Contents

Introductory Remarks
By P. Schuster 1

Part I **General Concepts**

Some Basic Ideas on a Dynamic Information Theory
By H. Haken (With 3 Figures) 6

Aspects of Optimization and Adaptation
By Y.M. Ermoliev 13

Relaxed Markov Processes, Jackson Networks and Polymerisation
By P. Whittle 17

Part II **Chaotic Dynamics-Theory**

Noodle-Map Chaos: A Simple Example
By O.E. Rössler, J.L. Hudson, and J.D. Farmer (With 1 Figure) 30

A Mechanism for Spurious Solutions of Nonlinear Boundary Value Problems
By H.-O. Peitgen (With 6 Figures) 38

Approach to Equilibrium: Kuzmin's Theorem for Dissipative and Expanding Maps
By D. Mayer 52

Complex Behaviours in Macrosystems Near Polycritical Points
By P. Coullet (With 6 Figures) 67

Part III **Chaotic Dynamics – Real Systems and Experimental Verification**

Chaos in Classical Mechanics: The Double Pendulum
By P.H. Richter and H.-J. Scholz (With 9 Figures) 86

Chaos in Continuous Stirred Chemical Reactors
By J.L. Hudson, J.C. Mankin, and O.E. Rössler (With 4 Figures) 98

The Interface Between Mathematical Chaos and Experimental Chemistry
By R.M. Noyes (With 4 Figures) 106

The Enzyme and the Strange Attractor—Comparisons of Experimental and Numerical Data for an Enzyme Reaction with Chaotic Motion
By L.F. Olsen (With 7 Figures) 116

Nonuniform Information Processing by Strange Attractors of Chaotic Maps and Flows
By J.S. Nicolis, G. Mayer-Kress, and G. Haubs (With 13 Figures) 124

Part IV **Stability and Instability in Dynamical Networks**

Generalized Modes and Nonlinear Dynamical Systems
By P.E. Phillipson (With 3 Figures) 142

Dynamics of Linear and Nonlinear Autocatalysis and Competition
By J. Hofbauer and P. Schuster (With 6 Figures) 161

Permanence and Uninvadability for Deterministic Population Models
By K. Sigmund and P. Schuster (With 2 Figures) 173

Part V **Stochasticity in Complex Systems**

Random Selection and the Neutral Theory—Sources of Stochasticity in Replication
By P. Schuster and K. Sigmund (With 9 Figures) 186

The Dynamics of Catalytic Hypercycles—A Stochastic Simulation
By A.M. Rodriguez-Vargas and P. Schuster (With 6 Figures) 208

Perturbation-Dependent Coexistence and Species Diversity in Ecosystems
By M. Rejmánek (With 7 Figures) 220

Chance and Necessity in Urban Systems
By P.M. Allen, M. Sanglier, and G. Engelen (With 14 Figures) 231

Random Phenomena in Nonlinear Systems in Connection with the Volterra Approach
By K.F. Albrecht, V. Chetverikov, W. Ebeling, R. Funke, W. Mende, and M. Peschel (With 8 Figures) 250
