| FOREWORD..... | vii |

From Polar Years to IGY

N. C. GERSON

| | |
|---|----|
| 1. History..... | 2 |
| 2. The First International Polar Year..... | 10 |
| 3. The Second International Polar Year..... | 14 |
| 4. The International Geophysical Year..... | 24 |
| 5. The International Years in Retrospect..... | 43 |
| 6. Future of the International Years..... | 47 |
| References..... | 48 |

Microseisms

B. GUTENBERG

| | |
|---|----|
| 1. Introduction..... | 54 |
| 2. Instruments for the Investigation of Microseisms..... | 56 |
| 3. Microseisms Produced by Artificial Causes..... | 59 |
| 4. Natural Microseisms with Periods of Less Than Two Seconds..... | 59 |
| 5. Regular Microseisms with Periods of One to Three Seconds..... | 60 |
| 6. Microseisms with Periods of About Four Seconds..... | 62 |
| 7. "The" Regular Microseisms with Periods from Four to Ten Seconds..... | 63 |
| 8. Microseisms with Periods of Ten Seconds to Several Minutes..... | 76 |
| 9. Theory..... | 78 |
| List of Symbols..... | 84 |
| References..... | 85 |

The Size and Shape of the Earth

R. A. HIRVONEN

| | |
|----------------------------------|-----|
| 1. Introduction..... | 93 |
| 2. Triangulation..... | 94 |
| 3. Astronomical Coordinates..... | 99 |
| 4. Spirit Leveling..... | 101 |
| 5. Gravity Measurements..... | 103 |
| List of Symbols..... | 112 |
| References..... | 113 |

Oceanic Tides

A. T. DOODSON

| | |
|---|-----|
| 1. Introduction and General Remarks..... | 118 |
| 2. Tidal Charts Obtained by Empirical Methods..... | 124 |
| 3. Mathematical Investigations for Oceans Encircling the Earth..... | 129 |
| 4. Mathematical Investigations for Oceans Bounded by Meridians..... | 133 |
| 5. Mathematical Methods Applied to Actual Oceans..... | 140 |
| 6. Future Research..... | 147 |
| List of Symbols..... | 149 |
| References..... | 150 |

Ultraviolet Absorption Process in the Upper Atmosphere

K. WATANABE

| | |
|---|-----|
| 1. Introduction..... | 154 |
| 2. Density, Temperature, and Composition of the Upper Atmosphere..... | 160 |
| 3. Solar Ultraviolet and X-Rays..... | 169 |
| 4. Absorption Cross-Sections of Atmospheric Gases..... | 173 |
| 5. Some Atmospheric Absorption Processes..... | 202 |
| Acknowledgments..... | 209 |
| List of Symbols..... | 210 |
| References..... | 210 |

The Physics of Cloud Modification

JAMES E. McDONALD

| | |
|--|-----|
| 1. Introduction..... | 223 |
| 2. Clouds and the Atmospheric Water Vapor Cycle..... | 225 |
| 3. Present Status of Cloud and Precipitation Physics..... | 234 |
| 4. Recent Developments in Cloud-Modification Techniques..... | 263 |
| 5. The Evaluation of Modification Experiments..... | 290 |
| 6. Concluding Remarks..... | 297 |
| Acknowledgment..... | 298 |
| References..... | 298 |

| | |
|---|-----|
| AUTHOR INDEX..... | 305 |
| SUBJECT INDEX..... | 314 |
| CUMULATIVE TITLE INDEX, VOLUMES I-IV..... | 320 |
| CUMULATIVE SUBJECT INDEX, VOLUMES I-IV..... | 321 |

FROM POLAR YEARS TO IGY

N. C. Gerson

Secretary, U. S. National Committee for the IGY*

MICROSEISMS

B. Gutenberg

Professor of Geophysics, California Institute of Technology, Pasadena, California

