PREFACE	ix
SUPPLEMENTS	xi

Theory of Superconducting T_c

PHILIP B. ALLEN AND BOŽIDAR MITROVIĆ

I. Introduction	2
II. The Normal State	11
III. The Superconducting State	32
IV. Solutions for T_c	50
V. Complications and Speculations	73
Appendix A. The Digamma Function	89
Appendix B. Derivation of Eq. (3.51)	91

Spectroscopic and Morphological Structure of Tetrahedral Oxide Glasses

J. C. PHILLIPS

I. Introduction	93
II. Schematic Spectrum of a Tetrahedral Oxide Glass	97
III. Neutron Scattering Spectra: g - SiO_2	100
IV. Infrared Spectra: g - SiO_2	103
V. Raman Spectra: g - SiO_2	106
VI. Dispersion of Internal Surface Modes	108
VII. Cluster Dimensions and Morphology (SiO_2)	115
VIII. Morphology of Clusters in g - GeO_2	121
IX. Ring Statistics and Dynamical Force Field Constraints	124
X. Vibrational Spectroscopy of g - GeO_2	128
XI. Electronic Structure	133
XII. Structure and Vibrational Spectra of Alkali Silicate Glasses	137
XIII. Structure and Vibrational Spectra of Alkali Germanate Glasses	146
XIV. Ternary Alkali Germanate-Silicate Glasses	149
XV. Pb Silicate and Germanate Glasses	151
XVI. BeF_2 : A Nonoxide Tetrahedral Glass	153
XVII. Spectroscopic Analogs of Low-Temperature Thermodynamic Anomalies	156
XVIII. High-Resolution Electron Micrographs	158
XIX. Phase Separation in Silicates	161
XX. Frustration of the Crystallization Path	162
XXI. Conclusions	168
Appendix A. Combined AX_4 and A_2X Symmetries	168
Appendix B. Clusters and Small-Angle X-Ray Scattering	170

Extended X-Ray Absorption Fine Structure Spectroscopy

T. M. HAYES AND J. B. BOYCE

I. Introduction	173
II. Photoabsorption Theory	182
III. Experimental Techniques	237
IV. Data Analysis	274
V. Experimental Studies	287
AUTHOR INDEX	353
SUBJECT INDEX	367
CUMULATIVE AUTHOR INDEX, VOLUMES I-37	379
