FOREWORD.....	vii

Developments in Controlled Experiments on Larger Scale Geophysical Problems

DAVE FULTZ

1. Introduction.....	1
2. Similarity Parameters.....	4
3. Large-Scale Phenomena.....	10
4. Medium-Scale Phenomena.....	60
5. Conclusions.....	85
List of Symbols.....	87
References.....	89

Atmospheric Tides

MANFRED SIEBERT

1. Outline of History and Present State.....	105
2. Application and Results of Harmonic Analysis.....	115
3. Foundation of the Theory.....	127
4. Free Oscillations.....	137
5. Laplace's Tidal Equation.....	147
6. Gravitational Excitation of Atmospheric Tides.....	154
7. Thermal Excitation of Atmospheric Tides.....	164
List of Symbols.....	180
References.....	182

Generalized Harmonic Analysis

J. VAN ÍSACKER

1. Introduction.....	189
2. Stochastic Sequence.....	190
3. Determination of the Auto-Covariant and the Power Spectrum.....	191
4. Practical Determination of the Power Spectrum.....	192
5. Covariance and Co-spectrum of Two Stochastic Functions.....	196
6. Generalized Harmonic Analysis.....	198

7. Filters.....	201
8. Practical Construction of an Optimal Filter.....	203
9. Statistical Prevision by the Method of N. Wiener.....	206
10. Practical Determination of the Forecast Formula.....	210
11. Time Series with Periodic Component.....	211
List of Symbols.....	214
References.....	214

Temperature and Wind in the Lower Stratosphere

H. A. PANOFSKY

1. Introduction.....	215
2. General Characteristics of Stratospheric Properties.....	218
3. Synoptic Properties between the Tropopause and 20 km.....	225
4. Synoptic Properties above 20 km.....	241
References.....	246

Arctic Meteorology (A Ten-Year Review)

A. D. BELMONT

1. Introduction.....	249
2. Mean Fields of Pressure and Temperature.....	256
3. Variability in the Stratosphere.....	268
4. General Survey of Recent Advances.....	282
5. Conclusion.....	292
Arctic Meteorology Bibliographies.....	293
References.....	293

Phase Relations of Some Rocks and Minerals at High Temperatures and High Pressures

GEORGE C. KENNEDY

1. Introduction.....	303
2. Apparatus.....	305
3. Results.....	312
4. Conclusion.....	321
References.....	321

AUTHOR INDEX.....	323
SUBJECT INDEX.....	330

DEVELOPMENTS IN CONTROLLED EXPERIMENTS ON LARGER SCALE GEOPHYSICAL PROBLEMS

Dave Fultz

Hydrodynamics Laboratory,* Department of Meteorology,
The University of Chicago, Chicago, Illinois

1. Introduction.....	1
1.1. Scope and Point of View.....	2
2. Similarity Parameters.....	4
3. Large-Scale Phenomena.....	10
3.1. Rotational Influences, Homogeneous Fluids.....	10
3.2. Variable Density Flows and Atmospheric Convective Motion.....	20
3.3. Large-Scale Geological Processes.....	45
3.4. Large-Scale Electromagnetic and Hydromagnetic Phenomena.....	52
4. Medium-Scale Phenomena.....	60
4.1. Stable Density Stratification.....	60
4.2. Unstable Density Stratification.....	73
4.3. Seismic Waves.....	82
5. Conclusions.....	85
6. Acknowledgements.....	86
List of Symbols.....	87
References.....	89

ATMOSPHERIC TIDES

Manfred Siebert

Geophysikalisches Institut der Universität Göttingen, Germany

1. Outline of History and Present State	105
2. Application and Results of Harmonic Analysis	115
2.1. Outline of Harmonic Analysis	115
2.2. Planetary Representation of the Tidal Oscillations	117
2.3. Treatment of Seasonal Variations of the Tidal Oscillations	119
2.4. Numerical Results	123
3. Foundation of the Theory	127
3.1. Assumptions and Basic Equations	127
3.2. Formal Development of the Theory	133
4. Free Oscillations	137
4.1. Simple Model Atmospheres and Their Eigenvalues	137
4.2. Atmospheric Tsunamis	141
5. Laplace's Tidal Equation	147
6. Gravitational Excitation of Atmospheric Tides	154
6.1. Gravitational Tidal Forces	154
6.2. Gravitationally Generated Oscillations	157
7. Thermal Excitation of Atmospheric Tides	164
7.1. Thermal Tidal Forces	164
7.2. Thermally Generated Oscillations	173
List of Symbols	180
References	182

