Astrogeology: Terrestrial Meteoritic Craters and the Origin of Tektites

VLADIMIR VAND

1. Introduction.....	2
2. General Description of Tektites	3
3. Chemical Composition of Tektites	6
4. Ages of Tektites	15
5. Physical Properties of Tektites.....	16
6. Varieties of Tektites	38
7. Silica Glasses and Impactites	49
8. Theories of Origin of Tektites	51
9. Backsplash Hypothesis	65
10. Meteoritic Craters Associated with Tektites	85
11. Effects of Large-Scale Impacts	91
12. Epilogue.....	94
Acknowledgments	99
References	99

Atmospheric Ozone

ARLETTE VASSY

1. Introduction.....	116
2. Measurement of Characteristic Parameters.....	117
3. Concentration at Ground Level	132
4. Reduced Thickness and Temperature	136
5. Vertical Distribution	148
6. Ozone in the Upper Atmosphere	162
7. Origin of Atmospheric Ozone	165
References	168

The Heat and Water Budget of the Earth's Surface

DAVID H. MILLER

1. Introduction	176
2. The Earth's Surface as the Locale of the Heat and Water Balances	179
3. Individual Fluxes, Storages, and Transformations in the Heat and Water Balances	181
4. The Budget <i>in Situ</i>	230
5. Conclusion	275
Acknowledgments	277
References	277

Fluctuations of Ground-Water Levels

G. TISON, JR.

1. Introduction	303
2. Fluctuations in Large Aquifers Replenished by Precipitation or Artificial Recharge	304
3. Fluctuations in Alluvial Aquifers Recharged by or Discharging into Watercourses with Changing Level	315
List of Symbols	325
References	325

ASTROGEOLOGY: TERRESTRIAL METEORITIC CRATERS AND THE ORIGIN OF TEKTITES

Vladimir Vand

Materials Research Laboratory and Department of Geochemistry and Mineralogy
The Pennsylvania State University, University Park, Pennsylvania

	<i>Page</i>
1. Introduction	2
2. General Description of Tektites	3
2.1. Geographical Distribution	5
3. Chemical Composition of Tektites	6
3.1. Major Elements	6
3.2. Minor Elements	11
3.3. Isotopes and Isotope Ratios	12
4. Ages of Tektites	15
5. Physical Properties of Tektites	16
5.1. Primary Shapes of Tektites	17
5.2. Surface Sculpture	20
5.3. Weights	21
5.4. Density and Refractive Index	21
5.5. Flow Structure and Schlieren Patterns	23
5.6. Viscosity of Tektite Glass	24
5.7. Strain Birefringence	24
5.8. Inclusions	25
5.9. Temperature Index	26
5.10. Color and Absorption Spectra	33
5.11. Magnetic Properties	33
5.12. Volatilization and Fractionation	34
5.13. Flanges and Second Melting	35
6. Varieties of Tektites	38
6.1. Australites	38
6.2. Asian Tektites	40
6.3. Moldavites	44
6.4. Ivory Coast Tektites	46
6.5. Bediasites and Georgia Tektites	47
6.6. Martha's Vineyard	47
6.7. Colombianites and Americanites	48
6.8. Obsidian and Obsidianites	48
6.9. Tektite from Källna	48
6.10. Igast Object	49
7. Silica Glasses and Impactites	49
7.1. Wabar Glass	49
7.2. Auelloul Glass	49
7.3. Darwin Glass	50
7.4. Libyan Desert Glass	51

