Contents

Part I **Introduction**

Synergetic Computers for Pattern Recognition and Associative Memory. By H. Haken (With 18 Figures) 2

Part II **Natural Computational Systems**

The Representation of Space-Time in the Human Visual System By J.J. Koenderink and A.J. van Doorn 24

Neuronal Mechanisms of the First, Second, and Third Order Contrast in the Visual System. E. Peterhans, and R. von der Heydt (With 8 Figures) 35

A Model of Figure/Ground Separation Based on Correlated Neural Activity in the Visual System
By H.J. Reitböck, R. Eckhorn, and M. Pabst (With 8 Figures) 44

Self-organization of the Visual Information Channel and Solitons
By R.S. Ingarden (With 3 Figures) 55

Human Brain EEG Fields: Micro-states and Their Functional Significance
By D. Lehmann, D. Brandeis, H. Ozaki, and I. Pal (With 2 Figures) 65

Spatio-Temporal Analysis of Multi-channel Alpha EEG Map Series
By A. Fuchs, R. Friedrich, H. Haken, and D. Lehmann
(With 11 Figures) 74

Part III **Pattern Analysis and Pattern Formation**

Singular System Analysis of Time Series Data
By E.R. Pike (With 5 Figures) 86

Geometrical Principles of Pattern Formation and Pattern Recognition
By W. Güttinger, P. Haug, and D. Lang (With 16 Figures) 97

Part IV **Spin Glass Models and Neural Networks**

Dynamics of Spin Glasses and Related Models of Neural Networks
By H. Horner (With 7 Figures) 118

Mean-Field Theory of Spin Glasses and Neural Networks with Finite Coordination Number. By I. Kanter (With 2 Figures) 133

Neural Networks for Associative Memory Design
By L. Personnaz, I. Guyon, and G. Dreyfus (With 6 Figures) 142

Part V **Physical Devices**

Towards the Quantum Computer: Information Processing with Single Electrons. By G. Mahler and K. Obermayer (With 8 Figures) 154

Chaos and Pulsating Instabilities in Lasers
By R.G. Harrison, J.V. Moloney, and J.S. Uppal (With 6 Figures) . . 166

Part VI **General Computational Processes**

Systems with Statistically Coupled Processors
By V. Černý (With 10 Figures) 178

Chaotic Dynamical Systems as Machines. By J.L. McCauley 188

Digital and Analog Approach to Intermittencies and 1/f Noise in a Nonlinear Helmholtz Oscillator. By M.A. Rubio, M. de la Torre, J.C. Antoranz, and M.G. Velarde (With 5 Figures) 196

Part VII **Robotics**

Towards Automatic Error Correction in Robots: Inferring the Task from the Program. By V. Caglioti and M. Somalvico 204