GENERALIZED HARMONIC ANALYSIS

J. Van Isacker

Royal Meteorological Institute, Uccle, Belgium

1. Introduction.....	189
2. Stochastic Sequence.....	190
3. Determination of the Auto-Covariant and the Power Spectrum.....	191
4. Practical Determination of the Power Spectrum.....	192
5. Covariance and Co-spectrum of Two Stochastic Functions.....	196
6. Generalized Harmonic Analysis.....	198
7. Filters.....	201
8. Practical Construction of an Optimal Filter.....	203
9. Statistical Prevision by the Method of N. Wiener.....	206
10. Practical Determination of the Forecast Formula.....	210
11. Time Series with Periodic Component.....	211
List of Symbols.....	214
References.....	214

TEMPERATURE AND WIND IN THE LOWER STRATOSPHERE

H. A. Panofsky

The Pennsylvania State University, University Park, Pennsylvania

1. Introduction	215
1.1. Data Availability	215
1.2. Definitions	216
1.3. Significance of the Stratosphere	216
1.4. Composition of the Stratosphere	216
1.5. Some Practical Rules of Thumb	217
1.6. Correspondence between Isobaric Surfaces and Heights	217
2. General Characteristics of Stratospheric Properties	218
2.1. The Temperature Distribution in Summer	218
2.2. The Temperature Distribution in Winter	218
2.3. The Distribution of Zonal Wind in Summer	220
2.4. The Distribution of Zonal Wind in Winter	222
2.5. Annual Variation of Temperature	223
2.6. Annual Variation of Wind	223
3. Synoptic Properties between the Tropopause and 20 km	225
3.1. The Lower Stratosphere in Summer	225
3.2. The Lower Stratosphere in Middle Latitudes in Winter	230
3.3. The Polar Vortex and the PRB at and below 20 km	233
3.4. Explosive Warming	237
4. Synoptic Properties above 20 km	241
4.1. The Flow above 20 km in Summer	241
4.2. The Flow above 20 km in Winter	242
4.3. Summary	245
Acknowledgments	246
References	246

ARCTIC METEOROLOGY

(A Ten-Year Review)*

A. D. Belmont

General Mills, Minneapolis, Minnesota

1. Introduction.....	249
1.1. Station Network.....	250
1.2. Data Sources.....	253
1.3. Arctic Meteorological Research Groups.....	254
2. Mean Fields of Pressure and Temperature.....	256
2.1. Mean Map Patterns.....	258
2.2. Mean Cross Sections.....	268
3. Variability in the Stratosphere.....	268
3.1. "Sudden Warmings".....	269
3.2. The Arctic Jet.....	277
3.3. The Seasonal Reversal of Flow.....	278
3.4. Summary.....	281
4. General Survey of Recent Advances.....	282
4.1. General Circulation.....	283
4.2. Upper-Air Climatology.....	284
4.3. Synoptic Studies.....	287
4.4. Surface Climatology.....	288
4.5. Arctic-Antarctic Comparisons.....	289
4.6. Forecasting Studies.....	290
4.7. Vertical Motions and Ozone.....	290
4.8. Solar-Terrestrial Relations.....	292
5. Conclusion.....	292
Arctic Meteorology Bibliographies.....	293
References.....	293

PHASE RELATIONS OF SOME ROCKS AND MINERALS AT HIGH TEMPERATURES AND HIGH PRESSURES*

George C. Kennedy

Institute of Geophysics, University of California, Los Angeles, California

1. Introduction.....	303
2. Apparatus.....	305
2.1. Early Equipment.....	305
2.2. High-Pressure Gas Equipment.....	306
2.3. Solid High-Pressure Equipment.....	309
3. Results.....	312
3.1. Melting Points of Minerals under High Confining Pressure.....	312
3.2. Melting Points of Minerals under High Water Pressures.....	313
3.3. Vapor Pressures of Hydrous Phases.....	315
3.4. Solid-Solid Phase Changes.....	316
4. Conclusion.....	321
References.....	321
