CONTRIBUTORS TO VOLUME 45	vii
PREFACE	ix

Structural Ordering in Colloidal Suspensions

AJAY K. SOOD

I. Introduction	2
II. Synthesis and Characterization of Colloids.....	8
III. Experimental Scene.....	12
IV. Interparticle Interaction Potentials.....	19
V. Theoretical Aspects of Equilibrium Phases.....	30
VI. Liquidlike Order, Polydispersity, Binary Mixtures, and Glass.....	41
VII. Colloidal Crystals in Two Dimensions.....	62
VIII. Elastic Properties and Shear Flow	66
IX. Miscellaneous and Conclusions	70
Acknowledgments	73
Note Added in Proof.....	73

Crystal Nucleation in Liquids and Glasses

K. F. KELTON

I. Introduction	75
II. Classical Theory: Steady-State Nucleation	83
III. Classical Theory: Time-Dependent Nucleation.....	93
IV. Experimental Studies of Nucleation in Undercooled Liquids.....	103
V. Experimental Studies of Nucleation in Glasses.....	123
VI. Computer Simulations of Steady-State Nucleation	155
VII. Beyond Classical Nucleation Theory.....	159
VIII. Concluding Remarks.....	172
Appendix A: Approximations to ΔG	173
Acknowledgments	177

Glass Transition and Relaxation of Disordered Structures

FUMIKO YONEZAWA

I. Introduction	179
II. General Discussions.....	181
III. Glass Transition	186
IV. Computer Simulations of Glass Transition.....	197
V. Simulations of Glass Transition at Constant Pressure.....	202
VI. Fluctuation and Relaxation in Disordered Systems.....	235
VII. Summary and Future Work	254
AUTHOR INDEX	255
SUBJECT INDEX	265
CUMULATIVE AUTHOR INDEX, VOLUMES 1-45.....	289
