## Geochemistry and Geology of Helium

CARL A. MOORE and BIJAN ESFANDIARI

1. Introduction.....	2
2. Radioactivity.....	3
3. Origin and Abundance of Elements.....	9
4. Origin of Helium.....	11
5. Helium-Generating Potential of Rocks and Fluids.....	14
6. Distribution and Occurrence of Helium.....	29
7. Migration of Helium.....	32
8. Accumulation or Entrapment of Helium.....	41
9. Natural Gas Analysis.....	46
10. Conclusions.....	53
References.....	54

## Evaluation of Precipitation Records in Weather Modification Experiments

FLOYD A. HUFF

1. Introduction.....	60
2. Effects of Natural Precipitation Variability in Evaluating Cloud Seeding Experiments.....	64
3. Use of Precipitation Climatology in Assessing Potential Benefits of Weather Modification.....	70
4. Space and Time Variability Relationships.....	78
5. Other Relevant Climatological Studies.....	92
6. Precipitation Measurement Requirements.....	97
7. Statistical Evaluation Techniques.....	111
8. Downwind Seeding Effects.....	119
9. Design of a Precipitation Modification Experiment.....	123
References.....	133

## Charged Particles Trapped in the Earth's Magnetic Field

DONALD J. WILLIAMS

1. Introduction . . . . .	137
2. Magnetic Field Considerations . . . . .	146
3. Particle Survey . . . . .	156
4. Sources, Losses, and Transport . . . . .	170
5. Concluding Remarks and Future Directions . . . . .	206
List of Symbols . . . . .	207
References . . . . .	208

## Photochemistry of Atmospheric Ozone

H. U. DÜTSCH

1. Observed Distribution of Total Ozone . . . . .	219
2. The Classical Photochemical Theory: "Pure Oxygen Atmosphere" . . . . .	244
3. Ozone Photochemistry in a "Moist" Atmosphere . . . . .	271
4. Possible Importance of Nitrogen Oxides to Ozone Photochemistry . . . . .	303
5. Ozone as a Tracer . . . . .	306
6. Interrelation between Ozone Photochemistry and Stratospheric Dynamics . . . . .	312
List of Symbols . . . . .	315
References . . . . .	315
AUTHOR INDEX . . . . .	323
SUBJECT INDEX . . . . .	330

# GEOCHEMISTRY AND GEOLOGY OF HELIUM

Carl A. Moore and Bijan Esfandiari

School of Petroleum and Geological Engineering, University of  
Oklahoma, Norman, Oklahoma, and Department of Geology,  
University of Tehran, Tehran, Iran

	<i>Page</i>
1. Introduction . . . . .	2
Statement of the Problem . . . . .	2
2. Radioactivity . . . . .	3
2.1. Introduction . . . . .	3
2.2. Radioactive Nuclides . . . . .	4
2.3. Alpha Radioactivity . . . . .	4
3. Origin and Abundance of Elements . . . . .	9
3.1. Origin of the Elements . . . . .	9
3.2. Equilibrium Theory . . . . .	9
3.3. Cosmic Abundances of the Elements . . . . .	10
4. Origin of Helium . . . . .	11
4.1. Definition and Uses of Helium . . . . .	11
4.2. Theories of Helium Origin . . . . .	12
4.3. Cosmogenic Helium . . . . .	12
4.4. Radiogenic Helium . . . . .	13
4.5. Association of Helium in Natural Gases . . . . .	13
5. Helium-Generating Potential of Rocks and Fluids . . . . .	14
5.1. Procedure . . . . .	14
5.2. Equipment . . . . .	15
5.3. Theory of Specific Radiation Activity . . . . .	16
5.4. Helium-Generating Potential of Igneous Rocks . . . . .	17
5.5. Geochemical Controls of Uranium and Thorium Fractionation . . . . .	20
5.6. Helium-Generating Potential of Sedimentary Rocks . . . . .	20
5.7. Types of Uranium Concentration in Sedimentary Rocks . . . . .	22
5.8. Helium-Generating Potential of Metamorphic Rocks . . . . .	23
5.9. Helium-Generating Potential of Fluids . . . . .	25
6. Distribution and Occurrence of Helium . . . . .	29
6.1. Extraterrestrial Helium . . . . .	29
6.2. Terrestrial Helium . . . . .	29
6.3. Crustal Erosion . . . . .	30
6.4. Helium in Crustal Rocks . . . . .	30
6.5. Helium in the Hydrosphere . . . . .	32
6.6. Helium in the Atmosphere . . . . .	32
7. Migration of Helium . . . . .	32
7.1. Migration of Alpha Emitters . . . . .	33
7.2. Migration of Helium at High Pressures . . . . .	33
7.3. Migration of Helium at Low Pressures . . . . .	34
7.4. Diffusional Migration of Helium . . . . .	35
7.5. Subsurface Conditions . . . . .	36
7.6. Migration of Helium . . . . .	36

7.7. Diffusivity Process in Sediments .....	38
7.8. Simplification of Diffusivity Factors for Analysis .....	38
7.9. Mathematical Models .....	39
8. Accumulation or Entrapment of Helium .....	41
8.1. Ability to Hold Helium .....	41
8.2. Effect of Radiation .....	45
8.3. Conditions Favoring Helium Accumulation .....	45
8.4. Retentivity and Diffusivity of Rocks .....	45
9. Natural Gas Analyses .....	46
9.1. Helium-Argon Ratio .....	46
9.2. Helium-Crude Oil Solution .....	47
9.3. Noble Gas Abundances in Natural Gases .....	51
9.4. Helium Distribution in Natural Gases .....	51
10. Conclusions .....	53
References .....	54

