PREFACE	ix

Solid State Properties of Fullerenes and Fullerene-Based Materials

J. H. WEAVER AND D. M. POIRIER

I. Introduction	1
II. Fullerenes in Gas Phase and Solution	13
III. Fullerenes in Solid State	18
IV. Doped Fullerenes Fullerides	60
V. Endofullerenes	89
VI. Tubes, Capsules, and Onions	95
VII. Summary and Prospects	106
Acknowledgments	107

Preparation of Fullerenes and Fullerene Based Materials

CHARLES M. LIEBER AND CHIA-CHUN CHEN

I. Introduction	109
II. Fullerene Clusters	112
III. Metal-Doped C_{60} Materials	128
IV. New Fullerene Building Blocks	142
V. Concluding Remarks	147

Structure and Dynamics of Crystalline C_{60}

J. D. AXE, S. C. MOSS, AND D. A. NEUMANN

I. Introduction	150
II. Theoretical Considerations and Some Consequences	152
III. Experimental Aspects of the Scattering from the fcc Phase	170
IV. Experimental Aspects of the sc Phase	189
V. Phonons	206
VI. Summary	221
Acknowledgments	222
Glossary of Symbols	223

Electrons and Phonons in C₆₀-Based Materials

WARREN E. PICKETT

I. Introduction	226
II. Electrons on the C ₆₀ Molecule	231
III. Dynamics of the C ₆₀ Molecule and Solids	253
IV. Crystals Structures	276
V. C ₆₀ Crystals: Local Density Calculations	289
VI. Electronic Spectroscopies; Coulomb Interactions	305
VII. Electron-Phonon Coupling	318
VIII. Transport, Thermodynamic, Infrared Properties	323
IX. Superconductivity	332
X. Summary	346
Acknowledgments	346

Physical Properties of Metal-Doped Fullerene Superconductors

CHARLES M. LIEBER AND ZHE ZHANG

I. Introduction	349
II. Normal and Superconducting State Phenomenology	352
III. Possible Mechanisms and Other Physical Properties	363
IV. Concluding Remarks	384

AUTHOR INDEX	385
SUBJECT INDEX	419
CUMULATIVE AUTHOR INDEX	427
