PREFACE	vii
---------------	-----

Physics of Fracture

ROBB THOMSON

I. Introduction	2
II. Observational Background and Initial Concepts	7
III. The Elastic Fields of Cracks and Dislocations	21
IV. The Elastic Forces on Cracks and Dislocations	39
V. Atomic Structure of Cracks	58
VI. Dislocation Emission from Cracks	71
VII. Dislocation Shielding and Fracture Toughness	87
Appendix	120

The Internal Structure of Guinier–Preston Zones in Alloys

JEROME B. COHEN

I. Introduction	131
II. Experimental Techniques	135
III. EXAFS	149
IV. Results for Specific Alloys	150
V. Discussion	186
Appendix: The Diffuse Intensity in the Kinematic Approximation (By E. Matsubara)	196

Fractals and Their Applications in Condensed Matter Physics

S. H. LIU

I. Introduction	207
II. Measurements of Fractal Dimension	219
III. Growth of Fractal Aggregates	227
IV. Diffusion on Fractal Networks	244
V. Elastic Properties of Fractal Networks	257
VI. Magnetic Ordering on Fractal Networks	267

Electronic Structure of 3d Transition-Atom Impurities in Semiconductors

ALEX ZUNGER

I. Introduction	276
II. Phenomenology and Terminology	277
III. Observable Phenomena and Data	290
IV. Theoretical Content of Excitation and Ionization Energies	346
V. Electronic-Structure Calculations in the Mean-Field Approach	377
VI. Results of First-Principles Green's Function Studies	396
VII. Future Prospects	462
INDEX	465
