CONTRIBUTORS TO VOLUME 46	vii
PREFACE	ix

Band Offsets in Semiconductor Heterojunctions

EDWARD T. YU, JAMES O. MCCALDIN, AND THOMAS C. MCGILL

I. Introduction	2
II. Theories and Empirical Rules	8
III. Experimental Techniques	26
IV. III-V Material Systems	33
V. II-VI Material Systems	59
VI. Strain Effects in Lattice-Mismatched Heterojunctions	74
VII. Heterovalent Material Systems	103
VIII. Discussion	130
IX. Conclusions	145
Acknowledgments	146

Physical Properties of Macroscopically Inhomogeneous Media

DAVID J. BERGMAN AND DAVID STROUD

I. Introduction	148
II. DC Electrical Properties—General Theory and Computational Techniques	150
III. DC Electrical Properties—Applications to Specific Problems	192
IV. Electromagnetic Properties	220
V. Nonlinear Properties and Flicker Noise	246
Acknowledgments	269

Fundamental Magnetization Processes in Thin-Film Recording Media

H. NEAL BERTRAM AND JIAN-GANG ZHU

I. Introduction	271
II. Microstructures and Magnetic Properties of Thin-Film Materials	281
III. Micromagnetic Modeling	299
IV. Reversal Processes and Domain Structures	320
V. Simulations of the Magnetic Recording Process	345
VI. Self-Organized Behavior in Magnetic Systems	362
Acknowledgments	371

AUTHOR INDEX	373
SUBJECT INDEX	391
CUMULATIVE AUTHOR INDEX	399