| | <i>Page</i> |
|--|-------------|
| 1. Introduction | 54 |
| 1.1. Definition of Microseisms; Nomenclature | 54 |
| 1.2. Historical Remarks | 55 |
| 1.3. Classification of Microseisms | 55 |
| 1.4. Units and Symbols | 55 |
| 2. Instruments for the Investigation of Microseisms | 56 |
| 2.1. Seismographs | 56 |
| 2.2. Use of Tripartite Instruments | 56 |
| 2.3. Vectorial Recorders | 58 |
| 2.4. Observation of Sea Waves | 59 |
| 3. Microseisms Produced by Artificial Causes | 59 |
| 3.1. "Noise" in Seismic Exploration | 59 |
| 3.2. Microseisms from Traffic and Industry | 59 |
| 3.3. Microseisms Produced by Water Flowing over a Dam | 59 |
| 4. Natural Microseisms with Periods of Less Than Two Seconds | 59 |
| 4.1. Short-Period Microseisms Connected with Meteorological Phenomena | 59 |
| 4.2. Short-Period Microseisms Produced by Local Surf | 60 |
| 4.3. Volcanic Tremors | 60 |
| 5. Regular Microseisms with Periods of One to Three Seconds | 60 |
| 5.1. Microseisms Recorded in the Eastern United States | 60 |
| 5.2. Microseisms with Periods of About Two Seconds Recorded in Southern California | 60 |
| 5.3. Microseisms with Periods of One to Three Seconds Recorded Elsewhere | 61 |
| 6. Microseisms with Periods of About Four Seconds | 62 |
| 6.1. General Remarks | 62 |
| 6.2. Irregular Microseisms with Periods of About Four Seconds near Coasts | 62 |
| 6.3. Microseisms Produced by Monsoons | 63 |
| 7. "The" Regular Microseisms with Periods from Four to Ten Seconds | 63 |
| 7.1. Appearance; Beats | 63 |
| 7.2. Periods and Period-Amplitude Relation | 63 |
| 7.3. Change in Period with Increasing Distance from the Source | 63 |
| 7.4. Direction of Approach of Microseisms | 64 |
| 7.5. Velocity of Microseisms | 65 |
| 7.6. Propagation across Continents and along Ocean Bottoms | 65 |
| 7.7. "Barriers" to Propagation of Microseisms. Effects of Ground on Amplitudes | 67 |
| 7.8. Change of Amplitudes with Depth | 67 |
| 7.9. Wave Types. Ratio of Vertical to Horizontal Components | 68 |

| | |
|--|----|
| 7.10. Cyclical Variations..... | 69 |
| 7.11. Observed Correlation between Microseismic Activity and Meteorological Phenomena..... | 71 |
| 7.11.1. Cyclones over the Ocean..... | 71 |
| 7.11.2. Cyclones over Continents..... | 71 |
| 7.11.3. Regular Microseisms and Cold Fronts..... | 71 |
| 7.11.4. Strong Winds Blowing against Mountains..... | 72 |
| 7.11.5. Effects of Pressure Changes..... | 72 |
| 7.12. Observed Correlation between Ocean Waves and Regular Microseisms.. | 72 |
| 7.12.1. Correlation between Amplitudes of Ocean Waves and Those of Microseisms..... | 72 |
| 7.12.2. Relationship between Periods of Microseisms and of Ocean Waves..... | 74 |
| 7.13. Surf and Regular Microseisms..... | 75 |
| 7.14. Use of Microseisms in Meteorology..... | 76 |
| 8. Microseisms with Periods of Ten Seconds to Several Minutes..... | 76 |
| 8.1. Microseisms from Surf..... | 76 |
| 8.2. Microseisms Connected with Local Wind..... | 76 |
| 8.3. Microseisms with Periods of Several Minutes; Pulsations..... | 78 |
| 9. Theory..... | 78 |
| 9.1. Introduction..... | 78 |
| 9.1.1. The Problems..... | 78 |
| 9.1.2. Types of Elastic Waves..... | 79 |
| 9.2. Transmission of Energy from the Surface to the Bottom of the Ocean.... | 80 |
| 9.3. Waves in the System Ocean-Earth's Crust..... | 81 |
| 9.4. Waves in the System Air-Earth's Crust..... | 81 |
| 9.5. The Energy Problem..... | 81 |
| 9.6. The Period Problem..... | 82 |
| 9.6.1. Hypotheses Assuming That the Periods Are Caused near the Source | 83 |
| 9.6.2. Changes in Periods during the Propagation of Microseismic Waves | 83 |
| 9.6.3. Effects of the Geological Structure near the Recording Station on the Periods..... | 83 |
| 9.6.4. Relation between the Mode of the Vibrations and the Periods of the Microseisms..... | 83 |
| List of Symbols..... | 84 |
| References..... | 85 |

