

## **Contents**

### **I. INTRODUCTION**

1. Introduction .....	1
2. Qualitative Discussion of Damage Events.....	2

### **II. BACKGROUND MATERIAL**

3. Introduction .....	6
4. Electron-Nucleus Collision.....	6
(a) Geometry and Conservation Laws.....	6
(b) Differential Cross Section for Coulomb Scattering .....	13
5. Cross Section for Atom Displacement.....	17
(a) Step-Function Threshold Probability.....	17
(b) Threshold Probability Phenomenology .....	22
(c) Multiple Atom Displacement Phenomenology.....	25
6. Electron Multiple Scattering.....	30
7. Yang Correction.....	34
8. Electron Energy Loss .....	35
9. Annealing of Defects.....	36
10. Experimental Techniques .....	43
(a) Introduction .....	43
(b) Carrier Lifetime in Semiconductors .....	44
(c) Electrical Conductivity—Semiconductors .....	47
(d) Photoconductivity .....	48
(e) Electron Paramagnetic Resonance .....	49
(f) Conventional Spectroscopy .....	55
(g) Electrical Conductivity—Metals .....	55
(h) Mechanical Relaxation Effects .....	56

(i) Dilatation Effects .....	57
(j) Stored Energy .....	58
<b>III. ELEMENTAL SEMICONDUCTORS</b>	
11. Silicon .....	59
(a) Introduction .....	59
(b) The Vacancy [Si- <i>G</i> 1 and Si- <i>G</i> 2] .....	67
(c) The Divacancy [Si- <i>G</i> 6( <i>J</i> ) and Si- <i>G</i> 7( <i>C</i> )].....	71
(d) The Vacancy-Oxygen Pair [Si- <i>B</i> 1( <i>A</i> )].....	75
(e) The Vacancy-Phosphorus Pair [Si- <i>G</i> 8( <i>E</i> )] .....	76
(f) The Vacancy-Aluminum Pair [Si- <i>G</i> 9].....	78
(g) Interstitial Defects.....	78
(h) The Si- <i>G</i> 16( <i>B</i> ) Spectrum .....	79
(i) The Si- <i>P</i> 1( <i>N</i> ) and Si- <i>P</i> 3(II, III) Spectra.....	79
(j) Other EPR Spectra .....	83
(k) Electrical and Optical Measurements.....	83
(l) Length Change Measurements.....	88
(m) "Thin-Sample" Threshold Experiments.....	89
(n) "Thick-Sample" Threshold Experiments.....	92
12. Germanium.....	95
(a) Introduction .....	95
(b) Related Work.....	96
(c) Annealing below 80°K .....	101
(d) Annealing between 80° and 225°K .....	111
(e) Annealing above 225°K .....	115
(f) Summary of the Recovery .....	124
(g) Electronic Energy Levels.....	127
(h) Threshold Experiments.....	134
13. Diamond.....	144
(a) Introduction .....	144
(b) Radiation Damage Studies.....	149
(c) Theory of Radiation-Induced Defects in Diamond .....	155
(d) EPR Measurements on Irradiated Diamonds.....	157
14. Graphite .....	162
(a) Introduction .....	162
(b) Radiation Damage Studies.....	165
15. Tellurium.....	173

## IV. COMPOUND SEMICONDUCTORS

16. Introduction .....	176
17. Indium Antimonide.....	181
18. Indium Arsenide.....	186
19. Gallium Arsenide.....	187
20. Gallium Antimonide.....	191
21. Cadmium Sulfide.....	192
22. Zinc Selenide.....	196
23. Other Compound Semiconductors.....	197

## V. PURE METALS

24. Introduction .....	199
25. Copper.....	206
(a) Introduction .....	206
(b) Stage I ( $T < 60^{\circ}\text{K}$ ).....	206
(c) Stage II ( $60^{\circ}\text{K} < T < 220^{\circ}\text{K}$ ) .....	219
(d) Stages III and IV ( $220^{\circ}\text{K} < T < 450^{\circ}\text{K}$ ) .....	226
(e) Critique of the Recovery Models .....	232
(f) Threshold Experiments.....	240
26. Gold.....	243
(a) Introduction .....	243
(b) Vacancy Information .....	243
(c) Radiation Damage and Plastic Deformation Experiments.....	246
(d) Critique of the Recovery Models .....	254
(e) Threshold Experiments.....	259
27. Silver .....	260
(a) Vacancy Information .....	260
(b) Radiation Damage and Plastic Deformation Experiments.....	261
(c) Recovery Models.....	264
(d) Threshold Experiments.....	265
28. Aluminum.....	266
(a) Vacancy Information .....	266
(b) Radiation Damage and Plastic Deformation Experiments: Recovery Models.....	267
(c) Threshold Experiments.....	271
29. Nickel.....	272
(a) Stages I and II.....	272
(b) Stages III and IV.....	274

(c) Recovery Models.....	275
(d) Threshold Experiments.....	278
30. Iron .....	279
31. Molybdenum.....	284
32. Tungsten .....	287
33. Platinum .....	289
34. Uranium .....	290
35. Other Pure Metals.....	292

## VI. ALLOYS

36. Introduction .....	294
37. Short-Range Order Effects.....	296
38. Long-Range Order Effects .....	299
39. Precipitation Effects.....	303
40. Phase Changes .....	305
Appendix. Reviews and Proceedings of Conferences on Radiation Damage—Metals and Semiconductors .....	307
References.....	309
AUTHOR INDEX .....	363
SUBJECT INDEX.....	387
