

Contents

Introduction . . . . .	XI
------------------------	----

---

Part I	<b>Disordered Systems, Networks and Patterns</b>
--------	--

---

Neural Networks – Achievements, Prospects, Difficulties By D.J. Amit (With 9 Figures) . . . . .	2
Pattern Recognition in Nonlinear Neural Networks By J.L. van Hemmen (With 5 Figures) . . . . .	22
Formation of Ordered Structures in Quenching Experiments: Scaling Theory and Simulations By D.W. Heermann and K. Binder (With 6 Figures) . . . . .	42
Patterns in Random Boolean Nets By G. Weisbuch (With 14 Figures) . . . . .	52
The Structure of the Visual Field By J.J. Koenderink (With 6 Figures) . . . . .	68
Patterns of Maximal Entropy By R.D. Levine	78

---

Part II	<b>Structure Formation in Nonlinear Systems</b>
---------	---

---

Patterns of Bifurcation from Spherically Symmetric States By F.H. Busse (With 2 Figures) . . . . .	88
Structure Formation by Propagating Fronts By M. Lücke, M. Mihelcic, B. Kowalski, and K. Wingerath (With 12 Figures)	97
Oscillatory Doubly Diffusive Convection: Theory and Experiment By E. Knobloch, A.E. Deane, and J. Toomre (With 7 Figures) . . . . .	117
Pattern Selection in Anisotropic Systems By L. Kramer, E. Bodenschatz, W. Pesch, and W. Zimmermann (With 1 Figure)	130

Rayleigh Number Ramps Cause Moving Convection Patterns By I. Rehberg and H. Riecke (With 10 Figures) . . . . .	142
Interactions of Stationary Modes in Systems with Two and Three Spatial Degrees of Freedom By M. Neveling, D. Lang, P. Haug, W. Güttinger, and G. Dangelmayr (With 10 Figures) . . . . .	153
The Basic $(n, 2n)$ -Fold of Steady Axisymmetric Taylor Vortex Flows By R. Meyer-Spasche and M. Wagner (With 9 Figures) . . . . .	166

---

<b>Part III</b>	<b>Interfacial Patterns</b>
-----------------	-----------------------------

---

Nonlinear Interactions of Interface Structures of Differing Wavelength in Directional Solidification By M.J. Bennett, R.A. Brown, and L.H. Ungar (With 8 Figures) . .	180
Velocity Selection in Dendritic Growth By B. Caroli, C. Caroli, and B. Roulet . . . . .	191
Interfacial Pattern Formation: Dynamical Effects By D.A. Kessler and H. Levine (With 6 Figures) . . . . .	198

---

<b>Part IV</b>	<b>Diffusion Limited Aggregation and Fractals</b>
----------------	---

---

Role of Fluctuations in Fluid Mechanics and Dendritic Solidification By H.E. Stanley (With 13 Figures) . . . . .	210
A Stochastic Model for Arborescent and Dendritic Growth By J. Nittmann (With 8 Figures) . . . . .	245
Electrodeposition: Pattern Formation and Fractal Growth By L.M. Sander (With 3 Figures) . . . . .	257
Anisotropy and Fluctuation in Diffusion Limited Aggregation By M. Kolb (With 5 Figures) . . . . .	267
The Classes of Fractals By B. Röhricht, W. Metzler, J. Parisi, J. Peinke, W. Beau, and O.E. Rössler . . . . .	275
Structural Characterization of Aluminum Hydroxide Aggregates by S.A.X.S.: Comparison Between Simulations of Fractal Structures and Experiments By M.A.V. Axelos, D. Tchoubar, and R. Jullien (With 5 Figures) . .	282

---

<b>Part V</b>	<b>Chaos and Turbulence</b>
---------------	-----------------------------

---

Spatial Disorder in Extended Systems By P. Coulet, C. Elphick, and D. Repaux (With 3 Figures) . . . . .	290
--	-----

Nonlinear Gravity Waves and Resonant Forcing By K. Kirchgässner (With 3 Figures) . . . . .	303
Transitions to Chaos in a Finite Macroscopic System: Direct Numerical Simulations Versus Normal Form Predictions By A. Arneodo and O. Thual (With 16 Figures) . . . . .	313
Time-Dependent and Chaotic Behaviour in Systems with $O(3)$ - Symmetry By R. Friedrich and H. Haken (With 10 Figures) . . . . .	334
Selfsimilarity of Developed Turbulence By H. Effinger and S. Grossmann (With 2 Figures) . . . . .	346

---

<b>Part VI      Bifurcations and Symmetry</b>	
Nonlinear Normal Modes of Symmetric Hamiltonian Systems By J. Montaldi, M. Roberts, and I. Stewart (With 8 Figures) . . . . .	354
The Ubiquitous Astroid By D. Chillingworth (With 19 Figures) . . . . .	372
On the Hopf Bifurcation with Broken $O(2)$ Symmetry By G. Dangelmayr and E. Knobloch (With 2 Figures) . . . . .	387
Generic Spontaneous Symmetry Breaking in $SU(n)$ – Equivariant Bifurcation Problems By C. Geiger and W. Güttinger (With 1 Figure) . . . . .	394
Computer Algebraic Tools for Applications of Catastrophe Theory By F.J. Wright and R.G. Cowell (With 4 Figures) . . . . .	402
Computer Algebra Programs for Dynamical Systems Theory By D. Armbruster	416
<b>Index of Contributors . . . . .</b>	<b>427</b>