8. Theories of Origin of Tektites	51
8.1. Terrestrial and Lunar Volcanism	52
8.2. Terrestrial Lightning	53
8.3. Searing of Soil by Heat from a Grazing Meteorite	53
8.4. Remains of the Earth–Moon Separation	53
8.5. Terrestrial Meteoritic Impact	53
8.6. Terrestrial Impact of a Comet	57
8.7. Lunar Meteorite Impact Origin	59
8.8. Earth’s Satellites in Circular Orbits	62
8.9. Meteoritic Theories of Tektite Origin	63
9. Backsplash Hypothesis	65
9.1. Shaped Charge Experiments	66
9.2. Peripheral Wedge Impact Jets	67
9.3. Shock Wave Phenomena	68
9.4. The Train	72
9.5. Rock Penetration Phenomena	74
9.6. Depth of Penetration of a Meteorite	76
9.7. Shape of the Strewnfield	77
9.8. Backsplash Jet Formation	79
9.9. Estimates of the Size of the Jet	81
9.10. Silica Enrichment of Tektites by Centrifugal Acceleration	82
9.11. Atmospheric Resistance to an Expanding Jet	84
10. Meteoritic Craters Associated with Tektites	85
10.1. Ashanti Crater	85
10.2. Ries Kessel	86
10.2.1. The Throwout and the Fallout	87
10.2.2. The Ries Tuff or Suevite	88
10.2.3. The Bombs	88
10.2.4. The Ash	89
10.2.5. Gravity Measurements	89
10.2.6. Magnetic Measurements	90
10.2.7. Seismic Investigations	90
10.3. The Wilkes Land Crater in Antarctica	90
11. Effects of Large-Scale Impacts	91
12. Epilogue	94
Acknowledgments	99
References	99

ATMOSPHERIC OZONE

Arlette Vassy

Laboratoire de Physique de l'Atmosphère,
Faculté des Sciences de Paris, Paris, France

	<i>Page</i>
1. Introduction	116
2. Measurement of Characteristic Parameters	117
2.1. Different Aspects and Points of View	117
2.2. Absolute Measurements	118
2.3. Chemical Measurements Requiring a Calibration	120
2.3.1. Electrometric Method	120
2.3.2. Radioactive Clathrates	120
2.3.3. Rubber Cracking	121
2.3.4. Colorimetry	121
2.3.5. Fluorescence and Luminescence	121
2.3.6. Catalytic Analyzer	121
2.3.7. Brewer's Equipment	122
2.4. Spectroscopic Methods	122
2.4.1. Ground Level Concentration	123
2.4.2. Total Amount or Reduced Thickness	124
2.5. Absorption Coefficients	125
2.5.1. Ultraviolet	126
2.5.2. Visible	129
2.5.3. Infrared	130
2.6. Units	130
2.6.1. Total Ozone	130
2.6.2. Ozone Concentration for a Given Pressure Level, Particularly Surface Ozone	131
2.6.3. Vertical Distribution of Ozone	131
3. Concentration at Ground Level	132
3.1. Measurements and Results	132
3.2. Exchange Phenomena	133
3.3. Storms	134
3.4. Ozone and Atmospheric Pollution	134
3.5. Origin and Interest of Tropospheric Ozone	136
4. Reduced Thickness and Temperature	136
4.1. Introduction	136
4.2. Ozone Distribution Irregularities at the Earth's Surface	138
4.3. Diurnal Variation	143
4.4. Ozone and Terrestrial Magnetism	144
4.5. Relations with Solar Activity	145
4.6. Relations with Meteorology	146
4.7. Average Ozone Temperature	147

5. Vertical Distribution	148
5.1. Direct Methods	148
5.2. Indirect Methods	150
5.3. Methods Applicable to the Mesosphere.....	153
5.4. A Few Results.....	159
6. Ozone in the Upper Atmosphere	162
7. Origin of Atmospheric Ozone	165

