## Application of Laser Techniques to Geodesy and Geophysics

JON BERGER

1. Introduction .....	1
2. Terrestrial Laser Ranging Devices .....	6
3. Extraterrestrial Laser Ranging Devices .....	14
4. Laser Strain Meters .....	23
5. Results of Strain and Range Measurements .....	38
6. Miscellaneous Laser Applications .....	48
7. Summary .....	52
List of Symbols .....	52
References .....	53

## Electron Microprobe Analysis in the Earth Sciences

D. G. W. SMITH and J. C. RUCKLIDGE

1. Introduction .....	58
2. The Instrument and Samples .....	60
3. Quantitative Analysis .....	76
4. Errors .....	103
5. Applications .....	125
List of Principal Symbols .....	142
References .....	143

## Auroral Audibility

S. M. SILVERMAN and T. F. TUAN

1. Introduction .....	156
2. Observational Results .....	157
3. Characteristics and Analysis of Auroral Sound Events .....	176
4. Hypotheses of Auroral Audibility .....	198
5. The Case for Brush Discharge and Aurorally Induced Electric Fields .....	208
6. Conclusions .....	216
List of Symbols .....	217
Appendix: Auroral Sound Events .....	218
References .....	259

## On Volcanic and Other Particulate Turbidity Anomalies

D. DEIRMENDJIAN

1. Introduction .....	267
2. The Krakatoa Event of 1883 .....	268
3. The Katmai Event of 1912 .....	274
4. The Agung Event of 1963 .....	279
5. Climatic Effects of Volcanic Dust .....	290
6. Summary and Conclusions .....	292
References .....	295

## Atmospheric and Oceanic Flow Problems Introduced by Islands

KULDIP P. CHOPRA

1. Introduction and Summary.....	298
2. Microscale Perturbations .....	323
3. Group of Small Islands as Mesometeorological Network .....	326
4. Mesoscale Atmospheric Vortices Leeward of Islands .....	328
5. Vortices Leeward of the Hawaiian Islands .....	357
6. Anomalous Oceanic Circulations Around Islands.....	371
7. Upwelling Due to Circulations Around Islands .....	377
8. Air Flow Over a Heated Island .....	383
9. Recent Experiments in Tropical Island Meteorology .....	406
10. Concluding Remarks.....	414
References .....	416
AUTHOR INDEX .....	423
SUBJECT INDEX.....	432

# APPLICATION OF LASER TECHNIQUES TO GEODESY AND GEOPHYSICS

Jon Berger

Institute of Geophysics and Planetary Physics  
University of California at San Diego, La Jolla, California

	<i>Page</i>
1. Introduction .....	1
1.1. Laser Strain Meters and Laser Ranging Devices .....	2
1.2. Lasers .....	3
2. Terrestrial Laser Ranging Devices .....	6
2.1. Fundamental Considerations .....	6
2.2. Electro-optic Light Modulators .....	7
2.3. LRD Instrumental Description .....	8
2.4. LRD Accuracy .....	10
2.5. Two-Color Techniques .....	11
2.6. Two-Color LRD Instrumental Description .....	12
3. Extraterrestrial Laser Ranging Devices .....	14
3.1. Lunar Laser Ranging Experiment .....	14
3.2. Laser Ranging to Artificial Satellites .....	22
4. Laser Strain Meters .....	23
4.1. Linear Extensometers .....	23
4.2. Lasers Applied to Linear Extensometers .....	24
4.3. The Laser's Wavelength .....	25
4.4. Methods of Laser Stabilization .....	27
4.5. A Michelson Interferometer .....	32
4.6. A Fabry-Perot Interferometer .....	37
5. Results of Strain and Range Measurements .....	38
5.1. Secular Strain Rates .....	38
5.2. Earth Tides .....	41
5.3. Earthquakes .....	44
6. Miscellaneous Laser Applications .....	48
6.1. Laser Interferometer for Absolute $g$ Measurements .....	48
6.2. The Laser Heterodyne Interferometer .....	50
7. Summary .....	52
List of Symbols .....	52
References .....	53

