The Thermal Conductivity of Nonmetallic Crystals

GLEN A. SLACK

I. Introduction	1
II. Absolute Value of the Thermal Conductivity	2
III. Volume Dependence of the Thermal Conductivity	34
IV. Temperature Dependence of the Thermal Conductivity	37
V. Thermal Conductivity at the Melting Point	44
VI. Minimum Thermal Conductivity	57
VII. Further Problems	70

Configurational Thermodynamics of Solid Solutions

D. DE FONTAINE

I. Introduction	74
II. State of Order	75
III. Internal Energy	88
IV. Elastic Interactions	116
V. Free Energy Models	146
VI. Stable and Unstable States	179
VII. Fluctuations and Kinetics	231
VIII. Conclusion	272

Inelastic Electron Scattering Spectroscopy

S. E. SCHNATTERLY

I. Introduction	275
II. Elastic Scattering	278
III. Inelastic Electron Scattering	282
IV. Basic Spectrometer Description	296
V. Sample Preparation	305
VI. Experimental Examples	309
