

Contents

Introduction to Immune Networks By H. Atlan and I.R. Cohen	1
<hr/>	
Part I	
<hr/>	
Natural Id-Anti-Id Networks and the Immunological Homunculus By I.R. Cohen	6
Self-Nonself Immunological Tolerance and Idiotypic Networks By J. Urbain, G. Urbain-Vansanten, and D. De Wit	13
<hr/>	
Part II	
<hr/>	
Extensive Percolation in Reasonable Idiotypic Networks By R.J. De Boer (With 3 Figures)	26
The Concept of Idiotypic Network: Deficient or Premature? By Z. Grossman	38
Dynamical Behavior of Discrete Models of Jerne's Network By G. Weisbuch (With 1 Figure)	53
Some Reflections on Memory in Shape Space By L.A. Segel and A.S. Perelson (With 6 Figures)	63
<hr/>	
Part III	
<hr/>	
Regulation of the Immune Response: A Discrete Mapping Approach By M. Kaufman (With 7 Figures)	72
Simulation of the Immune Cellular Response by Small Neural Networks By H. Atlan and S. Hoffer-Snyder (With 1 Figure)	85
Discrete Time Versus Continuous Time Approach to the Autoimmune Response By K.E. Kürten (With 1 Figure)	99

**Optimizing the Immune Control of Parasitic Invasion**  
**By Z. Agur (With 4 Figures) . . . . . 107**

**Index of Contributors . . . . . 117**