# ELECTRON MICROPROBE ANALYSIS IN THE EARTH SCIENCES

D. G. W. Smith

Department of Geology  
University of Alberta, Edmonton, Alberta, Canada

and

J. C. Rucklidge

Department of Geology  
University of Toronto, Toronto, Ontario, Canada

	<i>Page</i>
1. Introduction .....	58
2. The Instrument and Samples .....	60
2.1. Basic Design Features .....	60
2.2. Electron Optical System .....	62
2.3. Light Optics .....	63
2.4. X-Ray and Electron Detection .....	64
2.5. Electron Beam Scanning .....	71
2.6. Readout and Display .....	72
2.7. Surface Contamination .....	73
2.8. Sample Preparation .....	73
3. Quantitative Analysis .....	76
3.1. X-Ray Emission and Absorption Processes .....	76
3.2. Correction Procedures .....	93
3.3. Computer Applications .....	100
4. Errors .....	103
4.1. Factors Affecting Precision .....	104
4.2. Accuracy and Instrumental Effects .....	110
4.3. Accuracy and Experimental Parameters .....	111
4.4. Accuracy and Matrix Effects .....	118
5. Applications .....	125
5.1. Applications to Qualitative Analysis and the Identification of Phases ..	125
5.2. Applications to Quantitative Analysis .....	130
5.3. Applications Utilizing Soft X-Ray Spectra .....	139
List of Principal Symbols .....	142
References .....	143

# AURORAL AUDIBILITY

S. M. Silverman

Air Force Cambridge Research Laboratories,  
L. G. Hanscom Field, Bedford, Massachusetts

and

T. F. Tuan

Physics Department, University of Cincinnati, Cincinnati, Ohio

	<i>Page</i>
1. Introduction . . . . .	156
2. Observational Results . . . . .	157
2.1. Methodology and the Use of Anecdotal Data . . . . .	157
2.2. Observations by Professionally Trained Observers . . . . .	159
2.3. Surveys . . . . .	159
2.4. Individual Observations . . . . .	161
3. Characteristics and Analysis of Auroral Sound Events . . . . .	176
3.1. Frequency of Occurrence . . . . .	176
3.2. Geographic Extent . . . . .	177
3.3. Latitudinal Dependency . . . . .	178
3.4. Seasonal Dependency . . . . .	180
3.5. Diurnal Variation . . . . .	180
3.6. Sunspot Cycle Dependency . . . . .	181
3.7. Correlation with Magnetic Activity . . . . .	185
3.8. Auroral Characteristics . . . . .	187
3.9. Localization of Effect . . . . .	191
3.10. Weather . . . . .	191
3.11. Effect of Altitude and Terrain . . . . .	192
3.12. Association with Low Aurora . . . . .	192
3.13. Association with Odor . . . . .	193
3.14. Audibility While the Aurora Was Not Visible . . . . .	194
3.15. Effects on Animals . . . . .	195
3.16. Auroral Sounds in Poetry . . . . .	195
3.17. Possibly Related Phenomena—Sounds from Lightning and Meteors . . . . .	197
3.18. Miscellaneous . . . . .	198
4. Hypotheses of Auroral Audibility . . . . .	198
4.1. Psychological . . . . .	198
4.2. Tinnitus . . . . .	199
4.3. Swishing Breath . . . . .	200
4.4. Meteorological Theories . . . . .	200
4.5. Direct Transmission of Audible Sound . . . . .	201
4.6. Infrasonic Waves . . . . .	202
4.7. Direct Perception of Electromagnetic Radiation . . . . .	203
4.8. The Electric Field Pressure Effect . . . . .	204
4.9. Direct Effects of Auroral Electric Fields . . . . .	207
4.10. Emission of Radio Waves in the Audio Region and Conversion to Pressure at the Ear . . . . .	208