THE SIZE AND SHAPE OF THE EARTH

R. A. Hirvonen

Institute of Technology, Helsinki, Finland, and The Ohio State University, Columbus, Ohio

| | <i>Page</i> |
|--|-------------|
| 1. Introduction..... | 93 |
| 2. Triangulation..... | 94 |
| 2.1 The Lay-Out..... | 94 |
| 2.2 Base-Line Measurement..... | 94 |
| 2.3 Measurement of Angles..... | 95 |
| 2.4 The Computation of Triangulations..... | 95 |
| 2.5 The Intercontinental Connections..... | 97 |
| 3. Astronomical Coordinates..... | 99 |
| 4. Spirit Leveling..... | 101 |
| 5. Gravity Measurements..... | 103 |
| 5.1 Normal Gravity..... | 103 |
| 5.2 Determination of the Geoid..... | 105 |
| 5.3 New Ideas..... | 111 |
| List of Symbols..... | 112 |
| References..... | 113 |

OCEANIC TIDES

A. T. Doodson

Liverpool Observatory and Tidal Institute, Liverpool, England

| | <i>Page</i> |
|---|-------------|
| 1. Introduction and General Remarks | 118 |
| 1.1. Introduction | 118 |
| 1.2. General Deductions, True and False | 119 |
| 1.3. Effects of Natural or Free Periods | 120 |
| 1.4. Forces Due to the Earth's Rotation | 122 |
| 1.5. Amphidromic Systems | 123 |
| 2. Tidal Charts Obtained by Empirical Methods | 124 |
| 2.1. Charts by Whewell and Airy | 124 |
| 2.2. Charts by Harris | 124 |
| 2.3. Charts by Prüfer | 125 |
| 2.4. Charts by Sterneek | 125 |
| 2.5. Charts by Dietrich and Villain | 125 |
| 2.6. Illustrations for the Pacific Ocean | 125 |
| 2.7. Discussion of charts by Dietrich and Villain for the Pacific Ocean | 127 |
| 2.8. Comments on Illustrations of General Principles | 128 |
| 3. Mathematical Investigations for Oceans Encircling the Earth | 129 |
| 3.1. The Equations of Motion | 129 |
| 3.2. Laplace's Solution | 130 |
| 3.3. Hough's Solution | 132 |
| 3.4. Goldsbrough's Solutions for Polar and Zonal Oceans | 133 |
| 4. Mathematical Investigations for Oceans Bounded by Meridians | 133 |
| 4.1. Oceans on a Nonrotating Earth | 133 |
| 4.2. Goldsbrough's Solutions for a Narrow Ocean | 134 |
| 4.3. Ocean Bounded by a Complete Meridian: Proudman and Doodson | 135 |
| 4.4. Doodson's Solutions for Narrow Oceans | 139 |
| 5. Mathematical Methods Applied to Actual Oceans | 140 |
| 5.1. Limitations of Methods | 140 |
| 5.2. Application of "Narrow Sea" Methods | 141 |
| 5.3. Application of Kelvin and Poincaré Waves | 142 |
| 5.4. Proudman's Tidal Theorem | 143 |
| 5.5. Finite Difference Methods | 144 |
| 6. Future Research | 147 |
| 6.1. Imperfect Coastal Data | 147 |
| 6.2. The effects of Capes, Bays, and Islands | 147 |
| 6.3. The Use of Tidal Currents | 148 |
| 6.4. The Effects of Internal Tides | 148 |
| 6.5. The Effects of Mutual Gravitation | 148 |
| 6.6. The Effects of Earth Tides | 148 |
| 6.7. General Considerations | 149 |

ULTRAVIOLET ABSORPTION PROCESSES IN THE UPPER ATMOSPHERE

K. Watanabe

Hawaii Institute of Geophysics and Department of Physics,
University of Hawaii, Honolulu, Hawaii

