

Contents

Part I Dynamics of Chemical Systems

Spontaneous Temporal and Spatial Phenomena in Physicochemical Systems
By U.F. Franck (With 11 Figures) 2

Some Factors Generating Temporally Ordered Behavior. By R.M. Noyes 13

Mechanisms and Chemically Consistent Models for Isothermal Oscillations in the CSTR. By P. Gray and S. Scott (With 4 Figures) 24

Analysis and Qualitative Modelling of Experimentally Observed Dynamic Features
By M. Sheintuch and D. Luss (With 13 Figures) 33

A Physicist's Description of Chemical Oscillations
By F. Jähnig (With 2 Figures) 47

Multiplicity-Induced Oscillations in Porous Catalysts
By B. Fiedler (With 1 Figure) 57

Temporal Oscillations Induced by Boundary Conditions in Systems with and Without Spatial Patterns. By H. Riecke and L. Kramer (With 2 Figures) 59

On the Classification of Local Disorder in Globally Regular Spatial Patterns
By A.W.M. Dress (With 8 Figures) 61

Some Proposals Concerning the Mathematical Modelling of Oscillating Heterogeneous Catalytic Reactions on Metal Surfaces. By A.W.M. Dress, M. Gerhardt, N.I. Jaeger, P.J. Plath, and H. Schuster (With 8 Figures) 67

In-Situ IR Study During Oscillations of the Catalytic CO Oxidation
By D. Böcker and E. Wicke (With 8 Figures) 75

Spatial Effects and Oscillations in Heterogeneous Catalytic Reactions
By J.R. Brown, G.A. D'Netto, and R.A. Schmitz (With 11 Figures) 86

Dynamics of the Heterogeneous Catalytic Oxidation of Carbon Monoxide on Zeolite Supported Palladium. By N.I. Jaeger, K. Möller, and P.J. Plath, (With 7 Figures) 96

Toroidal Oscillations During the Oxidation of Methanol on Zeolite Supported Palladium. By N.I. Jaeger, P.J. Plath, and P. Svensson (With 1 Figure) 101

Oscillatory Behavior of Cobalt Electrodes During Transition from the Active to the Passive State. By N.I. Jaeger, P.J. Plath, and Ngo Quoc Quyen (With 2 Figures) 103

Periodic and Aperiodic Regimes in Forced Chemical Oscillations
By M. Marek (With 14 Figures) 105

Periodic Perturbation of the BZ-Reaction in a CSTR: Chemical Resonance, Entrainment and Quasi-Periodic Behavior. By F. Buchholtz, A. Freund, and F.W. Schneider (With 5 Figures)	116
Periodic Perturbation of Limit Cycles in an Isothermal CSTR By T.W. Taylor and W. Geiseler (With 3 Figures)	122
Oscillations in a CSTR Affected by the Pump Periodicity By K. Bar-Eli (With 1 Figure)	126

Part II Dynamics of Biological Systems

Synchronization, Phase-Locking and Other Phenomena in Coupled Cells By H.G. Othmer (With 5 Figures)	130
The Influence of Fluctuations on Sustained Oscillations By H. Engel-Herbert, W. Ebeling, and H. Herzel (With 7 Figures)	144
Movement in Space	
Chemomechanical Interfacial Instabilities and Waves: Their Possible Role for the Cell Locomotion on Substrates. By E. Sackmann (With 7 Figures)	153
Contraction and Oscillations in a Simple Model for Cell Plasma Motion By W. Alt (With 12 Figures)	163
Circle Maps and the Periodic Forcing of Limit Cycle Oscillators By J. Bélair and L. Glass (With 3 Figures)	175
Cellular Metabolism and Transport	
Dynamic Coupling and Time Patterns in Biochemical Processes By B. Hess and M. Markus (With 10 Figures)	179
Dimension and Liapunov Exponents of a Strange Attractor from Biochemical Data By M. Markus and B. Hess (With 1 Figure)	191
Coupling of Glycolytic Oscillations and Convective Patterns By S.C. Müller, Th. Plessner, and B. Hess (With 3 Figures)	194
Computation of Bifurcation Diagrams for Selkov's Model of Glycolytic Oscillations. By B. Eckhardt and P. Richter (With 3 Figures)	197
Comparison of the Linear and Non-Linear Temperature Properties and Model Simulations of the In Vivo Glycolytic System. By R. Kerutt, K. Rinast, W. Martin, and K. Brinkmann (With 2 Figures)	201
Circadian Rhythms	
High Molecular Weight Protein is Presumably Essential for the Circadian Clock By H.G. Schweiger, R. Hartwig, G. Neuhaus, G. Neuhaus-Url, M. Li-Weber, and M. Schweiger	203
Circadian Time-Dependent Effects of Plant Growth Regulators on Morphogenesis in <i>Acetabularia</i> . By Th. Vanden Driessche (With 1 Figure)	211
Phase and Period Effects of Physical and Chemical Factors. Do Cells Communicate? By J.W. Hastings, H. Broda, and C.H. Johnson (With 6 Figures) ..	213
Singularity in a Unicell: Can Pulses of Protein Synthesis Inhibitors Stop the Biological Clock? By H. Broda and J.W. Hastings (With 2 Figures)	222

