

Contents

<hr/>	
Part I	Fluid Flow: Turbulence, Modelling
<hr/>	
Turbulence and Navier-Stokes Equations	
By S. Grossmann (With 2 Figures)	2
An Arbitrary-Dimensional Cellular-Automaton Fluid Model with Simple Rules	
By R. Nasilowski (With 4 Figures)	9
<hr/>	
Part II	Combustion Waves, Flames
<hr/>	
The Complex Dynamics of Wrinkled Flames	
By G. Joulin (With 1 Figure)	20
Cascade Model for Turbulent Flame Propagation	
By G.I. Sivashinsky (With 2 Figures)	30
The Fractal Concept of Turbulent Flames	
By N. Peters and Ch. Franke (With 9 Figures)	40
Diffusion Flame Stabilization by a Recirculating Flow – Flame Spread Downstream of an Ignition Point	
By M. Konczalla (With 3 Figures)	51
The Spectrum of Cellular Inertia Waves Under Unstable Forced Combustion Conditions	
By S.U. Schöffel (With 8 Figures)	60
<hr/>	
Part III	Turbulent Combustion
<hr/>	
Detailed Combustion Chemistry and Its Coupling with Turbulent Flow	
By J. Warnatz (With 14 Figures)	76
Chemical Reaction Rate Effects in Turbulent Non-premixed Combustion	
By H. Bockhorn (With 6 Figures)	95

Part IV	Reaction–Diffusion Systems: Stability, Pattern Formation, Autowaves, Chaos	
<hr/>		
Synergetics Applied to Pattern Formation in Large-Aspect-Ratio Systems By M. Bestehorn and H. Haken (With 19 Figures)		110
Kinetic Description of Autowave Processes and Hydrodynamic Motion By Yu.I. Klimontovich		144
The Non-isothermal Autocatalator: Complex Oscillations and Chaos By P. Gray and S.R. Kay (With 9 Figures)		155
Deterministic Chaos in Chemical Reactions By F.W. Schneider and A.F. Münster (With 7 Figures)		169
Isotropic Automata for Simulations of Excitable Media: Periodicity, Chaos and Reorganization By M. Markus and B. Hess (With 22 Figures)		197
Comparison Between Morphological and Rayleigh-Marangoni Instabilities By A. Nadarajah and R. Narayanan (With 9 Figures)		215
Catastrophe Theory Concepts for Ignition/Extinction Phenomena By D. Meinköhn (With 10 Figures)		229
Index of Contributors		243

Part I

Fluid Flow: Turbulence, Modelling