| | <i>Page</i> |
|---|-------------|
| 1. Introduction..... | 154 |
| 1.1. General..... | 154 |
| 1.2. Absorption Processes..... | 155 |
| 1.3. Some Definitions and Equations..... | 159 |
| 1.4. Rate of Absorption..... | 160 |
| 2. Density, Temperature, and Composition of the Upper Atmosphere..... | 160 |
| 2.1. General..... | 160 |
| 2.2. Data on Density and Temperature..... | 161 |
| 2.3. Composition..... | 163 |
| 2.4. Model Atmosphere..... | 166 |
| 3. Solar Ultraviolet and X-Rays..... | 169 |
| 3.1. Extension of Solar Spectrum..... | 169 |
| 3.2. Intensity Measurements..... | 170 |
| 3.3. Observed Intensities of Solar Ultraviolet and X-Rays..... | 170 |
| 3.4. Theoretical Estimates..... | 173 |
| 4. Absorption Cross-Sections of Atmospheric Gases..... | 173 |
| 4.1. Experimental Method..... | 173 |
| 4.2. O ₂ | 176 |
| 4.2.1. Spectral Region 1750 to 2000 Å..... | 177 |
| 4.2.2. Spectral Region 1250 to 1750 Å..... | 178 |
| 4.2.3. Spectral Region 1050 to 1250 Å..... | 178 |
| 4.2.4. Spectral Region below 1050 Å..... | 182 |
| 4.3. N ₂ | 185 |
| 4.3.1. Spectral Region 1000 to 1450 Å..... | 185 |
| 4.3.2. Spectral Region 800 to 1000 Å..... | 189 |
| 4.3.3. Spectral Region below 800 Å..... | 190 |
| 4.4. NO..... | 190 |
| 4.5. O ₃ | 195 |
| 4.6. Water Vapor..... | 196 |
| 4.6.1. Spectral Region 1450 to 1900 Å..... | 197 |
| 4.6.2. Spectral Region 1050 to 1450 Å..... | 197 |
| 4.6.3. Spectral Region below 1050 Å..... | 199 |
| 4.7. N ₂ O..... | 200 |
| 4.8. CO ₂ | 200 |
| 4.9. O and N Atoms..... | 201 |

| | |
|--|-----|
| 4.10. Other Minor Constituents..... | 201 |
| 4.10.1. CH ₄ | 202 |
| 4.10.2. NH ₃ | 202 |
| 4.10.3. CO..... | 202 |
| 4.10.4. H ₂ and Rare Gases..... | 202 |
| 4.10.5. Na..... | 202 |
| 5. Some Atmospheric Absorption Processes..... | 202 |
| 5.1. General..... | 202 |
| 5.2. Penetration of Solar Ultraviolet Radiation..... | 203 |
| 5.3. Ozone Layer..... | 204 |
| 5.4. O ₂ Dissociation Layer..... | 205 |
| 5.5. <i>D</i> Layer..... | 206 |
| 5.6. <i>E</i> Layer..... | 207 |
| 5.7. <i>F</i> Layers..... | 209 |
| Acknowledgments..... | 209 |
| List of Symbols..... | 210 |

THE PHYSICS OF CLOUD MODIFICATION

James E. McDonald

Institute of Atmospheric Physics, University of Arizona, Tucson, Arizona

| | <i>Page</i> |
|---|-------------|
| 1. Introduction | 223 |
| 2. Clouds and the Atmospheric Water Vapor Cycle | 225 |
| 2.1. Terrestrial Clouds | 225 |
| 2.2. Scale Considerations | 226 |
| 2.3. Precipitation Release Rates and Atmospheric Water Vapor Turnover Rates | 228 |
| 3. Present Status of Cloud and Precipitation Physics | 234 |
| 3.1. Historical Remarks | 234 |
| 3.2. The Condensation Process | 235 |
| 3.3. The Precipitation Process | 241 |
| 3.3.1. The Central Problem of Precipitation Theory | 241 |
| 3.3.2. The Ice-Crystal Process | 244 |
| 3.3.3. The Accretion Process | 253 |
| 3.3.4. Summary | 262 |
| 4. Recent Developments in Cloud-Modification Techniques | 263 |
| 4.1. General | 263 |
| 4.2. Artificial Nucleation of the Ice-Crystal Process | 264 |
| 4.2.1. The Dry-Ice Seeding Technique | 264 |
| 4.2.2. The Silver Iodide Seeding Technique | 267 |
| 4.3. Artificial Stimulation of the Accretion Process | 282 |
| 4.3.1. The Water-Spray Technique | 284 |
| 4.3.2. The Salt-Seeding Technique | 287 |
| 4.4. Other Types of Cloud-Modification Techniques | 289 |
| 5. The Evaluation of Modification Experiments | 290 |
| 5.1. Physical Evaluation | 292 |
| 5.2. Statistical Evaluation | 293 |
| 6. Concluding Remarks | 297 |
| Acknowledgment | 298 |
| References | 298 |