Circadian Control of Protein Synthesis Rate in Cell-Free Extracts of <i>Gonyaulax polyedra</i> . By A. Schroeder-Lorenz and L. Rensing (With 2 Figures) ..	224
Perturbation by Single and Double Pulses as Analytical Tool for Analyzing Oscillatory Mechanisms. By L. Rensing and W. Schill (With 5 Figures)	226
Effects of Light and Temperature Steps on Circadian Rhythms of <i>Neurospora</i> and <i>Gonyaulax</i> . By V.D. Gooch (With 4 Figures)	232
Genetic and Physiological Analysis of a Circadian Clock Gene in <i>Neurospora crassa</i> . By J.F. Feldman	238
Cyclic Activity of Enzymes of Asparagine-Pyruvate Pathway and Cellular Synchronization. Significance of L-Asparaginase Oscillatory States By S. Jerebzoﬀ	246
Control and Significance of the Circadian Growth of the Endocuticle in Cockroaches (<i>Blaberus craniifer</i> , Blattodea). By F. Weber	248
The Hypothalamic Control of Eating and Circadian Rhythms: Opponent Processes and Their Chemical Modulators. By S. Grossberg (With 4 Figures)	250
The Circadian Activity Rhythm of Mammals: A Comparison of Models and Experiments. By G.A. Carpenter (With 2 Figures)	263
Weak Coupling Between the Two Pacemakers of the Bilateral Circadian Mechanism in Crickets. By G. Wiedermann (With 3 Figures)	273
Effect of Reversed Photoperiod on Daily Rhythms of Synthesis and Accumulation of Neurosecretion in the Brain of the House Cricket. By B. Cymborowski (With 1 Figure)	275
Circadian Rhythm of Locomotor Activity in <i>Musca</i> Continues After Severance of Optic Tracts. By C. Helfrich, B. Cymborowski, and W. Engelmann	277
Interaction Between Two Circadian Clocks in the Rabbit and Their Main Input By A.C. Bobbert and D.J. Bruinvels (With 1 Figure)	279
Cell Cycle	
Dynamics of Feedback Systems with Time Lag. By H.-O. Walther	281
The Coordination of Cell Growth and Division: A Comparison of Models By J.J. Tyson (With 4 Figures)	291
Cellular Synergetics: Cell-Density Dependent Regulation of Population Dynamics of Mammalian Cells in Vitro. By G. Adam, B. Kleuser, K. Seuwen, and U. Steiner (With 4 Figures)	296
Idiotypic Network Among T Cells. By K. Fey and K. Eichmann (With 1 Figure) ..	302
The Transition Probability Model: Successes, Limitations, and Deficiencies By R.F. Brooks (With 4 Figures)	304
A Deterministic Cell Cycle Model with Transition Probability-Like Behaviour By M.C. Mackey	315
The Onset of Division in a Protocell Model By H. Schwegler and K. Tarumi (With 2 Figures)	321
A Temperature Compensated Epigenetic Oscillator with an Hourly Period Provides Time-Keeping for the Cell Cycle and Possibly also for Circadian-Controlled Phenomena. By D. Lloyd and S.W. Edwards (With 1 Figure)	323
<i>Index of Contributors</i>	325