5. The Case for Brush Discharge and Aurorally Induced Electric Fields . . . . .	208
5.1. Comparison of the Behavior of Auroral Sounds and Brush Discharges..	209
5.2. Aurorally Associated Electric Fields . . . . .	210
5.3. Mechanism for Production of Aurorally Associated Electric Fields . . . .	214
5.4. Energetics of Sound Events Deriving from Aurorally Associated Electric Fields . . . . .	214
6. Conclusions. . . . .	216
List of Symbols . . . . .	217
Appendix: Auroral Sound Events . . . . .	218
References . . . . .	259

# ON VOLCANIC AND OTHER PARTICULATE TURBIDITY ANOMALIES<sup>1</sup>

D. Deirmendjian

The Rand Corporation, Santa Monica, California

	<i>Page</i>
1. Introduction .....	267
2. The Krakatoa Event of 1883 .....	268
2.1. The Optical Phenomena .....	268
2.2. Interpretation of Optical Phenomena .....	271
3. The Katmai Event of 1912 .....	274
4. The Agung Event of 1963 .....	279
5. Climatic Effects of Volcanic Dust.....	290
6. Summary and Conclusions .....	292
References .....	295

# ATMOSPHERIC AND OCEANIC FLOW PROBLEMS INTRODUCED BY ISLANDS<sup>1</sup>

Kuldip P. Chopra

Department of Physics, School of Sciences  
Old Dominion University, Norfolk, Virginia and  
Division of Physical Science and Coastal Engineering  
Virginia Institute of Marine Science, Gloucester Point, Virginia

	<i>Page</i>
1. Introduction and Summary.....	298
1.1. Atmospheric Flow Patterns Introduced by Islands (Nonconvective Effects) .....	298
1.2. Atmospheric Circulations Generated by Heated Islands .....	310
1.3. Oceanic Circulations Introduced by Islands .....	316
1.4. Significance of Studies of Atmospheric and Oceanic Flow Problems Introduced by Islands .....	320
1.5. Historical Background and Prospectus.....	323
2. Microscale Perturbations .....	323
2.1. Prevailing Wind Field Near Argus Island .....	324
2.2. Disturbance of Ambient Wind Field Caused by Argus Island .....	324
3. Group of Small Islands as Mesometeorological Network .....	326
3.1. Kwajalein Atoll .....	326
3.2. Analysis of Rawinsonde Data at Kwajalein and Roi-Namur Islands .....	327
4. Mesoscale Atmospheric Vortices Leeward of Islands .....	328
4.1. Atmospheric Vortex Streets .....	328
4.2. The Vortex Street Phenomenon: General Considerations .....	329
4.3. Role of Viscosity in Vortex Street Phenomenon.....	332
4.4. Analysis of Atmospheric Vortex Streets Leeward of Islands .....	339
5. Vortices Leeward of the Hawaiian Islands .....	357
5.1. The Hawaiian Islands .....	357
5.2. Atmospheric Flow and Climatological Properties of the Region .....	357
5.3. Oceanic Currents and Circulations.....	358
5.4. Properties of Oceanic Eddies .....	358
5.5. Generation Mechanisms for Hawaiian Eddies .....	367
5.6. Concluding Remarks .....	371
6. Anomalous Oceanic Circulations Around Islands .....	371
7. Upwelling Due to Circulations Around Islands .....	377
7.1. Upwelling in Oceanic Eddies Leeward of Hawaii.....	377
7.2. Upwelling Caused by Winds Parallel to Long Islands .....	378
8. Air Flow Over a Heated Island .....	383
8.1. Land and Sea Breezes .....	383
8.2. Air Flow over Typical Islands .....	384
8.3. Urban Heated Islands .....	402

<sup>1</sup> VIMS Contribution No. 489.

9. Recent Experiments in Tropical Island Meteorology .....	406
9.1. The Line Islands Experiment (LIE) .....	406
9.2. The Barbados Oceanographic and Meteorological Experiment (BOMEX)	409
10. Concluding Remarks .....	414
References .....	416
