARTICLES TO APPEAR SHORTLY	xiii

The Electron-Hole Liquid in Semiconductors: Theoretical Aspects

T. M. RICE

I. Introduction	1
II. Semiconductor Systems	5
III. Ground-State Energy of Electron-Hole Systems	13
IV. General Properties of a Metallic Condensate	39
V. Theory of Finite Size Drops, Their Growth and Death	70

The Electron-Hole Liquid in Semiconductors: Experimental Aspects

J. C. HENSEL, T. G. PHILLIPS, AND G. A. THOMAS

I. Introduction	88
II. Macroscopic Properties of the e-h Condensate	94
III. Time-Dependent Phenomena and Decay of Drops	159
IV. Experimental Characterization of the Metallic Ground State at $T = 0$	203
V. Experiments on the Phase Diagram of the Electron-Hole Fluid	280
VI. Epilog	312