THE HEAT AND WATER BUDGET OF THE EARTH'S SURFACE

David H. Miller*

University of California, Berkeley, California

Dedicated to the memory of C. W. Thornthwaite, Geographer and Geophysicist

	<i>Page</i>
1. Introduction	176
2. The Earth's Surface as the Locale of the Heat and Water Balances	179
3. Individual Fluxes, Storages, and Transformations in the Heat and Water Balances	181
3.1. Minor Energy Fluxes	181
3.1.1. Energy for Photosynthesis	181
3.1.2. Kinetic Energy	183
3.2. Change of State of Water	183
3.3. Heat Exchange between Surface and Substrate	184
3.4. The Radiation Budget at the Earth's Surface	186
3.4.1. Downward Flux of Short-Wave Radiation	186
3.4.2. Downward Flux of Long-Wave Radiation	188
3.4.3. Upward Flux of Short-Wave Radiation	189
3.4.4. Upward Flux of Long-Wave Radiation	192
3.4.5. Combinations of Radiation Fluxes	193
3.5. Turbulent Flux of Sensible Heat	199
3.5.1. Downward Flux	199
3.5.2. Upward Flux	199
3.5.3. Intermingled Downward and Upward Fluxes	203
3.6. Turbulent Flux of Latent Heat	204
3.6.1. Downward Flux	204
3.6.2. Upward Flux	204
3.7. Vapor Transport and Precipitation	212
3.8. Delivery of Water to the Surface	215
3.8.1. Interception	216
3.8.2. Storage of Water at the Soil Surface	218
3.8.3. Infiltration of Water into the Lithosphere	221
3.9. Overland Runoff and Its Contribution to Stream Flow	222
3.10. Water in the Substrate	224
3.10.1. Soil Moisture	224
3.10.2. Percolation from the Root Zone	226
3.10.3. Ground Water	226
3.10.4. Base Flow from Ground Water	227
3.11. Lakes	229
4. The Budget <i>in Situ</i>	230
4.1. An Illustration of the Budget	230
4.2. Maritime Influences	234

* *Present address:* Department of Geography, University of Wisconsin-Milwaukee, Milwaukee, Wisconsin.

4.3. Orographic Influences	237
4.3.1. Altitude	237
4.3.2. Slopes	242
4.4. Influences of Surface Cover	244
4.4.1. Characteristics and Heterogeneity	244
4.4.2. Grass and Other Low Vegetation	246
4.4.3. Bare Ground and Mulches	249
4.4.4. Irrigated Crops	252
4.4.5. Tall Crop Plants	254
4.4.6. Orchard and Forest	256
4.4.7. Cities	262
4.4.8. Cover Types in General	263
4.5. Mosaics of Cover Types	264
4.6. Regional Budgets	269
4.7. Global Patterns of the Budgets	273
5. Conclusion	275

FLUCTUATIONS OF GROUND-WATER LEVELS

G. Tison, Jr.

Hydraulics Laboratory, State University of Ghent, Ghent, Belgium

	<i>Page</i>
1. Introduction	303
2. Fluctuations in Large Aquifers Replenished by Precipitation or Artificial Recharge	304
2.1. General Equations	304
2.2. Fluctuations around the Equilibrium Level.....	305
2.2.1. Long Period Fluctuations	305
2.2.2. Annual Fluctuations	309
2.2.3. Approximation of the Method.....	309
2.3. Sudden Modifications of the Ground-Water Level	310
2.3.1. The Lowering of the Water Table of an Aquifer in the Chalk.....	310
2.3.2. Fluctuations in the Viri Area, Eastern Kutch, India	312
3. Fluctuations in Alluvial Aquifers Recharged by or Discharging into Water-courses with Changing Level	315
3.1. Introduction	315
3.2. General Solution	315
3.3. Application to the Aquifer of the Nile Plain	316
3.3.1. Ground-Water Table Fluctuations	316
3.3.2. Observations of Greene	316
3.3.3. Additional Results	318
3.3.4. Examination of the Diagram	318
3.4. Aquifer in the Valley of the River Meuse.....	319
3.4.1. Wave Propagation	319
3.4.2. Determination of S/k	320
3.4.3. Time Lag	322
3.4.4. Fluctuation Waves of Short Periods	322
3.4.5. Well 1	322
3.4.6. Well 1B	323
3.4.7. Causes of Fluctuations	323
