Preface	v
Introduction	1
I. Theory	3
1. Frequencies and Intensities of Pure Quadrupole Spectra	3
a. Hamiltonian	3
b. Pure Quadrupole Spectra for Axially Symmetric Field Gradients	5
c. Zeeman Splitting of the Quadrupole Spectra. Case of Axially	
Symmetric Field Gradient	7
d. Pure Quadrupole Spectra with Nonaxial Field Gradients.	12
e. Zeeman Splitting for the Nonaxial Case	19
2. Static Splitting and Broadening of Quadrupole Spectra.	26
a. Splitting and Broadening of Spectra Due to Magnetic Interactions	26
b. Electrical Sources of Broadening	39
3. Effects of Internal Motions in Molecular Solids on Nuclear Quadru-	
pole Resonance	39
a. Effects of Torsional Motions of Molecules	40
b. Effects of Hindered Internal Rotations on Pure Quadrupole	
Resonance	64
4. Theory of Transient Experiments in Quadrupole Resonance.	70
a. Pure Quadrupole Spin Echo and Free Induction Signals	71
b. Spin Echo and Free Induction Signals in the Presence of a Weak	
Magnetic Field.	77
c. Relative Advantages of Steady-State and Transient Experiments	80
II. Instrumentation	83
5. Apparatus	83
a. General Considerations	83
b. Regenerative Continuous Wave Detectors	84
c. Super-Regenerative Method of Detection	88
d. Circuits for High-Frequency Bromine and Iodine Resonances.	91
e. Circuitry for Nuclear Quadrupole Echoes and Free Induction	93
III. Applications of Interest to the Solid State.	97
6. Information on the Constitution of the Crystalline Unit Cell	98
a. Number of Chemically Inequivalent Lattice Sites in the Unit Cell	98
b. Interpretation of Zeeman Splittings and Their Use in Determin-	
ing Orientations of Molecules in the Unit Cell	102

c. Study of Phase Transitions by Quadrupole Resonance.	113
7. Interpretation of Nuclear Quadrupole Coupling Data in Terms of Electron Distribution in Free Molecules	119
a. Townes and Dailey Theory for Interpretation of Nuclear Quadru- pole Coupling Constants in Free Molecules.	120
b. Relation between Asymmetry Parameter and Double Bond Characters of Halogen Bonds in Planar Molecules.	154
8. Intermolecular Binding in the Solid State.	164
a. Relative Importance of Direct and Indirect Effects of Neighbor- ing Molecules on the Nuclear Quadrupole Interaction	164
b. Differences in Ionic Characters of Chemical Bonds in the Gaseous and Solid States	166
c. Bond Switching.	170
d. Interpretation of Quadrupole Resonance Spectra in Solid Halo- gens in Terms of the Intermolecular Binding.	173
9. Quadrupole Resonance Studies of Nuclei Other Than Halogens	179
a. Compounds of Group I Elements of the Periodic Table	180
b. Compounds of Second Group Elements	183
c. Compounds of Third Group Elements.	185
d. Compounds of Fifth Group Elements	192
10. Broadening of Quadrupole Resonance Lines by Impurities	205
a. General Considerations	205
b. Quadrupole Resonance in Irradiated Specimens.	207
c. Quadrupole Resonance in Solid Solutions	208
Author Index	211
Subject Index	215

TABLES

TABLE I. Secular Equations for Pure Quadrupole Interaction.	13
TABLE II. The Splitting of Quadrupole Lines from Cl^{35} Nuclei at Chemically Nonequivalent Sites in Molecules	99
TABLE III. Multiplicity of Cl^{35} Quadrupole Lines Due to Chemical In- equivalence of Chlorine Sites in Crystals	100
TABLE IV. Multiplicity of Cl^{35} Quadrupole Resonances in Crystals Containing H-Bonded Structures.	101
TABLE V. List of Substances for Which Zeeman Measurements Have Been Performed to Date	103
TABLE VI. Orientation of <i>p</i> -Dichlorobenzene Molecules According to Hen- dricks.	116
TABLE VII. Orientation of <i>p</i> -Dibromobenzene Molecules According to Hendricks.	116
TABLE VIII. Orientation of <i>p</i> -Dichlorobenzene Molecules According to Dean and Pound.	117
TABLE IX. Values of <i>b</i> , <i>Q</i> , and q_{at} for <i>p</i> Electrons in Some Atoms.	126
TABLE X. Value of q_{at} for <i>p</i> Electrons in Some Atoms from Optical Fine Structure Data	131

TABLE XI. Properties of AX Bonds Where $A = C, Si, Ge, Sn$; and $X = Cl, Br, I$	148
TABLE XII. Asymmetry Parameter in a Number of Substituted Organic Chlorine Compounds Compared with Bersohn's Calculations.	159
TABLE XIII. Resonance Frequencies for Cl^{35} Nuclei in Chlorobenzenes as Functions of the Number of Orthochlorine Neighbors.	161
TABLE XIV. A List of Compounds Whose Halogen Quadrupole Coupling Constants Have Been Studied for Both the Gaseous and Solid States.	167
TABLE XV. Data on Nuclear Quadrupole Interaction in Solid Halogens and the Relative Orientations of Molecules from X-Ray Diffraction	174
TABLE XVI. Quadrupole Interaction Data for the Nuclei of Some Group I Elements	181
TABLE XVII. Quadrupole Interaction Data for the Nuclei of Some Group II Elements	184
TABLE XVIII. Quadrupole Coupling Constants of Nuclei in Compounds of Group III Elements	186
TABLE XIX. Quadrupole Coupling Constants in Compounds of Group V Elements	194