# EVALUATION OF PRECIPITATION RECORDS IN WEATHER MODIFICATION EXPERIMENTS

Floyd A. Huff

Illinois State Water Survey, Urbana, Illinois

	<i>Page</i>
1. Introduction.....	60
1.1. Purpose and Scope.....	60
1.2. Sources of Analytical Data.....	61
1.3. Definition of Terms.....	63
1.4. Data Stratifications.....	63
2. Effects of Natural Precipitation Variability in Evaluating Cloud Seeding Experiments.....	64
2.1. Data and Analytical Procedures.....	64
2.2. Results of Analyses.....	65
2.3. General Conclusions.....	69
3. Use of Precipitation Climatology in Assessing Potential Benefits of Weather Modification.....	70
3.1. Natural Distribution Characteristics.....	70
3.2. Evaluation of Potential Cloud Seeding Benefits.....	73
4. Space and Time Variability Relationships.....	78
4.1. Mesoscale Spatial Variability.....	78
4.2. Variation of Point Precipitation with Distance.....	82
4.3. Time Distribution Models of Storm Rainfall.....	88
4.4. Sequential Variability and Lag Correlations.....	91
4.5. Diurnal Distribution of Storm Precipitation.....	91
5. Other Relevant Climatological Studies.....	92
5.1. Climatological Distribution of Areal Mean Precipitation.....	92
5.2. Application of Published Climatic Data on Point Precipitation.....	95
5.3. Frequency Distribution of Various Storm Factors.....	97
6. Precipitation Measurement Requirements.....	97
6.1. Spatial Correlation of Point Precipitation.....	98
6.2. Correlation of Storm Mean Precipitation between Areas.....	102
6.3. Sampling Errors in Measurement of Mean Precipitation.....	103
6.4. Detection of Storm Precipitation.....	107
6.5. Areal Extent of Storm Precipitation on Fixed Sampling Areas.....	110
7. Statistical Evaluation Techniques.....	111
7.1. Use of Areal Precipitation Measurements in Evaluating Seeding Experi- ments.....	111
7.2. Use of Area-Depth Curves in Evaluating Precipitation Modification Experiments.....	114
7.3. Use of Rain Cell Measurements in Precipitation Modification Experiments	115
7.4. Estimating Natural Distribution of Storm Precipitation in Target Area from Control Area Data.....	117
8. Downwind Seeding Effects.....	119
8.1. General Conclusions on Downwind Effects.....	120
8.2. Analyses of Dense Raingage Network Data.....	120

9. Design of a Precipitation Modification Experiment.....	123
9.1. Selection of Sites.....	124
9.2. Sampling Design and Verification Methods.....	126
9.3. Precipitation Measurement Requirements .....	127
9.4. Time of Year.....	129
9.5. Time of Day.....	130
9.6. Weather Types .....	130
9.7. Length of Experiment .....	131
References .....	133

# CHARGED PARTICLES TRAPPED IN THE EARTH'S MAGNETIC FIELD

Donald J. Williams

Space Environment Laboratory, Environmental Research Laboratories,  
National Oceanic and Atmospheric Administration, Boulder, Colorado

	<i>Page</i>
1. Introduction .....	137
1.1. Geomagnetic Trapping .....	137
1.2. General Comments .....	145
2. Magnetic Field Considerations .....	146
3. Particle Survey .....	156
3.1. Protons .....	156
3.2. Electrons .....	160
3.3. Alpha Particles and $Z \geq 3$ .....	168
4. Sources, Losses, and Transport .....	170
4.1. Inner Zone Protons .....	170
4.2. Inner Zone Electrons .....	177
4.3. Outer Zone Protons .....	184
4.4. Outer Zone Electrons .....	191
5. Concluding Remarks and Future Directions .....	206
List of Symbols .....	207
References .....	208

# PHOTOCHEMISTRY OF ATMOSPHERIC OZONE

H. U. Dütsch

Federal Institute of Technology, Laboratory of Atmospheric Physics, Zurich, Switzerland

	<i>Page</i>
1. Observed Distribution of Total Ozone .....	219
1.1. Total Amount .....	219
1.2. Vertical Distribution .....	222
2. The Classical Photochemical Theory: "Pure Oxygen Atmosphere" .....	244
2.1. Introduction .....	244
2.2. Equilibrium Theory .....	245
2.3. Nonequilibrium Theory .....	253
2.4. Influence of Motion on Photochemistry .....	256
2.5. Mesospheric Ozone .....	258
2.6. Uncertainties in the Theory .....	264
3. Ozone Photochemistry in a "Moist" Atmosphere .....	271
3.1. Introduction .....	271
3.2. Semiquantitative Theory of Stratospheric Ozone .....	274
3.3. Nighttime Processes in a "Moist" Stratosphere .....	288
3.4. Mesospheric Photochemistry in the Presence of Water Vapor .....	289
3.5. Influence of Vertical Mixing on Mesospheric Photochemistry .....	287
4. Possible Importance of Nitrogen Oxides to Ozone Photochemistry .....	303
Nighttime Destruction of Ozone through the $\widetilde{\text{NO}}$ -Mechanism .....	305
5. Ozone as a Tracer .....	306
5.1. Importance of the Photochemical Theory in General Circulation Studies Using Ozone as a Tracer .....	306
5.2. Ozone as a Tracer in General Circulation Models .....	310
6. Interrelation between Ozone Photochemistry and Stratospheric Dynamics ..	312
List of Symbols .....	315
References .....	315
