<i>Introductory Remarks.</i> By D.A. Glaser	1
<i>Synopsis and Introduction.</i> By H. Haken (With 15 Figures)	3

Part 1 Experimental Results

1.1 Formation and Structure of Nervous Systems

Vertical and Tangential Organization in the Neocortex By G. Rager (With 19 Figures)	28
Cell Biological Aspects of Neuronal Communication: Trophic Interactions in the Developing and Adult Nervous System By M.E. Schwab (With 2 Figures)	42
Self-Organization in Synaptogenesis: Interaction Between the Formation of Excitatory and Inhibitory Synapses By J.R. Wolff and G.P. Wagner (With 5 Figures)	50

1.2 Plasticity, Auto-Adaption

Control of Plastic Processes. By H. Flohr (With 11 Figures)	60
Reorganization of Neuronal Circuitry in the Vestibular System Following Unilateral Labyrinthine Removal By W. Precht (With 4 Figures)	75
Neuronal Activity as an Shaping Factor in the Self-Organization of Neuron Assemblies. By W. Singer (With 1 Figure)	89
Dynamics of Image Formation by Nerve Cell Assemblies By W.J. Freeman (With 11 Figures)	102
Auto-Adaptive Control of Central Plasticity: Observations and Speculations. By G. Melvill Jones (With 7 Figures)	122

1.3 Nonequilibrium Phase Transitions

Neurodynamics of the Oculomotor System: Space-Time Recoding and a Non-Equilibrium Phase Transition. By K. Hepp and V. Henn (With 9 Figures)	139
---	-----

1.4 Synergetic Effects Caused by Molecular Inputs

Evidence for Synergetic Dynamics in a Mammalian Pituitary Cell Perifusion System. By R.C. Guillemin, P. Brazeau, A. Briskin, and A.J. Mandell (With 12 Figures)	155
Opiomelanocortins, Learning and Memory: Significance of Multiple Behavioural Information in One Polypeptide Molecule. By B. Bohus	163

1.5	<i>Multi-Electrodes</i>	
	A Multi-Electrode Matrix for Studies of Temporal Signal Correlations Within Neural Assemblies. By H.J. Reitboeck (With 5 Figures)	174
1.6	<i>EEG and Synergetics of Neural Populations</i>	
	Synergetics of Neuronal Populations. A Survey on Experiments By E. Başar (With 16 Figures)	183
1.7	<i>Field Effects on Neural Nets</i>	
	Molecular Aspects of Cell Membranes as Substrates for Interaction with Electromagnetic Fields. By W.R. Adey (With 8 Figures)	201

Part 2 Theoretical Approaches

2.1	<i>Pattern Formation in the Inanimate World</i>	
	Pattern Selection in Cellular Structures. By Y. Pomeau (With 2 Figures)	214
	Nonstationary Structures - Chaos and Order By A.V. Gaponov-Grekhov and M.I. Rabinovich (With 8 Figures)	227
2.2	<i>Modelling Self-Organization and Performance of Neural Nets</i>	
	How are Nervous Structures Organized? By Ch. von der Malsburg (With 5 Figures)	238
	Cooperation and Competition in Central Nervous System Development: A Unifying Approach. By E. Bienenstock (With 4 Figures)	250
	Representation of Information in Spatial Maps which are Produced by Self-Organization. By T. Kohonen (With 6 Figures)	264
	Neural Substrates of Binocular Form Perception: Filtering, Matching, Diffusion, and Resonance. By S. Grossberg (With 6 Figures)	274
	Cooperative Neural Processes in Amphibian Visual Prey Recognition By U. an der Heiden and G. Roth (With 8 Figures)	299
	A Comparative Analysis of Structure and Chaos in Models of Single Nerve Cells and Circadian Rhythms. By G.A. Carpenter (With 5 Figures)	311
	The Role of Chaos in Reliable Information Processing By J.S. Nicolis (With 2 Figures)	330
	Solitons and Bioenergetics. By A.C. Scott (With 1 Figure)	345
	Theoretical Psychopathology: An Application of Dynamical Systems Theory to Human Behavior. By R. King, J.D. Barchas, and B. Huberman (With 10 Figures)	352
	From Chemical Homology to Topological Temperature: A Notion Relating the Structure and Function of Brain Polypeptides By A.J. Mandell (With 10 Figures)	365
	<i>Index of Contributors</i>	377
